Notes from Lab Instructors to Professors:

- Recommend and Encourage students to use the labs
- Make sure student understands the assignment so they can articulate it correctly to lab instructor – send them with some sort of script in order for the lab instructor to know how to assist the student
- Assessment Measure: GradesFirst provides lab personnel with the tools to identify, intervene, and engage with students to lead them on a successful path, while giving you the ability to measure and assess those relationships to ensure that the intervention is successful.
