POLICY STATEMENT

Alabama State University (ASU) is an equal opportunity employer and as such does not discriminate on the basis of race, ethnicity, national origin, age, sex, creed or color in any of its programs, including, but not limited to, admission of students or employment. The University complies with Titles VI and VII of the Civil Rights ACT of 1964 and Title IX of the Education Amendments of 1972 as amended. Information regarding Titles VI, VII and IX may be obtained from the vice president of Human Resources at 334-229-4267 and from the vice president of Student Affairs at 334-229-4241.

Alabama State University maintains, collects and compiles a system of information on its students in order to enhance University efficiency; however, the University fully complies with the Buckley Amendment of the Family Educational Rights and Privacy Act of 1974. Each student may, at any time, exercise his or her rights to inspect and review any and all records, files and data directly related to him or her by initiating a request in writing with the custodian of the records desired. Disclosure of a student’s social security number is voluntary and not mandatory except in cases of employment dictated under Alabama Code [CAD147][CAD147]509 (116)509(128C). When provided, social security numbers will be used to facilitate identification, particularly in cases where marriages and same surnames are involved. Detailed information on University policy explaining access to and release of student records is included in the Student Handbook. An inventory of those records is maintained by ASU offices in Montgomery. Their location and cognizant officer(s) are available in the Office of Students Affairs, 108 McGehee Hall.

Alabama State University is firmly committed to the principle of providing equal educational and employment opportunities for individuals with disabilities in compliance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990. Our policies, programs and activities are designed to ensure that all facilities are made available to students and employees with disabilities in the most appropriate integrated setting. We are further committed to the identification and removal of any and all existing barriers that prevent students or employees with disabilities from enjoying any rights and privileges, advantages or opportunities enjoyed by others. Questions that may arise regarding University compliance and/or requests for reasonable accommodations should be addressed to the vice president to the Human Resources, Alabama State University, Montgomery, AL 36101-0271.

GENERAL HAROLD LLOYD MURPHY GRADUATE SCHOOL POLICIES

Students are admitted to graduate study for the specific purpose stated by The Harold Lloyd Murphy Graduate School at the time they are notified of their acceptance. A student who fulfills that purpose is required to submit an application, a $25 fee, and be accepted in order to pursue further study. For example, a student who has completed a master’s degree program must reapply for admission to (1) take additional courses without a degree objective, (2) pursue a second master’s degree, or (3) work toward a more advanced degree.

Admission to The Murphy Graduate School is valid for one year. If a graduate student fails to complete any graduate course, his/her acceptance lapses, thus resulting in the need to reapply. Students in this situation also become subject to any new admission or program requirements that may have been adopted since initial application was made.

Graduate students are governed by policies and procedures in effect at the time of their initial enrollment. Students who have to withdraw from the University and/or are absent for more than a year will have to reapply for admission. Upon readmission, such students become subject to the current regulations of the Murphy Graduate School and of the program to which they are admitted.

All graduate students are subject to the academic regulations of The Murphy Graduate School and the college and/or department in which they are enrolled.

The Murphy Graduate School reserves the right to decline admission or to require the withdrawal of a student when such action is deemed to be in the interest of the University. Students not in good standing, academically or financially, will not be approved to attend another college or university for transfer credit.

Admission to The Murphy Graduate School does not constitute acceptance as a degree candidate. Since degrees are awarded through academic departments and colleges and not through The Murphy Graduate School, students must be approved for continued study toward a degree by a department and college. (See Admission to Candidacy)

Doctoral programs at Alabama State University have specific and additional policies which may vary from policies presented throughout this bulletin. Students should contact The Murphy Graduate School, the appropriate program director or coordinator for information relating to these polices.

The Vision for Graduate Education

The Vision for graduate education is as follows:

Promoting a Synergistic Environment to Support a Transformational and World Class Graduate Education at Alabama State University.

The Harold Lloyd Murphy Graduate School Mission

The fundamental mission of The Murphy Graduate School is to (1) provide leadership for the University’s doctorate, educational specialist, master’s and certificate level post-baccalaureate degree programs; (2) serve as the campus-wide advocate for the advancement of graduate education; and (3) provide oversight for standards of excellence, fairness and equity in all graduate programs.

Purpose of the Bulletin

The Alabama State University Graduate Bulletin is the primary general information publication for the Murphy Graduate School.

It is intended to provide information for both prospective and continuing students in the pursuance of a graduate degree; additionally, it is a source of information for other individuals interested in graduate education at Alabama State University.

STUDENT RESPONSIBILITY

While Alabama State University endeavors to provide timely, helpful and accurate advisement, it is ultimately the responsibility of the student to know and satisfy all degree and certification requirements. At the same time, it is incumbent upon all graduate students to be knowledgeable of all University and The Murphy Graduate School policies and procedures. By enrolling at Alabama State University, students indicate their willingness to subscribe to and be governed by established rules and regulations. They also acknowledge the right of the University to take such disciplinary action, including suspension and/or expulsion, as may be deemed appropriate for failure (1) to meet all obligations (both academic and financial), (2) to abide by current rules and regulations, or (3) to engage in conduct adjudged unsatisfactory or detrimental to the university.

In addition to the Graduate Bulletin, all graduate students should read the official Student Handbook, The Pilot, which contains current university policies and regulations. Any student who needs a copy of the student handbook should contact the Office of Student Affairs, Room 108, McGehee Hall. Copies of the Graduate Bulletin are available upon request in The Murphy Graduate School.
**Code Of Student Academic Responsibility**

The first law of academic life is intellectual honesty. The following regulations are consistent with the high standards expected of students at Alabama State University. Violation of any of the following standards subjects the student to disciplinary action.

**A. Bribery**

The offering, giving, receiving or soliciting of anything of value in order to obtain a grade or consideration a student would not expect to achieve from his or her own academic performance.

**B. Cheating**

1. Any conduct during a program, course, quiz or examination that involves the unauthorized use of written or oral information, or information obtained by any other means of communication.
2. The buying, selling or theft of any examination or quiz prior to its administration.
3. The unauthorized use of any electronic or mechanical device during any program, course, quiz, or examination, or in connection with laboratory reports, or other materials related to academic performance.
4. The unauthorized use of laboratory reports, term reports, theses or written materials in whole or in part.
5. The unauthorized collaboration on any test, assignment or project.
6. Participating in, or permitting, any of the above activities as defined in B, 1-5.

**C. Lying**

Lying is the deliberate misrepresentation by words, actions or deeds of any situation or fact, in part or whole, for the purpose of avoiding or postponing the completion of any assignment, duties, test or examination in a course, internship or program.

**D. Plagiarism**

Plagiarism is the act of taking an idea, writing or work of another and presenting it as the product of one’s own activity, whether in whole or in part. It is the dishonest use of the work of another person. A person has committed plagiarism when he or she:

1. Submits the words, sentences, ideas, conclusion and/or examples from a source — a book, an article, another student’s paper, etc. — without acknowledging the source.
2. Submits another person’s work in lieu of his or her own work.
3. Allows another student, or students, to take all or part of his or her course and/or examination.
4. Knowingly aids another student in plagiarizing an assignment as defined in D, 1-3.

**THE GRADUATE COUNCIL**

The responsibility for formulating policies for graduate academic programs is delegated to the Graduate Council, subject to approval of the Provost/Vice President for Academic Affairs and, where appropriate, the President of the University. The Council acts as a curriculum committee for graduate program modifications, including the addition and deletion of graduate courses. Additionally, the Council reviews proposals for new programs prior to action by the Provost/Vice President for Academic Affairs. All actions of the Council are submitted to the Provost/Vice President for Academic Affairs and, where appropriate, to the President for review and approval. The Dean of The Murphy Graduate School serves as chair of the Graduate Council.

The Council consists of one elected member of the Graduate Faculty from each of the six academic colleges offering graduate study and four members from the Graduate Faculty appointed by the Provost/Vice President for Academic Affairs in consultation with The Dean of The Murphy Graduate School. To be eligible for Graduate Council membership, full Graduate Faculty status is required for both elected and appointed members. Elections and appointments are made each March in the following academic college sequence: 1st year College of Business Administration and College of Education (election) and two appointments; 2nd year College of Health Sciences and College of Liberal Arts and Social Sciences (election) and one appointment; 3rd year College of Science, Mathematics and Technology and College of Visual and Performing Arts (election) and one appointment. Appointments made by the Provost in consultation with the Graduate Dean will include one Graduate Faculty from each of the Colleges of Education, Health Sciences, and Science, Mathematics and Technology. The fourth appointee will be made from either the College of Business Administration, Liberal Arts and Social Sciences or Visual and Performing Arts. Vacancies are filled in the same manner in which the member to be replaced was selected. The term of membership on the Graduate Council is three years. Two full consecutive terms of office are allowed. The President of the Graduate Student Association serves on the Graduate Council as a student representative and is a voting member with a term of office of one year. Consequently, there are eleven (11) voting members of the Graduate Council.

Ex-officio members of the Graduate Council include the following: Dean of The Murphy Graduate School; Provost/Vice President for Academic Affairs; Associate Provost/Vice President for Academic Affairs; Director of Financial Aid; Director of Disability Services; Dean of the...
Levi Watkins Learning Center; Director of Counseling Services; and the University Registrar.

Dr. William A. Person, Chair
Dean of The Harold Lloyd Murphy Graduate School
Professor of Curriculum and Instruction

**Graduate Council Elected Members**

Dr. Sonja Harrington, 2016
Professor/Educational Leadership, Policy and Law
College of Education

Dr. Greshundria Raines, 2017
Associate Professor Occupational Therapy
College of Health Sciences

Dr. Audrey Napier, 2015
Professor of Biology
College of Science, Mathematics, and Technology

Dr. Doug Bristol, 2015
Associate Professor of Music
College of Visual and Performing Arts

Dr. Paul O. Erhunmwunsee, 2017
Professor of Geography and Interim Chair Criminal Justice and Social Sciences
College of Liberal Arts and Social Sciences

**Graduate Council Appointed Members**

Dr. Gwendolyn King, 2016
Associate Professor of Instructional Leadership
College of Education

Dr. Dorothy Autrey, 2016
Professor/Chair History and Political Science
College of Liberal Arts and Social Sciences

Dr. Mary Beth Downs, 2017
Professor Occupational Therapy
College of Health Sciences

Dr. Carl Pettis, 2015
Associate Professor and Chair of Mathematics
College of Science, Mathematics and Technology

Ms. Arcasis Bulter, 2014
Graduate Student Association, President

**Graduate Council Ex-Officio Members**

Mrs. Arnetta Arnell
Interim Director of Financial Aid

Mrs. Deborah Anderson
Director of Disability Services

Mrs. Jessyca Darrington
Director of Counseling Services

Dr. Janice R. Franklin
Dean of the Levi Watkins Learning Center

Ms. Marie McNear
Interim Director of Records and Registration/Registrar

Ms. Gwendolyn Mann
Director of Health Center

Dr. William A. Person
Dean of The Harold Lloyd Murphy Graduate School and Professor of Curriculum and Instruction

Dr. Karyn Scissum-Gunn
Associate Provost and Vice President for Academic Affairs

Dr. Leon Wilson
Provost and Vice President for Academic Affairs

I. GENERAL INFORMATION

My ASU

As a student at ASU, you become part of a select group invited to make this University home for a lifetime — wherever you go and whatever you become, your touchstone can be ASU. You will have opportunities to transform these special years of university experience into steppingstones to the future. You are invited to dream, to see the future’s open door and to begin the journey. You can take pride in your ASU and you can add to its legacy. Define your vision and start your journey today.

The ASU Legacy—Perseverance, Progress and Promise

ASU’s 145-year history is a legacy of perseverance, progress and promise. The ASU movement began with the impetus to establish a school for black Alabamians. The Civil War resulted not only in the end of slavery but also in the opportunity for blacks to have the right to an education. With the Northern victory, black Southerners, with the assistance of Northern white missionaries and the leaders of African-American churches, set out to establish educational institutions for the freedmen. ASU was born in that movement.

Blacks in the Black Belt of Alabama, the heart of the Confederacy, founded Lincoln Normal School at Marion in 1867. As a descendent of that school, ASU is one of the oldest institutions of higher education founded for black Americans. The men who comprised the Board of Trustees were Joey Pinch, Thomas Speed, Nickolas Dale, James Childs, Thomas Lee, John Freeman, Nathan Levert, David Harris and Alexander H. Curtis. Under the leadership of this group, the blacks of Marion raised $500 and purchased a suitable site on which a school building was constructed.

Until the new school was built, the American Missionary Association (AMA) leased a building, operated, and financed the school. In 1869, the AMA, with the support of $2,800 from the Freedmen’s Bureau of the federal government and support from the “colored people of Alabama,” raised $4,200 to construct a new building. In 1870, while the AMA provided the teachers, the legislature appropriated $486 for the school’s use. The state’s support increased to $1,250 the next year.

In 1871, Peyton Finley petitioned the legislature to establish a “university for colored people;” but his request was denied. He persisted, and in 1873, the Alabama Legislature established a “State Normal School and University for the Education of Colored Teachers and Students.” That act included the provision that Lincoln School’s assets would become part of the new school. The trustees agreed, and in 1874, the school first president, George N. Card, led the effort in re-organizing Lincoln Normal School in Marion as America’s first state-supported liberal arts educational institution for blacks.

Black leaders continued to press for a more prominently supported school for black youths. In 1887 the state of Alabama authorized the establishment of the Alabama Colored People’s University. The land and building allocations were combined with pledges of $5,000 from black citizens who wanted the University in Montgomery. Thus, the University offered its first class in Montgomery in 1887.

Although University president William Paterson and others had overcome initial opposition to locating the school in Montgomery, opponents of state support of education for blacks remained hostile to the new University. Such opponents filed suit in state court and won a ruling in 1887 from the Alabama Supreme Court that declared unconstitutional certain sections of the legislation that established the University for African-Americans. Thus, the school operated for two years solely on tuition fees, voluntary service and donations until, by act of the Legislature in 1889, the state resumed its support. The new law changed the name of the school from university to Normal School for Colored Students, thus skirting the Supreme Court’s finding and re-establishing the $7,500 state appropriation.

Despite having to face tremendous obstacles, the ASU family continued to make significant contributions to the history of the state and nation, especially with the involvement of students and employees in the Civil Rights Movement. The Montgomery Bus Boycott, the first direct action campaign of the modern Civil Rights Movement, awakened a new consciousness within the University and the community responded to the call for participants. Even though officials, in a state committed to segregation, retaliated against the school with a decrease in funding, ASU continued to persevere and flourish so that today it is a model of diversity and equal opportunity for all. At the same time, ASU is a beacon in the legacy of black leadership and the preservation and celebration of African-American culture.

145 Years of Leadership

ASU is a direct descendent of Lincoln Normal School at Marion established in Perry County, Alabama, in 1867.

Although many people worked to establish Lincoln Normal School, Peyton Finley, the first elected black member of the State Board of Education, contributed most in the early years to make the institution permanent. Through his efforts and with the assistance of the institution’s first president, George N. Card, the school became a state-supported educational institution in 1874.
In 1887 the Legislature authorized the establishment of a university, allocated $10,000 for a land purchase and building construction, and set aside $7,500 annually for operating expenses. Montgomery citizens pledged $5,000 in cash and land and donated the use of some temporary buildings. Under the leadership of President William Paterson, the University opened in Montgomery at Beulah Baptist Church with a faculty of nine members. Eight months after the enabling legislation, the university taught its first class on October 3, 1887.

In 1889 was a pivotal year in the university’s development when $3,000 pledged to the state was given to authorities along with land for development of a permanent campus at the university’s current location between Decatur and Hall streets. The University erected Tullibody Hall the next year as its first permanent building. That building burned in 1904 and was rebuilt in 1906 as the university’s first brick structure, which also was named Tullibody Hall.

Paterson, who had guided the University through the early years, and who is generally considered the founder because of his 37 years of service, died in 1915. During the following decade, presidents John William Beverly and George Washington Trenholm organized the institution as a four-year teacher training high school and added a junior college department. In the early 1920s the University began operating on the four-quarter system and added the departments of home economics and commerce. This decade of growth and change also saw the purchase of additional land, including an 80-acre farm which constitutes the bulk of the University’s current holdings. The state also appropriated $50,000 for the construction of dormitories and dining facilities.

In 1925 G. W. Trenholm died and was succeeded by his 25-year-old son, Harper Councill Trenholm—who served as president for 37 years. He oversaw the change from a junior college to a full four-year institution, a process completed in 1928 which enabled the college to confer its first baccalaureate degree in teacher education in 1931. In 1940 Trenholm initiated a graduate degree program, and State Teachers College awarded its first master’s degree in 1943. The school also established branch campuses in Mobile and Birmingham.

Trenholm was eager for the institution to develop and gain recognition. Thus, he worked to improve the physical facilities in concert with advances in the quality of academic programs. During the economic expansion that followed the end of the Great Depression, the University constructed eight permanent brick buildings, a swimming pool and a stadium. To reflect changes in its programs, the Legislature authorized the institution to change its name to State Teachers College in 1929, Alabama State College for Negroes in 1948, and Alabama State College in 1954. In 1935 the Southern Association of Colleges and Schools accredited the college’s programs.

In 1962, after Trenholm’s illness an interim president, Levi Watkins, became president. In 1969, the State Board of Education, then the governing board of the college, approved a name change and the institution became Alabama State University. During these years, the university began a path of steady growth and development in its current role as a comprehensive University. In 1975, the Legislature established an independent board of trustees for the University.

In 1981, Robert Lee Randolph was appointed president, a position he held until 1983. During his tenure, Title III received its largest federal government funding. WVAS-FM was planned, construction began on the Tullibody Fine Arts Center, and the University Apartments were constructed.

After serving 10 months as interim president, Leon Howard was appointed president in 1984, a position he held until 1991. During his presidency, ASU saw dramatic increases in student enrollment, an aggressive student retention program was started, and the social work program received national accreditation. The largest capital campaign, the Endowment for Excellence, raised $1.5 million. Two new dormitories were completed.

C.C. Baker, a 1954 alumnus, served as president from 1991 to 1994. During his tenure, the enrollment reached an all-time high of 5,600 students; programs were reaccredited; athletic programs flourished; the Olean Black Underwood Tennis Center and C. Johnson Dunn Tower were opened in January 1994; and the Acadome was dedicated in 1992.

When William H. Harris became president in 1994, his commitment was to transform ASU into a comprehensive regional university through excellence and diversity. Significant investments were made in technology, the student body became more diverse, and community outreach was emphasized through partnerships with K-12, civic and community organizations. The National Center for the Study of Civil Rights and African-American Culture, Business and Technology Center, and Center for Leadership and Public Policy were established. Degree programs in health information management and occupational therapy and graduate programs in accountancy and physical therapy were created. Improvements in the living and learning environment were made, including renovation to Paterson Hall and the $4.2 million restoration of historic George Lockhart Hall.

Dr. Joe A. Lee became president in 2001 and served until 2008. His vision focused on a students-first philosophy, which emphasized development of a comprehensive student retention program, renovation/construction of a student union building, and completion of the John L. Buskey Health Sciences Center. Accreditation for the University and for academic programs was reaffirmed; and educational leadership, policy and law became the first
doctrinal degree program offered at ASU. A transitional doctorate in physical therapy was introduced, the University experienced a record enrollment, and the women’s basketball team earned national recognition.

In 2008 Dr. William Harris returned to ASU as president. His vision focused on transforming Alabama State University through excellence in teaching, research, service and a diverse population.

Dr. Joseph H. Silver Sr. was appointed president September 11, 2012. During his brief term, the University continued its path toward transformation. Dr. William H. Harris was called on again to lead the University in November of 2012. He served in that capacity for 13 months before returning to retirement.

Dr. Gwendolyn E. Boyd was selected by the Board of Trustees on December 20, 2013, to serve as the University’s first female president. A 1977 ASU graduate, Boyd returns to her alma mater, after a stellar 33-year career at Johns Hopkins University, with a vision of promoting the University as the “Land of Opportunity.”

The Alabama State University Mission

Alabama State University is a student-centered, nurturing, comprehensive and diverse public historically black University committed to achieving excellence in teaching, research and public service. The University fulfills its mission through fostering critical thought, artistic creativity, professional competence and responsible citizenship in its students; by adding to the body of knowledge to enhance the quality of life through research and discovery; and by helping to advance the state and nation through thoughtful public service. Offering baccalaureate through doctorate degrees, the University maintains a scholarly and creative faculty, state-of-the-art facilities, and a living atmosphere in which all members of the campus community can work and learn in pleasant and rewarding surroundings. Consistent with its assurance that race, gender nor economic status inhibits intelligence, creativity or achievement, ASU offers a bridge to success for those who commit to pursuing the building blocks of development, focus, persistence and reward.

National Alumni Association

The National Alumni Association of Alabama State University is the organization that includes among its members graduates and former students who have attended the University for at least two full semesters or three quarters. To become active members of the National Alumni Association, eligible alumni join a local alumni chapter by payment of local and national dues as established by the governing bodies and make annual contributions to the University. Associate memberships are granted to spouses of graduates and to a limited degree, persons who have strong affection for the University and make significant tangible gestures of support.

University relations activities are coordinated by the director for alumni relations, annual and planned giving, who serves on the association’s executive board and works closely with the affiliated alumni chapters. These activities include maintaining a computer file of alumni names and addresses, publication of the alumni directory, fundraising, student recruitment, organizing class reunions, promoting major athletic events among alumni and assisting in the preparation of alumni news for University publications.

Faculty members are encouraged to strengthen the alumni and students’ allegiance to the University through promotion of the alumni association. Faculty who are alumni of the university can add credibility to alumni activities and best show their support by becoming active members of the alumni association. A strong alumni association, as an advocate, can do much to strengthen the university and the welfare of its faculty and students.

University Development Fund

The Alabama State University Development Fund is organized to encourage, receive and administer gifts for the exclusive benefit of the University and its students, faculty and staff. Gifts may be in cash, securities, leases, royalties, literary and artistic collections and real or personal property.

Activities of the fund include loans and grants for individuals on study leave engaged in research or special projects, students having special needs, and assistance to the University for any worthy project for which state funds are not available or may not be lawfully used. The fund was approved by the University’s Board of Trustees on Nov. 2, 1978. Contributions to the fund are exempt from federal income tax. Each member of the faculty and staff is encouraged to join other friends of the University in contributing to the fund. Contributions may be handled as payroll deductions if desired.

Information concerning activities of the fund and contributions to the fund may be obtained from the Office of Planning and Development located in Councill Hall. Directors of the fund are the chief elected officer of the Faculty Senate, president of the Student Government Association, vice president for fiscal affairs, director for alumni relations and president of the University.

University Foundation

The Alabama State University Foundation was chartered under the laws of the state of Alabama on Dec. 27, 1967, as a nonprofit organization incorporated to receive and to
hold gifts, grants, bequests, money, property, and other things of value for the benefit of the University, its faculty, and its students, and to give the University such resources for educational and research purposes.

Activities of the Foundation include loans, grants and matching funds for students; grants and loans for study leaves; salary supplements for “master teachers”; financial assistance for research for eligible faculty; and assistance for University development.

Contributions to the Foundation are exempt from federal income tax, are free from state control and do not displace tax funds.

The president of the University is liaison officer for the foundation and the only University employee who serves on its board of directors. An administrative officer or member of the faculty may serve on each standing committee of the foundation.

Accreditation and Standing of the University

In redefining its mission to include a broadened and larger constituency, Alabama State University has set high standards for itself. As a result, the University today is accredited by several organizations. Alabama State University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools (1866 Southern Lane, Decatur, Georgia 30033-4097; Telephone number 404-679-4500) to award masters, educational specialist degrees, and doctoral degrees. Alabama State University has additional accreditations from the National Council for Accreditation of Teacher Education (NCATE), Council for Accreditation of Counseling and Related Educational Programs (CACREP) National Association of Schools of Music, National Association of Schools of Art and Design, and National Association of Schools of Theatre.

ASU is approved by the Alabama State Department of Education, and its programs and credits are accepted for teacher certification. ASU is fully approved by the Veterans Administration to provide educational programs authorized by Congress under several federal acts and those authorized by the state of Alabama under the Alabama G.I. and Dependents Benefit Act.

The Physical Therapy Program is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE) through 2018. Current and prospective students may file a complaint with CAPTE in writing: 1111 N. Fairfax St. Alexandria, VA 22314, by phone: 1-800-999-2782, or by email: accreditation@apta.org.

The Occupational Therapy Program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449, (301) 652-AOTA (www.acoteonline.org).

The Rehabilitation Counseling Program is accredited through Summer 2014 by the Council on Rehabilitation Education (CORE), located at 1699 E. Woodfield Road, Suite 300, Schaumburg, IL 60173; (847) 944-1345; (URL: http://www.core-rehab.org/ContactUs. The program will be notified in July 2014 regarding its application for reaccreditation status.

The Prosthetics and Orthotics Program is accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org) upon the recommendation of the National Commission on Orthotic and Prosthetic Education (NCOPE). CAAHEP staff can be reached at 1361 Park Street, Clearwater, FL 33756; (727) 210-2350; www.caahep.org.

Also, the College of Business Administration is fully accredited by the Association of Collegiate Business Schools and Programs (ACBSP) and an association member of the American Assembly of Collegiate Schools of Business (AACSB).

ASU also holds membership in several organizations, including the following: American Association of State Colleges and Universities, American Council on Education, National Association for Equal Opportunity in Higher Education, College Language Association, Alabama Association of College Administrators, American Association for Colleges of Teacher Education, American Association of University Women, National Collegiate Athletic Association, National Association of Intercollegiate Athletics, National Association of Student Personnel Administrators, American College Public Relations Association, Council of Graduate Schools, Conference of Southern Graduate Schools, Alabama Council of Graduate Deans, and Council of Historically Black Graduate Schools.

Facilities

Growth in size and facilities is part of the story of any dynamic institution, and Alabama State University is no exception. Less than 15 years ago, the enrollment was 1,600 and the University’s 52-acre campus encompassed only 12 permanent buildings. Today the enrollment has increased to more than 6,000. The campus covers 105 acres and more than 30 permanent buildings. The buildings are set in a landscape design that rivals the most beautiful urban campuses in the South.
The ASU campus is located only a short walk from the state capitol, the state government complex and downtown Montgomery. This location makes the downtown business district, the municipal civic center, art galleries, theaters, medical centers, the state archives and historical sites readily accessible to students. Across the street from the campus is beautiful municipal Oak Park, with one of the few space transit planetariums in the nation. The campus adjoins Interstate 85 and is about two miles from the Montgomery interchange of Interstate 65 and 85. Air University, Maxwell Air Force Base and Gunter annex are only a few minutes’ commuting distance.

**Off-Campus Sites**

Since the 1920s, Alabama State University has offered instruction for the people of Alabama at sites other than Montgomery. Currently, graduate classes are offered at sites in Birmingham, Mobile and Brewton. Courses offered at these sites are listed in the regular schedule book, and students may register online (Internet) or at the Montgomery campus during the regular registration period. Students taking these courses must meet the same academic requirements and deadlines as students attending classes in Montgomery. Degree-seeking students may take a maximum of 50 percent of required courses at off-campus sites.
II. Expenses and Financial Aid

The following schedule outlines the fees for graduate students at Alabama State University effective at the time this bulletin was printed. Other special fees for academic services available to students. All fees are due and payable at the time of registration. Registration is not complete until all fees are paid. The University will accept cash, checks, money orders, Master Card, VISA, Discover, American Express and approved forms of student financial aid awards. A service charge of $30 will be assessed on all returned checks. Under certain conditions, a student may be permitted to register and subsequently pay a portion of the fees in installments (refer to Procedure for Issuance of Promissory Notes).

The following fees apply to all day, evening and weekend students as of spring 2002. The University reserves the right to change fees and charges without prior notice.

| Vehicle registration (per year) | 70               |
| Traffic fines are assessed.    |                   |
| Property Damage Deposit        | 150              |

Building and Technology Fee

| 1-5 semester hrs              | 446              |
| 6 or more hrs                 | 892              |

*A student who is granted deferment of fee payments must agree at the time of the deferment to waive his or her legal right to privacy should the University find it necessary to enforce collection of the indebtedness. **Fees are subject to change at the discretion of the University.
Registration

To receive the proper credit for a course, the student must be officially registered for the course in the Office of Records and Registration, and the student’s name must be listed on the official class roster. A student who attends a class without official registration will not be permitted to remain in class and will not receive a grade for the course.

Any student who fails to comply with the official registration rules and regulations will not be allowed to petition for course credit.

Detailed registration steps are printed in the course schedule book available in the Office of Records and Registration, J.G. Hardy Center. It is the student’s responsibility to become familiar with the registration process. A late registration fee of $15 is added when registering after the first official day of classes.

Registration for graduate students is to be completed online. Students may register online from any computer labs located on campus or from any off-campus locations. Students are required to attend advisement prior to registration and should contact The Murphy Graduate School prior to registration to ensure that all test requirements, etc. has been met that might prevent registration.

Unregistered students will not be allowed to remain in class if their names do not appear on the official class roster or if they do not have a class schedule at the end of the late registration period.

Any exception to this policy must be approved by the Provost/Vice President for Academic Affairs.

Withdrawal from a Course

A student who chooses to withdraw from a course after the last day of the drop/add period may do so without the approval of the course instructor or the dean. This action will result in the student receiving a “W” for the course. A “W” denotes an official withdrawal from the course and is not calculated into the cumulative grade point average (GPA). A student may withdraw from a course up through the week of midterm examinations. The deadline date for withdrawing from a course (usually the Tuesday after midterm week) is stipulated in the academic calendar. All official withdrawals must be made through the Office of Records and Registration. Official withdrawals may be done online or through the Office of Records and Registration (if withdrawing from all courses).

When a student, as a result of emergency circumstances, is forced to withdraw from a course after the established withdrawal date for the term; the student may petition, in writing, the dean of the school in which the course is offered for approval to withdraw from the course. A student may not withdraw from a course after the deadline if he or she is failing. The dean will contact the student’s instructor to determine the student’s scholastic standing at the time of the request to withdraw.

If a student registers and stops attending a course; the course must be officially dropped through the Office of Records and Registration or a grade of “WF” will be recorded by the instructor.

If a student registers and never attends any class sessions for a particular course, a grade of “X” will be recorded for the course; unless the student officially withdraws through the Office of Records and Registration. A grade of “X” may result in the reduction of a student’s aid award and/or the creation of a financial balance on the student’s account.

If the student improperly adds a course and does not process a schedule change form through the Office of Records and Registration, no credit will be allowed and he or she will not receive a grade for the course.

Policy on Withdrawal from the University

A student who wishes to withdraw from the university must file an official notice with the Office of Records and Registration. One of the following methods may be used:

1. Completion of the official withdrawal from the university form in the Office of Records and Registration
2. Submission of a letter to the Office of Records and Registration indicating the request to withdraw from the University via mail or fax.

Requests for withdrawal from the university must be received in the Office of Records and Registration by the last day of classes of the semester the student wishes to be withdrawn. Students who officially withdraw will receive “W” grade designations for the term of withdrawal.

Refunds of Tuition for Withdrawal and Cancellation from the University during Fall and Spring Semesters

For those students who withdraw from the University or who are withdrawn by the University, charges and refunds of tuition are governed by the following policy:

1. In the event of death, involuntary call to active military duty or a situation in which the University is in error, no charges will be assessed and refund of full tuition will be granted.
2. In all cases of withdrawal or enrollment cancellation from the University, students will be charged or have tuition refunded according to the following schedule:

a. Cancellation/withdrawal before classes begin: no tuition will be charged/full refund.
b. Cancellation/withdrawal during the second week of classes: 20 percent will be charged/80 percent refunded;
c. Cancellation/withdrawal during the third week of classes: 40 percent will be charged/60 percent refunded;
d. Cancellation/withdrawal during the fourth or fifth week of classes: 60 percent will be charged/40 percent refunded;
e. Cancellation/withdrawal during or after sixth week of classes: 100 percent will be charged/no refund.

Refunds will be mailed as soon as possible. Refund checks are subject to deduction for any amount owed to Alabama State University by the student.

No refunds are made for special fees except for the excess load fee, audit fee and off-campus credit fee.

Students suspended for disciplinary reasons are not eligible for refunds or cancellation of amount due.

Withdrawal Charges and Refunds during Summer Session

The following refund policies apply for students attending a summer term:

a. Cancellation/withdrawal before classes begin: no tuition will be charged/full refund;
b. Cancellation/withdrawal during the first week of classes: 20 percent will be charged/80 percent refunded;
c. Cancellation/withdrawal during the second week of classes: 40 percent will be charged/60 percent refunded;
d. Cancellation/withdrawal during the third or fourth week of classes: 60 percent will be charged/40 percent refunded;
e. Cancellation/withdrawal during or after the fifth week of classes: 100 percent will be charged/no refund.

Students who fail to redeem (pay) their promissory note by the third week of classes will be administratively withdrawn (enrolled) from the University during the fourth week. Reinstatement is prohibited unless disenrollment occurred as the result of an administrative error.

Students are not permitted to and faculty members must ensure that, students do not remain in class(es) or continue credit-generating work after their registration has been cancelled.

Housing

All students requesting on-campus housing must pay a $200 deposit to reserve accommodations. This deposit is non-refundable except in a case where the University cannot provide accommodations. The housing contract is binding for the semester or summer term for which the contract is issued. The full fee charged for the term is due and payable, even though the student voluntarily withdraws or is involuntarily withdrawn from the University. Students who desire campus housing should apply directly to the Director of Housing, Alabama State University, Montgomery, AL 36101-0271. On-campus housing for graduate students is limited.

Housing (optional) $1,423 - $2,275 (per semester)
Board (required if living in campus housing, available to off-campus students) $1,038 (per semester)

Non-Alabama Resident Students

Students who are not legal residents of the state of Alabama may be admitted only as nonresident students, and payment of the out-state-fee is required. The following rules apply:

1. Students residing outside the state of Alabama will be required to pay the out-of-state fee.
2. Students of legal age whose parents or legal guardians reside outside the state of Alabama will be required to pay the out-of-state fee.
3. Any adult or emancipated minor student who actually resides within the state of Alabama and has not moved to the state for the sole purpose of attending the university shall be considered a resident of the state of Alabama as of their arrival in the state.
4. Any student may at any time be required to submit proof of residence in Alabama. In addition to such public records as may tend to establish proof of residence, an affidavit of the parent or guardian in the case of minor students, and from the student who has reached his/her legal age, may be required.
5. By definition, all international students, whether holding diplomatic, student, visitor, or other nonimmigrant visas, must pay the non-Alabama resident fee. Those misrepresenting themselves in this respect in order to avoid paying the non-Alabama resident fee will be subject to disciplinary action by the university. In all cases of doubt, the burden of proof of residence status will be upon the student.

Change of Residency Policy/Procedure

Residency Requirements

Legal resident status is granted to a U.S. citizen who meets one of the following criteria:

1. Is a full-time permanent employee of the University or is the dependent of such an employee
2. Can verify full-time permanent employment within the
state of Alabama or is the dependent of such an employee and will commence said employment within 90 days of registration with the institution.

3. Is a member or the dependent of a member of the United States military on full-time active duty stationed in Alabama under orders for duties other than attending school
4. Is employed as a graduate assistant or fellow by the University
5. Is an accredited member of or the dependent of a staff assigned to duties in Alabama (U.S. citizenship not required)
6. Residence in the state by parents, spouse or others who provide more than 50 percent of the student’s financial support.

To be eligible to change residency status, a student must be a citizen of the United States, prove full-time employment within the state of Alabama, provide evidence of having filed an Alabama tax return as resident of the state of Alabama, and prove continuous residence in the state for a purpose other than attending school. Continuous residence in the state may be substantiated by meeting a combination of three of the following:

1. Ownership of residential property and other real property in the state of Alabama
2. Previous periods of residence in the state continuing for one year or more other than a full-time students
3. Voter registration and voting in the state, more significantly, continuing voter registration in the state that initially occurred at least one year prior to the initial registration of the student in Alabama at a public institution of higher education
4. Possession of a state or local license to do business or practice a profession in the state of Alabama
5. In-state address shown on selective service registration, driver’s license, automobile title registration, hunting and fishing licenses, insurance policies, stock and bond registrations, last will and testament, annuities, or retirement plans

The burden of proof for changing legal resident status resides with the student. The Office of The Murphy Graduate School will assist graduate students with the completion of appropriate documents for consideration.

**Veterans’ Expenses**

Disabled veterans who are eligible for admission to the University may register for courses without payment of fees if they are certified by the Veterans Administration.

Full payment of fees is required if the veteran does not have his or her Disabled Certification of Eligibility at the time of registration. The cash payment will be refunded when the veteran presents his or her Disabled Certificate of Eligibility.

Nondisabled veterans must pay their fees at the time they register. They will receive specified allowance under Public Law 89-358.

Veterans and dependents eligible for reimbursement of educational expenses under the Alabama G.I. and Dependents’ Benefit Act, as amended by Act 1275 on Sept. 19, 1973, may have their expenses billed by and paid directly to the University.

Sons and daughters of deceased veterans covered under Public Law 634 must pay their fees at the time of registration. They will receive specified allowances under Public Law 634.

**Delinquent Accounts**

Any student who has a delinquent account (amounts due past the due date) may forfeit the privilege of attending classes and shall not be allowed to register for a new term until his or her account has been paid in full. The University will withhold report of grades, transcripts of records and diplomas until the indebtedness is paid.

Accounts delinquent for more than two academic terms shall be placed with collection agencies for collection and the student will bear the collection cost.

**Financial Aid**

The Office of Financial Aid at Alabama State University provides assistance to students seeking approval for financial support of their education. All students seeking Federal Financial Aid must complete the Free Application for Federal Student Aid (FAFSA). For further information, please call the Financial Aid Office, (334) 229-4323.

The University makes every effort to provide adequate financial assistance for capable and promising students who would otherwise be unable to attend. Financial assistance may be obtained in the form of grants, loans, scholarships, student employment or a combination thereof. Information describing the various financial aid programs and how to apply may be obtained online at www.alasu.edu under Cost & Aid.

**Financial Aid Application Procedures**

Each applicant interested in financial aid must follow these specific steps:

1) Complete the Free Application for Federal Student Aid (FAFSA) at www.fafsa.ed.gov. Include Alabama State University’s federal school code 001005.
2) Complete additional data necessary to clarify or verify the financial information you submitted. Requests for additional data will be sent to you by the University.
3) Complete Entrance Counseling and Master Promissory Note for federal loans awarded at www.studentloans.gov
4) Be enrolled at least half-time to receive federal loans.
5) Maintain Satisfactory Academic Progress (SAP). SAP policy may be reviewed at [www.alasu.edu](http://www.alasu.edu) under Cost & Aid. These application procedures apply to both in-state and out-of-state students.

The priority date for financial aid applications is April 1st.

All student loans administered by the financial aid office are for current costs of attendance – tuition, fees, room and board, transportation, books, etc. A brief description of the loan programs follow:

**Federal Perkins Loan** is a federal program which provides loans to students who can demonstrate financial need. The maximum aggregate loan for a graduate student is $18,000, including undergraduate loans. The amount of the loan is based on financial need.

Repayment of the loan begins nine months after the student leaves school. The minimum repayment is $40 per month and may be extended to a maximum of 10 years. Interest is not charged during periods of enrollment.

**Federal Direct Unsubsidized Loan** is a program whereby a graduate or professional student may borrow up to $20,500 per academic year for educational expenses, provided they have not exceeded the aggregate limit of $138,500. Repayment begins six months after the student leaves school.

**Federal Direct Plus Loan (Grad Plus)** makes long-term loans to pay for the cost of study at postsecondary schools. Graduate and professional students may borrow up to the cost of attendance minus other aid awarded. A credit check is performed. Students who are not approved have the option of obtaining an endorser or appealing the credit decision.

**Graduate Assistantships and Fellowships**

A limited number of graduate assistantships are available to qualified full-time students (enrolled in a minimum of nine (9) credit hours) whose overall undergraduate or graduate grade point average is 3.0 or better and who have been admitted to a graduate degree program at Alabama State University. Assistantships are normally awarded for the academic year. Graduate assistants must be enrolled in a minimum class load of nine (9) graduate credit hours, maintain an overall GPA of 3.0, and agree to work for a minimum of 20 hours per week. Although awards and assignments are made by the Graduate Dean, they are done so with departmental/college approval. Applications are available in The Murphy Graduate School, Councill Hall 201.

The Doctoral Program in Educational Leadership, Policy, and Law provides both student assistantships and fellowships. These involve both a tuition waiver and stipend. Each requires work within the program. Contact the graduate program coordinator for further information.

The Doctoral Program in Microbiology provides program-supported teaching assistantships and faculty-supported research assistantships. Contact the graduate program coordinator/director for further information.

The Master of Science Program in Forensic Science offers tuition and stipend support for a percentage of its full-time program students. Contact the graduate program coordinator for further information.

The Master of Accountancy Scholarship at Alabama State University provides funds to cover tuition and books for students who have been admitted to the master’s degree program and meet specified criteria. Applications for the scholarship may be obtained by writing to Dr. Dave Thompson, Director Master of Accountancy Program.

The Teacher Education Scholarship at Alabama State University provides funds to cover tuition and books for students who have been admitted to a nontraditional teacher education program.
III. GRADUATE ADMISSIONS REQUIREMENTS

From its inception, The Murphy Graduate School has been recommended for students whose aptitudes and interests carry them beyond routine classroom experiences. Students are provided a variety of experiences through teaching, research, practicum, and laboratory instruction designed to develop their powers of logical and independent thought and to enable them to become familiar with research techniques. The Murphy Graduate School welcomes inquiries from prospective students who are interested in expanding their educational horizons or earning an advanced degree.

All degree-seeking students must submit items 1-5 before they may be considered for admission to The Murphy Graduate School.

1. An online application with $25.00 non-refundable fee.
2. Statement of Purpose (A one page essay describing the purpose of entering The Murphy Graduate School)
3. Test scores from the Graduate Record Examination (GRE) revised General and Subject Test for Biology and Mathematics; GRE general test or Miller Analogies Test (MAT) for Counseling (school and clinical), Educational Leadership, Policy and Law, History, Occupational Therapy, Rehabilitation Counseling, Physical Therapy, Prosthetics and Orthotics, ALTA programs, and Music; GRE general test or MAT for traditional educational programs. Graduate Management Admission Test (GMAT) is required for Master of Accountancy. Acceptable test scores are determined by the appropriate college/department; however, applicants are encouraged to review well for the test in order to make a representative score. Standardized test scores submitted must be within the last five years.
4. Official transcripts from all colleges and universities attended with degrees posted as applicable.
5. Three professional letters of recommendation from persons who are qualified to evaluate an applicant’s ability to do graduate-level work.
6. A copy of a current Teaching Certificate for traditional education students (Class B or A).
7. For Alternative Fifth Year programs, applicants must submit proof of registration or a passing score on all three portions (Reading, Writing, and Mathematics) of the Alabama Educator Certification Testing Program (AECTP) Part I prior to being accepted. A passing score on all three portions must be received no later than the end of the first semester of study for individuals. Otherwise, registration for additional classes will not be allowed.
8. If required, students must submit a passing score on the Alabama State University Graduate Writing Competency Test (GWCT) by the end of the first semester of study. The GWCT is scheduled twice each semester in the University Testing Center. Should an applicant fail to pass the GWCT by the end of the first semester of study, registration for additional classes will not be allowed. Proof of remediation must be obtained from the Writing Lab before the student will be allowed to retake the GWCT if unsuccessful in the first attempt.

To Apply to the Master of Science in Occupational Therapy Program

The Alabama State University Department of Occupational Therapy subscribes to the Occupational Therapy Centralized Application Service (OTCAS). Applicants for the entering class (Fall only) should apply online using the OTCAS application. To get started, visit the OTCAS portal at https://portal.otcas.org/. Directions for document submission appear on the OTCAS website. The application deadline is February 1; applications will not be accepted after the published date. All applications must go through OTCAS; paper applications will NOT be considered. If you have any questions about the application process, please call the program.

Admission Requirements

- Bachelor's degree (minimum 2.7 undergraduate grade point average [GPA] with official transcripts)
- MAT or GRE score transcripts
- ASU OT Program prerequisite courses - grade of "B" or better recommended in each
- Three letters of recommendation, one from an occupational therapist
- Early Determination (a felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure)

This document will be completed at the time of the Onsite Interview.

- Observation/Volunteer Hours (minimum of 40 hours in 2 facilities/settings dated/completed within 12 months of application submission). These hours must be complete at the time of application.

Onsite Interview: Candidates selected for the required Onsite Interview will be notified in Early March. The required Onsite Interviews will be scheduled for Late March or Early April.

Students who score at least 450 or 150 (revised GRE score) on the verbal portion of the GRE, a score of 3.5 or higher on the analytical writing portion of the GRE, a scaled score of 385 on the MAT, or a 450 or above on the GMAT, or pass ASU’s BWCT are exempt from the GWCT.

All of the above items should be submitted at the time of
application. An applicant who meets the requirements for admission to a degree program, but who lacks the Graduate Writing Competency Test (GWCT), will be allowed to enroll for ONE SEMESTER ONLY. If a degree-seeking student’s file is not completed by the end of the initial term of enrollment, registration for the next term will not be permitted. Online application is available on the website at www.alasu.edu.

Master’s Programs

Prospective students with a bachelor’s degree or its equivalent from a regionally accredited college or university and a grade point average (GPA) of 2.5 or higher (on a 4.0 scale) are eligible for regular admission. A 2.5 GPA is also required of all applicants to an Alternative Fifth Year M.Ed. Program (ALTA). Students that do not have undergraduate education degrees or teaching certification that wish to pursue master’s degrees in education must enter the Alternative Fifth Year Program (ALTA). The Alternative Program consists of graduate courses that will lead to a master’s degree in the selected teaching field with accompanying teaching certification. A cumulative GPA of 2.75 (undergraduate) and 3.0 (graduate) or higher (on a 4.0 scale) is required of all applicants to the Master of Accountancy program. For Occupational Therapy, a cumulative GPA of 2.70 (on a 4.0 point scale) and for Rehabilitation Counseling a GPA of 2.5 (on a 4.0 point scale) required for all applicants.

Non-Degree and Graduate Certificate Programs

Non-Degree seeking students, those who wish to take advantage of graduate course offerings without earning an advanced degree (e.g., individuals seeking personal enrichment, certification in a new subject field, or recertification to validate an expired teaching certificate,) need only submit a completed online application with $25.00 non-refundable fee and an official transcript to be considered for admission.

Educational Specialist Degree Programs

Admission for the Educational Specialist Degree (Ed.S.). or AA certification programs in education require a 3.0 graduate GPA, appropriate valid Class A certification in approved areas and approval from the major department.

Doctoral Program in Educational Leadership, Policy and Law, Ed.D.

To apply for admission to the Educational Leadership, Policy and Law doctoral program, prospective students must submit an online application, supporting documents and a $25.00 non-refundable application fee before the deadline of March 1.

Students admitted to the Ed.D. program must be accepted to The Murphy Graduate School, possess a master’s degree or higher from an accredited college or university, have an acceptable undergraduate GPA and a graduate GPA of 3.5, and competitive scores on the Graduate Record Examination (GRE) or Millers Analogies Test (MAT). Applicants must also submit the following with their application:

1. A professional resume or vita outlining their experiences, personal achievements and the professional objectives that will be supported through doctoral study.
2. Three letters of reference from individuals who have worked with them in a supervisory capacity.
3. Statement of Purpose (A one-page essay describing the purpose of entering The Murphy Graduate School.)

Once applications are initially evaluated by program faculty, acceptable candidates will be invited for an interview with the program faculty and asked to complete a writing sample.

Final admissions to the doctoral program will be based on the following criteria that include, but are not limited to (1) scores on the GRE or MAT tests, (2) undergraduate and graduate GPA, (3) a writing sample, (4) professional background and experiences, (5) at least two letters of recommendation and (6) a program faculty interview.

Doctoral Program in Physical Therapy, DPT

Applicants to the DPT program must possess a bachelor’s degree from an accredited college or university, have an undergraduate GPA of at least 3.0 on a 4.0 scale, and be accepted to The Murphy Graduate School.

Applicants must submit a completed Graduate School Application, a $25 non-refundable application fee, and a completed Physical Therapy Application Package through PTCAS.org. To be admitted to the Physical Therapy Program, an applicant must submit by December 1 the following items:

1. A Physical Therapy Application through PTCAS.org.
2. Proof of a minimum of 80 hours of volunteer or paid service in physical therapy under the supervision of a licensed physical therapist at a hospital, nursing home, rehabilitation center, outpatient clinic, or community center. Work should be in two or more different areas of physical therapy.
3. Two letters of recommendation: one from a physical therapist documenting the applicant’s exposure to a physical therapy clinical setting; the other from an instructor, academic advisor, or recent employer who can evaluate the applicant’s academic abilities and
character.
4. A written personal statement demonstrating the student’s ability to communicate clearly his/her interest in pursuing the clinical doctorate in physical therapy. (This serves as a statement of purpose.)
5. Transcripts from all colleges and universities attended.

Please note that applicants must be accepted to The Murphy Graduate School and the Physical Therapy Department. Prerequisite course requirements are listed under the Physical Therapy heading.

**Doctoral Program in Microbiology, Ph.D.**

Applicants for admission to the program in microbiology must meet the minimum admission requirements of the graduate program. Candidates must hold a bachelor’s or master’s degree from an accredited institution in a discipline relevant to microbiology or biology. Applicants should complete and submit a graduate application with $25.00 non-refundable fee, along with following documents before March 15:

1. All official transcripts
2. GRE revised General and Subject Test scores
3. Three letters of recommendation
4. Current curriculum vita
5. A personal statement and research philosophy (Statement of Purpose)

An appropriate minimum TOEFL score is required for all international students. The TSE spoken English test may also be required. The microbiology graduate admissions committee makes admissions recommendations on all applications based upon a structured set of criteria for assessment of potential for successful program completion. In addition to the prescribed minimum criteria for admission (GRE/TOEFL scores, curriculum requirements, grade point average), the graduate admissions committee holistically assesses each applicant based on criteria such as previous research experience, applicant’s personal statements, letters of recommendation, and other indicators of potential for successful program completion. Based on recommendations from the graduate admissions committee, program administrators (program director and department chair) render final departmental approval, and submit admission decisions to the dean of The Harold Lloyd Murphy Graduate School.

**International Students**

The University cooperates with agencies that support international student study and welcomes inquiries or applications from individual students. In addition to meeting the regular admission requirements, international students must submit the following:

1. Satisfactory scores on the Test of English as a Foreign Language (TOEFL).

2. An official original copy of the student’s college transcript (in English).
3. A competitive score on the GRE or MAT.
4. An affidavit of financial support documenting that the student, parents or sponsoring agencies will provide funds for all expenses.

Students whose native language is not English must enroll in and satisfactorily complete English 131 during the first term of enrollment.

**Categories of Admission**

1. Special (nondegree): This classification is assigned to students who would like to take advantage of graduate course offerings for purposes of personal enrichment or professional development (certification or recertification, for example), or those awaiting departmental evaluation. Candidates may take up to 12 semester hours, but no more than nine semester hours of approved course work taken in this category may be later applied to a degree program.

   Special nondegree students must satisfy all admission requirements before they can be reclassified to degree-seeking status. All Nondegree students, including those pursuing certification or recertification, will be advised by the dean of The Murphy Graduate School.

2. Regular: A regular student is one who has satisfied all Graduate School admission requirements but who has not been accepted as a degree candidate. Admission to Candidacy forms is available in The Murphy Graduate School.

   Admission to The Murphy Graduate School in any of the above categories is not a substitute for admission as a degree candidate in a specific college or school.

**Admissions Decisions**

Decisions to admit students to The Murphy Graduate School are made by the academic program faculty and graduate school. Admissions decisions will be reported in writing to each applicant by the dean of The Murphy Graduate School. Students have one year in which to enroll after which time their files will be discarded if matriculation does not occur.

After completion of 12 semester hours and successful completion of all required tests, students apply for candidacy (except Alternative A). Decisions to admit students to candidacy are made at the academic program level and The Murphy Graduate School.

**Alabama Educator Certification Testing Program**

The State Department of Education (SDE) requires all students who are applying for an initial professional educator certificate to complete the Alabama Educator Certification Testing Program (AECTP). These students must be in an
Alternative Fifth-Year teacher education program approved by the state of Alabama. Information on the AECTP should be obtained from the College of Education or www.act.org/alabamapttp.

The Sixth-Year Educational Specialist Programs

The curricula patterns of the AA certificate programs and the Ed.S. degree both provide for a greater depth of specialization than is possible at the master’s level. Both programs require a minimum of 30 semester hours beyond the master’s degree. Students seeking admission to a sixth-year program follow the same procedures as applicants for admission to other graduate programs. To be considered for admission to a Class AA certificate program, an applicant must have a 3.00 GPA in all graduate work attempted and hold Alabama Class B and A professional certification in the proposed area of study.

The Alabama State Department of Education grants a Class AA Professional Certification to students who complete the approved graduate program of at least 30 semester hours beyond the master’s degree and pass a comprehensive examination. No courses used to satisfy a Class A master’s certificate can be used for AA credit.

Students seeking admission to the Educational Specialist Degree program must have a grade point average of 3.25 (on a 4.0 scale) in their master’s degree program and a satisfactory admission test score. No applicant will be admitted, however, without the approval of the major advisor. The academic program faculty in the specific areas may use other criteria appropriate to the field of specialization. If the student’s previous work has not provided a proper base of general and specialized preparation for the sixth year of study, additional course work will be required.

All Ed.S. programs require that an approved thesis be submitted to The Murphy Graduate School in partial fulfillment of the requirements for this degree. Additionally, a minimum grade point average of 3.25 in the master’s degree program is required. A maximum of nine hours of graduate credit earned in other approved graduate schools may be transferred; however, all such work must be approved by the student’s advisory committee and must carry a grade of B or better. Credit earned more than eight years prior to completion of degree work may not be used to fulfill degree requirements. No credit earned through correspondence, or workshops or used in obtaining another degree may be used to satisfy degree requirements. All courses must be taken at the 500 or 600 level, and at least two-thirds of the program must include 600-level courses. No coursework used to earn a Class A certificate may be applied to the AA or Ed.S. program.

The Ed.S. degree is offered in the areas of early childhood education, elementary education, instructional leadership, library education, media, reading, school and clinical mental health counseling, and secondary education (subject areas in which the master’s degree was earned).

Program

A minimum of 30 semester hours of work beyond the master’s degree is required. Each program includes courses in foundation fields, the area of specialization, internship or practicum, when applicable, as well as the thesis. Six semester hours of credit are required for the Ed.S. thesis. The thesis should reflect the student’s ability to conduct systematic research.

Advisory Committee

Upon the recommendation of the chairperson of the appropriate department, an advisory committee of three members will be appointed by the dean of The Graduate School to advise and assist the student in planning his or her program. This committee also has the responsibility of supervising all phases of the thesis as well as preparing and evaluating the written comprehensive examination. For the Ph.D. in microbiology program, please refer to specific policies as outlined in the Graduate Handbook for the Department of Biological Sciences.

Certification

All persons who complete approved Teacher Education Programs at the master’s and sixth-year levels are eligible for certification (A, AA respectively), provided that they meet all Alabama State Department of Education requirements.

Individuals seeking to add new subject endorsements at the A or AA levels must already be A or AA certified and have completed an approved master’s or AA program. (except for programs in collaborative education, instructional leadership, library media, and reading specialist. These individuals must hold only initial certification in a subject area.) The approved program being added must be met in full; however, courses completed in satisfying the requirements of another program at the same level do not have to be repeated. Individuals should consult an adviser in the College of Education before registering for classes. A written comprehensive examination is required.

Graduate-level courses used to obtain Class B certification cannot be used again toward Class A certification. Courses used to obtain Class A certification may not be used to add on Class AA certification.

Recertification

An expired teaching certificate may be renewed by enrolling in approved undergraduate or graduate courses, usually nine semester hours. Since renewal requirements vary widely according to the type of certificate held, number of years of teaching experience, and area of endorsement, individuals are urged to contact the Alabama State
Department of Education before enrolling in courses.

Individuals completing degree programs in education at ASU or adding new subject endorsements must apply for and be recommended for certification. Contact the certification officer in the College of Education.

### Senior Privilege Option

Qualified non-education undergraduate students may enroll for graduate credit in courses numbered 500 and above in special cases. Work taken by undergraduates may be applied toward a graduate degree only if the following conditions are met:

1. Approval is obtained from the chair of the student’s current department, chair of the major department concerned and the Dean of The Harold Lloyd Murphy Graduate School and the respective college.
2. The student has completion at least 93 credits of undergraduate hours with a cumulative GPA of 2.75 or higher.
3. This privilege is exercised only during the senior year for a maximum of six hrs.
4. The student has demonstrated in undergraduate coursework the capability of performing graduate level work in the area identified.

The student may qualify for this privilege by securing the required signatures on the Senior Privilege Form, available from The Murphy Graduate School, and returning to The Murphy Graduate School for final approval prior to registration. Once the senior privilege has been approved, the student must submit the form to the Office of Records and Registration to input the graduate course.

### Transient Students/Courtesy Enrollment

Students who are regularly enrolled at another institution, but who wish to take advantage of courses available at Alabama State University, may enroll as transient students. Such students are requested to secure approval from their college deans indicating course(s) in which they wish to enroll. Although transient students do not have to submit official transcripts or test scores, they must complete the application, pay the application fee and submit a letter of good standing from their graduate dean.

If a transient student wishes to enroll as a regular student, all admission requirements must be satisfied. Students who are regularly enrolled at ASU and would like to enroll in transient courses at another university must complete an approved Transient Form prior to enrollment. Once transient courses are completed at the other university, students must request an official transcript and complete a Transfer Credit Form in order to place transient courses on a ASU transcript (Transient Forms and Transfer Credit Forms are located in The Murphy Graduate School Office or on the Website.)

### Residency Requirements for Graduate Programs

Residency is defined as the completion of at least 50 percent of graduate courses on the Montgomery campus. For the Ph.D. degree in microbiology, at least four consecutive semesters for full-time work, excluding summers, must be spent in resident study. Undergraduate courses and doctoral research will not be counted toward residency fulfillment.

### Academic Status

All graduate students are required to maintain a cumulative average of 3.0 (B) in all graduate work attempted to remain in good academic status. Grades less than C are not acceptable for graduate credit. A graduate student whose cumulative average in graduate courses falls below 3.0 for two semesters (or terms) is subject to academic dismissal.

### Appeals

All academic complaints should be appealed first to the faculty member involved and the department chairperson. Further appeals should be made to the dean of the respective college and the graduate dean; however, according to the Student Handbook, if the complaint is still not resolved by the dean, then the student may appeal to the provost/vice president for academic affairs and ultimately to the University President.

Academic dismissals may be appealed to the Graduate Council. Any such appeal must be made in writing to the dean of The Murphy Graduate School at least 60 days prior to the official registration date for the term in which the student is seeking readmission.

### Transfer Credit

A total of up to nine semester hours of graduate credit in which grades of B or better are earned at an accredited graduate degree-granting institution may be accepted as transfer credit. Credit earned in correspondence work will not be accepted.

Any graduate work to be transferred must meet the following requirements: (1) courses must be taken within time limitation as stated for the graduate program of study; (2) the course was restricted to graduate students only; (3) the content of the course must correspond to that of a course at this institution; and (4) courses must be approved by the student’s adviser and the dean of The Murphy Graduate School. Students desiring to have graduate credits transferred must complete a Transfer of Credit form (available in The Murphy Graduate School) and have an official transcript sent from the registrar of the college/university previously attended. Students transferring courses for teacher education programs must have taken them at an institution with state-approved programs.
Revalidation of Coursework

Coursework that is beyond the eight-year time limit may be revalidated. The student must be in good standing to revalidate courses. To validate a course, a student must submit a petition in writing to the dean of The Murphy Graduate School to take a special written examination, which must be passed with a grade of B or better. The department chair and the student’s major advisor will be consulted for recommendation on the petition. No more than nine semester hours of credit may be revalidated in a program, and no course older than 10 years may be revalidated. Appeals of the decision by the graduate dean may be made to the Graduate Council. Once the petition has been approved, the student must enroll in the courses to be revalidated and proceed to take the special written examination provided by the department. The grade must be submitted to the graduate dean to be forwarded to the Registrar with a written statement from The Murphy Graduate School.

ELPL Revalidation of Course Work Policy

Alabama State University and the Educational Leadership, Policy, and Law Doctoral program has set time limits on students to ensure that they have reasonably current knowledge in those courses that comprise the ELPL doctoral program. When coursework taken or applied toward graduation in the doctoral program has aged beyond the 8-year time constraint for dissertation completion, The Murphy Graduate School and the ELPL faculty may consider a student’s application to validate relevant coursework. Only students who: (a) have reached dissertation candidacy, (b) are in good standing with the ELPL Doctoral program, and (c) have a practical expectation that they will complete the dissertation within a semester after application for course validation, are eligible to apply for course validation in an acceptable format established by the ELPL faculty and under the following conditions. To validate coursework, a student must submit a petition in writing to the Dean of The Murphy Graduate School to take an examination which must be passed with a grade of “B” or better. The department chair and the student’s major advisor will be consulted for recommendations on the petition. Appeals of decisions by the graduate dean may be made to the Graduate Council. Once the petition has been approved, the student must enroll in the courses to be revalidated and proceed to take the special written examination provided by the department. The grade must be submitted to the graduate dean to be forwarded to the Registrar with a written statement from The Murphy Graduate School.

- Only courses taken in the ELPL doctoral program are eligible for revalidation; credits transferred to the program must be within the eight-year (time) limit.
- A student may apply for course revalidation only once.
- If a student is unsuccessful at revalidation, he/she will be terminated from the program.

Time Limitation

All degree requirements must be completed within the eight-year time period.

Admission to Candidacy

Traditional Program

All degree-seeking students must be formally accepted as degree candidates by their academic program. As soon as a student has successfully completed 12 semester hours of graduate coursework (do not include transferred hours), an Admission to Candidacy application must be submitted to The Murphy Graduate School for formal approval to continue work toward a degree. A person who has not passed the BWCT, GWCT, AECT or received required GRE or MAT scores will not be admitted to candidacy. Additional requirements may be required by academic colleges.

Non-traditional (Alternative A) Program

All candidates must first be accepted to The Murphy Graduate School. Candidates will be evaluated to determine if minimum program requirements have been met. If requirements have not been met, the candidates must first complete these requirements prior to applying for admission to the Teacher Education/Candidacy Program.

Graduate Students in the Doctor of Philosophy in microbiology program are admitted to candidacy after completing their course requirements and passing written and oral comprehensive exams. For more information on the Ph.D. in microbiology program’s specific policies and guidelines, please refer to The Graduate Student Handbook, Biological Sciences.

Practicum

Only those students who have completed at least three-fourths of their degree program are eligible to enroll in a practicum. Also, a student who has not completed the required application form and been cleared in advance by the director of field and clinical experiences may not register for a practicum. Forms are available in the College of Education, Ralph Abernathy Hall, Room 212.

English Proficiency for Graduate Students

Applicants seeking admission to a degree program in The Murphy Graduate School are to submit passing scores on the ASU Graduate Writing Competency Test (GWCT) by the end
of the first semester of enrollment. This test requires students to write an essay on a general topic distributed that day.

A schedule of test dates is available in the Testing Center and The Murphy Graduate School. Students must register at least two weeks prior to the test in The Murphy Graduate School in Councill Hall 201. Students who fail the test must show proof of remediation to improve their skills before attempting the test a second time.

Registration for a second term will not be permitted without having passed the GWCT.

Language Requirement

Students enrolled in master’s programs in biology, history and mathematics must demonstrate a reading knowledge of a foreign language (French, Spanish or German). This requirement may be satisfied in any of the following ways: (1) by providing evidence of the prior completion of six semester hours of approved foreign language course work with grade of B or better; (2) by achieving a passing score on an approved standardized foreign language competency examination; or (3) by successfully translating into English a foreign language journal article related to the student’s major field of study. The Department of Foreign Languages, through its chairman, will be responsible for administrating the translation exam, as well as approving the acceptability of coursework and determining the appropriateness of any standardized foreign language competency examination. The Department of Foreign Languages, through its chairman, will also be responsible for reporting translation exam scores to the student’s department/college concerned. The department/college will ultimately decide whether a student has passed or not. In no case will a grade of less than 70 or C be considered a passing score.

Computer Language Option

Master of Science students in biology and mathematics may elect to substitute a computer language course for the foreign language requirement. Acceptable computer science courses will be determined by the chair of the mathematics and biology departments. Students who are already proficient in computer science should elect the foreign language option.

Registration

Registration procedures are detailed in the course schedule book published each semester. The schedules are available in the Office of Records and Registration, The Murphy Graduate School, and at site offices in Birmingham, Brewton and Mobile. Fees must be assessed for the current semester and paid before a student can receive a validated class schedule.

Administrative Hold

Students who have not submitted all required admission documents to The Murphy Graduate School (including all required tests) may be delayed in completing registration for a second term of classes or denied registration for additional classes until such documents have been received in The Murphy Graduate School.

Continuous Enrollment Policy

All graduate students matriculating in a degree program must be continuously enrolled at Alabama State University. Continuous enrollment is defined as a student being enrolled in courses in two of three academic terms per year (Fall, Spring, Summer), one of which must be the fall term.

In two of the three terms that a student is not enrolled in a degree program course, with the exception of those students granted a leave of absence, the student must enroll in GRAD 5000. This course will not count toward any degree credit hours. This course is an audit course and tuition for the course is $50.00 for the one credit hour. Also, students must be enrolled in order to take their Graduate Comprehensive Examination (GCE). Students enrolled in non-thesis option programs who have completed all required coursework and have not completed a required GCE must register for GRAD 5000. Students enrolled in thesis and doctoral programs who have completed all required coursework and who are working on their thesis or dissertation must enroll in at least one credit hour of thesis or dissertation research in their academic discipline (i.e., BIO 6000 or LPL 9000). Registration for continuous enrollment will take place during regular registration periods. The Murphy Graduate School will monitor compliance with the Continuous Enrollment Policy and may retroactively enroll those students who fail to register through the graduate audit process; however, the graduate student is ultimately responsible for ensuring that the enrollment provisions of this policy are met.

Leave of Absence

All graduate level students wishing to be excused from the continuous enrollment policy must request a Leave of Absence from The Murphy Graduate School. A Leave of Absence must be obtained from The Murphy Graduate School prior to the semester the absence is to take effect or within a reasonable time of learning such leave is necessary. A student may be granted a Leave of Absence for medical reasons, family necessity or dependent care, military service, or other approved personal reasons. The student must provide The Murphy Graduate School with the appropriate documentation when requesting a Leave of Absence. Examples of appropriate documentation may include military leave papers, signed medical excuses, verification of family care, etc. Students may petition The Murphy Graduate School for a Leave of Absence for a maximum of two terms; however, military deployment or extenuating circumstances could allow for an extension. The request must be filed and approved before the anticipated absence. Also, it is the student’s responsibility to make sure that all re-admission and re-entry requirements are satisfied within their designated program of study.
Course Cancellation

The University will normally cancel any course in which fewer than seven students are enrolled or not offer one for which an instructor is not available. Students registered for classes that are cancelled are automatically dropped and do not have to complete a Schedule Change Form. Tuition charges in these cases are adjusted by the business office. If there is any doubt, students should contact the Office of Records and Registration.

Course Substitution

Graduate course substitutions require recommendation by the student’s adviser and the approval of the dean of the college in which the program is listed.

The Grading System

Final examinations are given each semester. The following are used to label and identify the quality of work completed in graduate courses.

- A 4 grade points/semester hour Excellent
- B 3 grade points/semester hour Good
- C 2 grade points/semester hour Satisfactory
- D 1 grade point/semester hour Minimum Passing
- F No grade points Failure/Completed-Counted in GPA
- I No grade points Incomplete (See below)
- W No grade points Withdrawal/Failure-Counted in GPA

The following symbols are substitutes for grades, but are not grades themselves and are not counted in the GPA:

- W No grade points Withdrawal in good standing
- IP No grade points in progress (see below)
- AU No grade points Audit
- X No grade points Non-Attendance

An “I” (incomplete) grade is assigned in instances in which a student is likely to pass the course upon completion of requirements to change the “I” grade. To yield credit for a course for which a grade of “I” has been assigned, coursework must be completed by the end of the next semester of enrollment. If the student has not fulfilled the course requirements and the course instructor has not submitted the necessary documentation for the removal of the “I” by the end of the semester; the “I” grade will automatically be replaced with a grade of “F”. The next enrollment period cannot exceed two calendar years. At the end of the second calendar year, if the necessary coursework has not been completed; the grade of “I” will automatically be replaced with a grade of “F”.

An “IP” (in progress) grade is assigned in instances in which the academic term has ended and all academic work has not been completed for the course or a final grade has not been assigned or received. This grade is only used for cross-enrolled courses and/or courses resulting in the completion of a thesis, dissertation or extensive coursework. This grade is not to be assigned in the place of an “I” (incomplete) grade. Students receiving veterans benefits are required to adhere to the regulations of the Veterans Administration in addition to those requirements set by the University for all students.

GRADUATE COURSES REPEAT POLICY FOR CREDIT

The Murphy Graduate School is currently working toward a Graduate Repeat Policy for Credit.

Auditing of Courses

A student who wishes to audit a course must enroll as an auditor at the time of registration. No credit is earned and no examination for credit may be subsequently applied for when a course is audited. Not more than one course may be audited by a student during a given term. When final grades are submitted by instructors to the Office of Records and Registration, the letters “Aud” will be recorded for the auditor.

Change of Grade

Grades reported by instructors to the Office of Records and Registration may not be changed except in case of error in reporting the grade or for the removal of an “I” or “IP” grade. A grade, once reported, may be changed only with the concurrence of the instructor, the college dean and the vice president for academic affairs. Each change must be initiated on the proper form and supported by written justification.

To receive credit for a course for which an “I” grade has been assigned, the “I” must be changed by the end of the following period of enrollment in which the “I” was received, not to exceed two calendar years. Otherwise, the “I” will be final and the student will be required to re-enroll in the course in order to earn credit.

Course Load

Nine (9) credit hours are considered a normal full load; The maximum load for full-time graduate students is twelve (12) credit hours. Graduate assistants are required to take a full load of nine credit hours. Special permission to take hours beyond the maximum requires the approval of the student’s advisor, academic department head, the college dean and the graduate dean.

Attendance and Absences

Each student is expected to attend all lectures, seminars, laboratories and field work for each registered class, including the first class session, in order to verify registration with instructors and to complete all work assigned for the course. Failure to observe this policy may seriously jeopardize a student’s academic standing.

If a student does not attend class during the first week (first five instructional days) of the semester and does not give prior notification to the instructor of reasons for absence and intent to attend the class, the student will be dropped from the course.
A student is permitted one unexcused absence for each credit hour generated by the class. For example, two (2) absences are allowed in a two-hour class. Excessive absenteeism, whether excused or unexcused, may result in a student’s course grade being reduced in an assignment of a grade of “F”.

At the beginning of the class, the instructor is responsible for having listed on his or her syllabus the University Attendance Policy. The student will be held responsible for adhering to the University Attendance Policy. Instructors of courses are not obligated to provide makeup opportunities for students who are absent, unless the absences have been officially approved.

An officially approved absence, however, merely gives the individual who missed the class an opportunity to make up the work and in no way excuses him or her from the work required. Official excuses are granted by the Office of Student Affairs for authorized University activities, verified personal illness or illness or death in the immediate family.

Absences will count from the first day of registration for each course. Students receiving veteran’s benefits are required to attend classes according to the regulations of the Veterans Administration in addition to those regulations set by the University for all students. It is the responsibility of the instructor to keep an accurate attendance record of all students enrolled. Students should understand that absences may jeopardize their grades. It is the responsibility of the student to withdraw from the University or drop a course.

The Second Master’s Degree

Nine semester hours of eligible credits earned on one master’s degree at Alabama State University may be applied to the requirements for a second master’s degree. Credits that will be eight years of age or older upon graduation may not be used toward the second master’s degree.

The Comprehensive Examination

Degree candidates must successfully complete a written comprehensive examination as an exit requirement except Physical Therapy and Accountancy. Degree candidates in Occupational Therapy complete a computer-based comprehensive examination that is administered by the Program as an exit requirement. Students must complete three-fourths of their program in their major area and have been admitted to candidacy before they are permitted to sit for their examinations. Students may take the examination a maximum of three times. Students who fail the exam should consult with their graduate faculty advisors prior to retaking the comprehensive examination. Students failing the third time may petition the Graduate Council for further consideration. The examination is scheduled each term.

Registration is required for the examination at least two weeks in advance, and dates are published in the academic calendar. Forms are available in the Graduate dean’s office.

Thesis

When a student is required to write a thesis or elects to write a thesis in partial fulfillment of requirements for a degree, the adviser will indicate this decision on the student’s program during the advisement session. A special supervisory committee to assist the student in planning his or her course of study and research proposal will be appointed by the department chair. The advisory committee named for educational specialist students will serve as the thesis committee.

Students must complete the Thesis Topic Approval Form (obtained from The Murphy Graduate School) prior to proceeding with their thesis. Included in the Thesis Topic Approval Form is a statement requesting approval from the Institutional Review Board. Each student conducting research on human subjects is required to attain the handbook “Guidelines for Investigators/The Review Process for Research on Human Subjects,” from 101 Buskey Building.

Students should submit their Protocol for Research Involving Human Subjects to the chair of the Institutional Review Board, currently located in 101 Buskey Building. After the Institutional Review Board reviews the Protocol, the student shall be notified of his/her status. After appropriate clearance, the student may proceed with his/her research.

After the research and thesis are completed, the student is to arrange a defense before his/her committee. After corrections are made, the thesis is to be reviewed by a technical screening committee. Once the draft submitted meets the approval of this committee, a final copy is to be presented to the thesis committee for final proofing and then to The Murphy Graduate School for final assessment and binding. A charge is assessed for the binding of the thesis.

The topic chosen for the thesis must be in the student’s major area of study. Specific instructions for the preparation of theses and additional requirements are available in The Murphy Graduate School. For specific policies and guidelines pertinent to the M.S. in biology program, refer to The Graduate Student Handbook, Biological Sciences.

Dissertation

As the capstone experience of the Doctoral Program in Educational Leadership, Policy and Law, each student is required to complete a dissertation. The dissertation process is designed so that the student may demonstrate that he/she can complete an independent, original research project that contributes to the improvement of educational practice. The student will conceive, design, execute, interpret and disseminate the dissertation under the direction of the dissertation committee. The project may be
designed using a variety of research designs (experimental, causal-comparative, etc.), as well as approaches (qualitative or quantitative). Further information on the dissertation process may be found in the program’s dissertation handbook.

For the Doctor of Philosophy in microbiology, graduate students can follow one of the two formats to write their dissertations. Format 1 should include abstract, introduction, materials and methods, results and discussion and conclusion. The second format will apply to graduate students who have already published three or more manuscripts. The dissertation will contain the same order as Form 1 but must consist of chapters. Each chapter should include contents of one manuscript. For specific policies and guidelines pertinent to the Ph.D. in microbiology program, refer to The Graduate Student Handbook, Biological Sciences.

Advisement and Counseling

All degree-seeking students, as well as sixth-year students, are assigned an adviser who serves as the principal contact person. Although each program offered in The Murphy Graduate School is presented in this bulletin, it is the responsibility of the student to meet with his/her adviser to ensure that the proper courses are selected and that requirements of the program are properly met.

Students should arrange a meeting with their advisers as soon as possible after they are notified of admission. At this initial meeting, the student will receive a program of study and approval to take classes for the first period of enrollment. Students who apply for admission late—less than three weeks prior to the beginning of a semester—may be delayed in registering for classes resulting in the payment of late fees. Students should consult with the assigned adviser each semester to ensure that the proper classes have been selected and to keep abreast of current Graduate School and Alabama State Department of Education policies and procedures.

Students must check with The Murphy Graduate School regularly to verify all test dates, registration dates, etc.

Transcripts

Transcripts are released only upon written request of the student. The requests are made to the Office of Records and Registration. The first transcript is free; additional transcripts require the payment of a fee. The University shall withhold transcripts due to delinquent accounts.

Applying for Graduation and Certification

Students who plan to complete degree (master’s or specialist) requirements during the fall or spring semester must file an official Application for Graduation through the Office of the Dean of The Harold Lloyd Murphy Graduate School, Council Hall

201. The deadline for filing applications is published in the academic calendar and on the University website.

Before any student can be cleared for graduation, all of the following requirements must be satisfied. Students who do not clear academically must reapply for graduation.

1. Each student must be officially accepted as a degree candidate by an academic program and be admitted to candidacy status.
2. All required credentials and test scores must be on file, including evidence of English proficiency.
3. Each student must take and pass the appropriate Graduate Comprehensive Examination.
4. Each student must achieve the required cumulative GPA of 3.0 (3.25 for Ed.S.)
5. Each student must meet the residency requirement.
6. All courses for a degree must be completed within the eight-year time limit.
7. Each student must complete all of the prescribed courses listed on the program of study and fulfill all departmental requirements.
8. Students will not be allowed to graduate with a grade of “I” outstanding. Students who fail to meet the degree requirements after filing for the degree must refile for the degree when requirements have been completed and pay another graduation fee.
9. All transfer credits must be posted to the ASU transcript.

Dissertations and theses should be defended, approved and submitted to The Murphy Graduate School prior to graduation.

Candidates seeking teacher education certification in Alabama must apply for proper certification through the University Certification Office, Room 209, Ralph Abernathy Hall before they can be cleared for graduation.

Doctoral Programs

The Doctoral Program in Educational Leadership, Policy, and Law is unique because of its highly select students and cohort structure. Those individuals admitted to the Ed.D. and Ph.D program are required to engage in at least three years of doctoral study and successfully complete a minimum of 69 semester hours of post master’s level work for the Ed.D. and 78 hours for the Ph.D. of which at least 63 hours for the Ed.D. and 72 hours for the Ph.D. must be doctoral coursework taken at Alabama State University. Degree requirements include courses in the four major core areas of the program: Educational Leadership, Policy, Law and research. To complete the program, students will also successfully engage in structured and supervised field experiences, a comprehensive examination and a research-based dissertation.

Although policies for this program generally follow those found in this section, additional and specific program policies
exist. Students should review the various doctoral program handbooks for relevant policies or contact their advisor. Students in the Doctor of Philosophy in microbiology program should consult for Graduate Student Handbook, Biological Sciences to fulfill degree requirements that include: plan of study, residency requirements, comprehensive exam, oral exam, admission to candidacy, dissertation defense and other academic requirements.
IV. STUDENT ACTIVITIES AND SERVICES

Departmental, Professional and Honor Organizations

The following organizations have chapters on the Alabama State University campus that may be applicable to graduate students:

- Alpha Kappa Delta - an international sociology honor society
- Alpha Kappa Mu - a general scholarship society
- Beta Kappa Chi - a science and mathematics society
- Epsilon Tau Sigma National Honor Society of the National Society of Allied Health
- Kappa Delta Pi - an education honor society
- Phi Delta Kappa - a professional education fraternity
- Phi Gamma Mu - a professional social science society
- Phi Mu Epsilon - an honorary mathematics fraternity
- Sigma Alpha Iota - a professional music fraternity for women
- Sigma Rho Sigma - social science recognition society
- Sigma Tau Delta - an English honor society
- Tau Beta Sigma - a music organization
- Graduate Student Association (GSA)

Graduate Student Association (GSA)

The purpose of this organization is to serve as a vehicle in promoting graduate student interest, needs and concerns both on the main campus and off-site locations.

Counseling Services

Mrs. Jessyca McCall Darrington,  
334-229-4382  
www.alasu.edu

Alabama State University is firmly committed to providing for the emotional wellness of students. Counselors provide confidential mental health counseling services to assist students in developing healthy relationships, and positive coping skills that will enable them to effectively problem solve, resolve conflicts and make informed decisions. To experience academic achievement without growing personally, emotionally and socially inhibits students from developing to their full potential. Counseling services are free to all students enrolled in the University. Services may be accessed via appointments, walk-in, telephone or referrals from faculty and staff.

The University Counseling Center offers the following services:

A. Individual Counseling provides an opportunity for students to discuss, in confidence with a trained counselor, any difficulties, thoughts, feelings or concerns that are causing them to be anxious, stressed or depressed.

B. Group Counseling provides opportunities for students to participate with peers, professional counselors and experienced leaders in exploring feelings, behaviors and other concerns in a supportive atmosphere; to gain clarification and feedback; and to plan some appropriate action. Mandated groups for conflict resolution and alcohol substance abuse Intervention are available.

C. Crisis Counseling Program is designed to help students face obstacles to life goals or traumatic situations that are for the time insurmountable through the customary method of problem-solving. Counselors are on call 24 hours to provide after hour and weekend crisis counseling.

Testing Services

Mrs. Peggy Jones  
334-229-4385  
www.testing@alasu.edu

The Testing Center provides a variety of services for the entire University. Among the services offered are national examinations, University required examinations, test administration for institutional programs, test scoring, and test interpretation. Testing dates for the academic period are announced at the beginning of the year. Students are urged to obtain a schedule from the testing office (McGehee Hall 105) for information concerning testing dates. Equally important, however, is the research assistance provided by the center to University personnel in their effort to understand and to relate more effectively to student development, curricular development and the University environment.

Students with Disabilities Center

Mrs. Deborah Anderson  
334-229-5127  
www.alasu.edu

Alabama State University is firmly committed to the principle of providing equal educational employment opportunities for individuals with disabilities in compliance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990. Our policies, programs and activities are designed to ensure that all facilities are made available to students and employees with disabilities in the most appropriate integrated setting. We are further committed to the identification and removal of any and all existing barriers that prevent disabled students and employees from enjoying any rights and privileges, advantages or opportunities enjoyed by others. Questions that may arise regarding University compliance and/or requests for reasonable accommodations should be directed to the Director of Disability Services, Alabama State University, P.O. Box 271, Montgomery, Alabama 36101-0271; (334) 229-5127 / (334) 229-5134.
Special instructions are provided during the orientation period that takes place at the beginning of each semester. These instructions include an introduction to all of the facilities and services available to the students with disabilities and the process that the student must follow to get keys to key-controlled elevators.

The program will provide reasonable accommodations for individuals qualifying under the Americans with Disabilities Act and other State and Federal laws and regulations. The service is dependent upon verifiable student documentation provided by a professional source. Examples of services provided or coordinated include note takers, scribes, extended time, interpreter services and isolated testing.

In the event a student with a disability finds that an academic program is located in an inaccessible facility, he or she should report it to the office of Disability Services.

Career Services
Ms. Ella Tucker
229-4156
www.alasu.edu/career_services

The University maintains a comprehensive career planning library that allows for self-directed usage and contains many vocational publications and information on employers, colleges, graduate schools, job search, resume preparation and free handout material as well as a computerized occupational information terminal. In addition, the center also provides a testing program that helps students evaluate values, interests, aptitude, and identification of careers and specific occupational information. Career counseling is provided by appointment, and numerous seminars/workshops on interpersonal topics are conducted.

The Office of Career Services assists graduate students in obtaining career employment before and after graduation. Services include on-campus interviewing, part-time work, internships, resume/credentials preparation and referrals, interview techniques, seminars, interview/interchange seminars, career counseling and a variety of career day programs.

To be eligible for these services, a candidate must be registered with the Career Services and must annually update this registration to remain active. To register with the office call (334) 229-4156 or register online at www.alasu.edu/career_services.

Minority and International Student Services
334-229-4713
www.alasu.edu/student-life/minority--international-affairs/index.aspx

Alabama State University strives to provide equal opportunity for all students. Students whose racial heritage is not black/African-American currently constitute a minority group at ASU. These persons are encouraged to exercise the privilege to enroll in the University and to secure for themselves the benefits of its numerous offerings.

Recognizing that minority groups in any setting have special needs and concerns, the University has established a program to meet the needs of these students. This program is responsible for services performed on behalf of international students from their initial inquiries until their return home.

The Office of Minority/International Student Affairs is located in 6 University Center.

Health Services Center
Ms. Gwendolyn Mann
334-229-4436
www.alasu.edu

University Health Services supports the University in academia, healthy lifestyles, professional competence and citizenship that steers individual and organizational well-being. Quality care services are available for all enrolled students and are cost-effective.

The following services are offered by the University Health Center:

Allergy injections, diagnostic tests, educational programs, individual counseling, insurance information, limited dental services, psychiatric/emotional care, STI testing, T.B. skin tests and readings, treatment of injuries, treatment of sickness and individual support. Educational programs are presented to promote wellness and maintain health.

Complete privacy and confidentiality of records are enforced according to Health Insurance Portability and Accountability Act (HIPAA) and Family Educational Rightsand Privacy Act (FERPA).

All registered students are covered by the Fixed Indemnity Accident and Sickness Plan. The insurance brochures that outline student benefits and claim forms are available in the Health Center.

Health Compliance
Health Evaluation Form
Completion of this form is REQUIRED of all students entering Alabama State University. This means students entering the University, must furnish documented proof of having immunity to measles, negative TB tests within the last 12 months and physical examination signed by a licensed M.D., D.O., or nurse practitioner.

Location & Hours
The Health Services Center is located on the ground floor of Willease Simpson Hall and open Monday – Friday, from 8:00 A.M. to 5:00 P.M.
After-Hour Emergencies
In the event of a life-threatening emergency, students are directed to call 911 or go to Baptist Health emergency room.

Food Service
Several food service options are available to graduate students. Students living in campus housing are included in the board plan. The University provides a carry-out style restaurants located in the John G. Hardy University Center.

Additionally, students who commute may purchase a meal card from the business office.

Post Office
Mr. Troy Nettles
334-229-4481
www.alasu.edu

Alabama State University operates a postal service staffed by University employees under U. S. Postal Service guidelines. The post office is located in the John G. Hardy University Center and offers window services, including selling postal supplies and accepting letters and parcels for mailing. Individual boxes are available for rent, although deliveries are made to all campus housing units.

Student Activities
334-229-4151

With the view of the unique purpose and mission of Alabama State University, the Division of Student Affairs develops its student life programs together with academic life programs. It is only when there is purposeful integration of intellectual development and co-curricular experiences that the numerous dimensions of the maturing process can and will occur. Through a diversity of planned activities, students participate in social, recreational, and cultural activities that enhance personal development. Opportunities are also provided to promote individual initiative, leadership skills, personal character, and the responsibilities of democratic citizenship.

Musical activities of the University are manifested in a variety of programs of general interest and of cultural value to the University and larger community.

Small campus musical groups composed of students who take responsibility for the training and performance of their members are encouraged.

The Marching Hornets — a nationally acclaimed high-stepping marching band — the symphonic band, concert and stage bands, and University Choir are open to all students through auditions. Opportunity is provided for students in these musical groups to earn academic credit.

Motor Vehicle Regulations
While the University does not assume responsibility to provide parking space for the large number of student-operated vehicles, a number of controls and regulations have been established to ensure efficient operations of the University.

Student parking is generally restricted to the perimeter areas of the campus. Students having medically determined physical handicaps are assigned parking spaces for their vehicles near the center of the campus after making the necessary arrangements with the University Health Service and after paying the prescribed parking fee. Legal overnight parking for dormitory students is by special arrangement with the University Department of Public Safety. A vehicle registration fee is paid by students who operate vehicles on the University campus during daytime hours. Registered vehicles are identified by a decal. In assessing fees for parking, the University assumes no liability for damage, theft or vandalism and expects each registered vehicle to have adequate insurance for such purposes.

Students who plan to operate an automobile on the campus should refer to the Alabama State University Parking and Traffic Regulations Department.

Religious Activities
In accordance with the pronouncement of the Supreme Court of the United States on religion in public education, Alabama State University encourages students to attend the place of worship of their choice. The University recognizes religion as an important part of students’ lives. As a part of the total effort to provide a nonsectarian, but deeply rewarding religious experience, the University also encourages special religiously oriented or organized services. Interfaith groups with faculty sponsors assemble voluntarily for discussion or for lectures by leaders in the profession.

University Bookstore
Ms. Jessica Glass
334-229-4143
www.alasu.bksstr.com

The University Bookstore, located in the John G. Hardy Student Center, offers for sale all required textbooks and reference books and a wide variety of school and art supplies, office supplies, greeting cards, souvenirs, imprinted clothing, records and toiletries. University jewelry is also sold. Visa and MasterCard are honored.
The University Library and Learning Resources Center

Dr. Janice R. Franklin
334-229-4106
www.lib@alasu.edu

The University provides library facilities, resources and services to its faculty, students, staff and academic community through a centrally located, newly renovated and enlarged Levi Watkins Learning Center (LWLC). The LWLC encompasses 147,800 square feet of space, housing multimedia learning resources to support teaching, research, scholarship and cultural activities at Alabama State University and its global communities. The five-story structure faces the academic mall of the campus and includes the main Library and Learning Resources departments, the Curriculum Materials Center which serves the teacher education program, the Archives and Special Collections, the National Center for the Study of Civil Rights and African-American Culture and the Media Center.

The library is designed to allow open access to all floors. It holds more than three million items of materials, including books and periodicals, a growing collection of microform and media materials, electronic information sources and numerous other instructional technologies in all formats. The library collections reflect the history, mission and curriculum of the University, including the University’s historical emphasis in education, African-American history and culture, as well as extensive research holdings supporting its more recent addition of doctoral programs in education and in the sciences. Interactive exhibits, information commons areas, individual and group study rooms, a lecture hall, internet café and wireless connections to emerging online technologies are available for scholarly research, cultural discussion and discovery. As the focal point for learning, the LWLC provides access to digitization centers, multimedia and archival collections while networking and linking to information systems worldwide.

A highly competent staff of information specialists, managers, and information technicians assist the teaching and learning mission of the University through the provision of professional research services to engage fully ASU faculty, staff and students. The Public Services staff conducts tours and lectures in information literacy and cultural heritage, providing outreach services to local and international communities.

The LWLC houses internationally renowned special and archival collections. These special materials include the Ollie L. Brown African-American Heritage Collection, a compilation of multimedia materials representing the contributions of blacks to society and multimedia archives that focus on the history and culture of African-Americans and Alabama State University. Of worthy note are the civil rights collections of E.D. Nixon, known as the Father of the Montgomery Bus Boycott, and the Montgomery Improvement Association. Such cultural heritage collections and programs lay the basis for the National Center for the Study of Civil Rights and African-American Culture, with administrative oversight in the library, which serves as a clearinghouse for the preservation and dissemination of information concerning Montgomery, Alabama’s pivotal role in shaping the development of the modern Civil Rights Movement. The center fosters research, teaching and learning as an outgrowth of several special collections housed therein.

The Media Center, located on the fifth floor of the library, provides faculty and students with instructional materials and equipment. Other services provided by the Center are circulation of media equipment, graphics services, audio/video production, videography, digitization services and assistance in the creation of instructional materials.

The LWLC performs its mission through compliance with the Southern Association of Colleges and Schools Commission on Colleges’ accreditation requirements for libraries, and, in accord with discipline-specific accreditation criteria. The facilities and services of the library are available to all students, faculty, and staff, and on a selective basis, to all members of the local community. The library holds membership in the American Library Association, the Lyrasis Library Network, the Montgomery Higher Education Consortium that facilitates reciprocal borrowing privileges with area universities, the HBCU Library Alliance, and the Network of Alabama Academic Libraries (NAAL). As part of the NAAL and OCLC (Online Computer Library Network), the ASU library has a priority cooperative agreement for interlibrary loan services with other colleges and universities throughout the state and is a participant in resource sharing internationally.

Today, the LWLC is the hallmark of the University and has been transformed through its re-design and mission as the center for intellectual life, creativity and life-long learning on campus and beyond its walls. As a “cultural learning place,” it symbolizes the importance of academic excellence at ASU.
V. COLLEGES AND PROGRAMS

College of Business Administration

Office of the Dean
201 Business Administration
LeQuita Booth, Dean

The College of Business Administration (COBA) is fully accredited by the Association of Collegiate Business Schools and Programs (ACBSP) and is an association member of the American Assembly of Collegiate Schools of Business (AACSB). The Master of Accountancy program prepares baccalaureate degree students for upper-level professional careers in public and management accounting in industry and government, achieving professional certifications in accounting such as Certified Public Accountant (CPA), Certified Internal Auditor (CIA) and Certified Management Accountant (CMA), and/or pursuit of terminal (Ph.D.) degrees.

COBA Mission Statement

The College of Business Administration (COBA) supports the mission of the University by serving the higher educational needs of business students at Alabama State University. Programs are designed to help students advance their education in business to become more productive citizens, further their careers and pursue advanced studies within a changing global environment.

Undergraduate programs offer selected specializations built on a foundation of general education and a broad business core with an emphasis on entrepreneurship. The Master of Accountancy Program offers advanced accounting studies. COBA promotes special concern for student learning, the effective use of technology and ethical behavior. Teaching/coaching and the resultant student learning are the highest priority of COBA. To that end, instructional development and faculty intellectual contributions of discipline research are emphasized. Faculty development, community service and involvement in professional organizations resulting in service to key stakeholders are stressed. COBA solicits input from its primary stakeholders through advisory councils.

Master of Accountancy Admission Requirements

1. The student has taken the GMAT during the last five years and has had the scores submitted to the ASU Murphy Graduate School.

2. The applicant has an acceptable GMAT Score.

3. The requirements for admission are based on total points according to the formula. The formula is 200 x the GPA requirement plus the GMAT score. The minimum total points for unconditional acceptance are 915 points. Students who are accounting graduates of Alabama State University may be considered for admission without the GMAT score requirement; but, must have a minimum of 2.75 GPA.

4. The student has earned a baccalaureate degree from a regionally or nationally accredited institution with a major in accounting or business disciplines.

5. The student has provided The Murphy Graduate School with two letters of recommendation from individuals familiar with the student’s work record, academic record, and personal character. Letters of recommendation from family are NOT acceptable.

6. The student has provided The Murphy Graduate School Office with official transcript(s) from ALL schools where undergraduate or graduate courses have been taken. (Note: Alabama State University will only accept nine graduate semester hours from another university.)

7. If the student’s native language is not English, the student must pass TOEFL with a score of 550 or better and have the score submitted to The Murphy Graduate School Office.

8. The Admissions Committee evaluates all applicants and submits its findings and recommendations to The Murphy Graduate School.

9. The student accepted on a probationary basis may take only nine semester hours.

Graduation Requirements:

1. The student must maintain a cumulative average grade of 3.0 (B) or higher in required and elective graduate courses to receive the Master of Accountancy degree.

2. Courses (undergraduate or graduate) taken by the student enrolled in the Master of Accountancy Program that are not required to receive the Master of Accountancy degree will not be included in the cumulative average grade required for graduation.

College of Education

Office of the Dean
206 Ralph Abernathy Hall
Doris P. Screws, Dean

The College of Education (COE) seeks to prepare teachers, instructional support personnel and other professionals to be decision makers who are equipped with the knowledge, skills and dispositions necessary to ethically and effectively integrate theory and practice in carrying out their professions. These professionals will possess the understanding of our diverse culture, the technological capabilities, the intellectual rigor and the critical thinking and problem-solving skills required to make informed and responsible decisions, to engage in reflective assessment, to implement positive change and to pursue learning as a lifetime endeavor. As an integral part of the total University, the COE is committed to serving the communities in Alabama through its educational programs and related activities. As it works to carry out its mission, the COE is careful to ensure that initial and advanced programs for the preparation of teachers and other professional education personnel are aligned with the expectations of national, state, professional and institutional standards. A non-certifiable M.S. degree is also offered for those persons desiring instruction in the area of general counseling.

Although graduate students are bound to the catalog under which they enter the University, Alabama State University can only confer the degree. The Alabama State Department of Education awards certificates; therefore, the student must also satisfy the requirements in the appropriate teacher certification and education chapters of the administrative code.

Major Elective Courses: (6 semester hours)
Choose two:
ACT 512 Advanced Financial Reporting ............. 3
ACT 518 Advanced Accounting Theory ............. 3
ACT 530 International Accounting and Business ..... 3

Non-Accounting Required Courses: (6 semester hours)

MGT 556 Business Law/Law for CPAs:
Uniform Commercial Code .................................. 3

Non-Accounting Elective Courses: (3 hours required)
MGT 550 Advanced Management of Strategic
Diversity .......................................................... 3
ECO 558 Economics of the Firm and its
Environment ...................................................... 3
MGT 559 Managerial Communication ................. 3

Total Hours: 30

Degree

Required Admission Test
M.Ed. (traditional program) GRE General or MAT
M.Ed. (alternative program) GRE General or MAT
M.S. GRE General or MAT
Ed.S. GRE General or MAT

(years not previously taken)

AA Certificate Same as Ed.S.
Ed.D. GRE General or MAT
Ph.D. GRE General or MAT

In addition to being formally admitted to The Murphy Graduate School, all applicants to traditional teacher education or instructional leadership programs (M.Ed., AA, Ed.S.) must provide the following information to the Dean of the Harold Lloyd Murphy Graduate School:

1. A copy of the applicant’s valid teaching certificate (B for master’s, A for AA) with proper endorsement;
2. An evaluation of teaching effectiveness; and
3. Verification of experience (using SDE Form EXP).

NOTE: The State Department of Education requires that individuals enrolled in graduate education programs have a minimum number of years of teaching or successful professional experience:

- Reading Specialist: Two full years of successful classroom teaching experience prior to admission.
- Library Media Specialist: Two years of teaching experience prior to applying for certification
- School Counseling: Passing the AECTP, Praxis II Professional School Counselor and the National Counseling Licensure examination prior to applying for certification.
- Instructional Leadership: a minimum of three full years of full-time, acceptable professional educational experience in a P-12 setting, which must include at least one full year of full-time P-12 teaching experience.

Traditional Teacher Education Programs

These programs are restricted to persons already certified at the Class B or Class A levels. These programs lead to Master (Class A) or Educational Specialist (Class AA) degree(s) and certification. A valid Class B or A teaching certificate must be submitted before enrollment in more than 9 hours or one semester.

Alternative Teacher Education Programs

Alternative Fifth-Year Programs (ALT-A) leading to the Master of Education (M.Ed.) degree and certification at the A level are designed for those who did not complete a teacher education program at the undergraduate level. Students must be admitted to the teacher education program by meeting the following criteria:

- A baccalaureate degree from a regionally accredited institution.
- All official transcripts showing all courses attempted.
A minimum overall grade point average of 2.5 (on a 4.0 scale) from the regionally accredited degree-granting institution. Please consult an academic advisor in the major area for more specific requirements relevant to each program.

In addition to these general requirements, a student must submit:

- Graduate Record Examination (GRE General Test) or Miller Analogies Test (MAT) scores before or during the first term of enrollment.
- Students must pass all undergraduate prerequisite course work prior to unconditional admission.
- ALT-A programs require either a pure academic major, 32/19 for all secondary majors and 4x12 for collaborative teaching, early childhood education and elementary education, or passing scores on the appropriate Praxis II examinations for unconditional admission.

Most ALT-A programs require a minimum of 39 semester hours of graduate coursework; however, the amount of extra course work will depend upon one’s undergraduate major, desired grade level (P3, K-6, 6-12, P-12), area of certification (single teaching field or comprehensive teaching fields), etc. as determined by an adviser’s evaluation of an applicant’s transcript(s). Elementary Education ALT-A requires 12 hours of English, sciences, social studies, and math if the required passing score for the Praxis II examinations has not been met.

ASU offers the alternative master’s degree in the following areas:

**Early Childhood Education**
- Elementary Education
- Secondary Education
- Biology
- English/Language Arts
- Health
- History
- Mathematics
- Social Studies
- Physical Education (P-12)
- Music Education (P-12)

**Special Education (Collaborative Teacher K-6 or 6-12)**

Completion of the program requires satisfactory performance on a written comprehensive examination and an overall grade point average of 3.0 on a 4.0 scale.

**Applied Technology**

**Master of Science (M.S.) Degree**

*This program is taught both online and face to face.*

**Core Courses (24 semester hours)**

- APT 501 Instructional Design System ............ 3
- APT 503 Graphic Design Principles ............ 3
- APT 504 Production of Digital Media .......... 3
- APT 505 Organization and Administration of Information Technology ............ 3
- APT 508 Networking Administration and Maintenance .......................... 3
- APT 509 Management Information System ........ 3
- APT 510 Legal Issues in Applied Technology .... 3
- APT 592 Research and Development in Applied Technology .......................... 3

Candidates must select either the General Track below:

**General Track**

- APT 502 Distance Technologies ............ 3
- APT 507 Assistive Technology ............ 3
- APT 591 Practicum in Applied Technology .... 3

Survey of Special Education (0-3 semester hours – required if not previously completed)
The applicant for the Master of Education degree in Instructional Leadership must hold a bachelor’s degree from an accredited institution. All admission requirements for graduate programs in education be met prior to registration for courses. Application forms should be completed and returned to The Murphy Graduate School. Full admission status should be granted to persons who meet all applicable admission requirements prior to enrollment.

Admissions Requirements

Admission to the Master’s degree in Instructional Leadership program requires that the applicant:

1. Possess a Class B Teaching certificate required.
2. Take and obtain satisfactory scores on specified national tests (GRE or MAT)
3. Submit three letters of recommendation from persons who are qualified to evaluate and applicant’s ability to do graduate-level work
4. Must have a minimum GPA of 2.5
5. Have a minimum of three (3) years of successful teaching experience. Experience form required.
6. Submit an admission portfolio before an interview. The portfolio will contain the following:
   - Two letters of recommendation to include one from the applicant’s principal or supervisor
   - Completed copy (all forms) of the most recent performance appraisal to include the professional development component, if available
Evidence of ability to improve student achievement

Evidence of leadership and management potential, including evidence of most recent accomplishments in the area of instructional leadership

Summary of candidate’s reasons for pursuing instructional leadership certification

Summary of the candidate’s expectations of the leadership preparation program

7. Pass an interview conducted by a program admission committee that includes both P-12 instructional leaders and higher education faculty.

Course Requirements
The Master of Education degree program in Instructional Leadership includes 30-33 credit hours. Candidates will complete 24 credit hours of core courses, including technology and internship. Electives include 3 credit hours of special education (if not previously completed) and 6 credit hours of foundations of Education or other advisor approved courses. Course requirements are listed below:

**Instructional Leadership Courses-ILP**
ILP 510 Foundations of Instructional Leadership……3
ILP 520 Instructional Leadership and Supervision……3
ILP 570 Ethics and Legal Bases in American Education…3
ILP 572 Fiscal and Human Resource Management……3
ILP 574 Instructional Technology for School Leaders……3
ILP 595 Internship in Instructional Leadership I…..3
ILP 596 Internship in Instructional Leadership II……3
ILP 597 Internship in Instructional Leadership III…..3

**Survey of Special Education Coursework**
*SED 500 Exceptional Studies in Inclusive Schools……3
* If not previously taken and passed.

**Additional Courses Required For the Degree:**
Advisor approves electives appropriate for Instructional Leadership Courses are 3 credit hours each

Prior to being admitted into internship courses students must achieve a passing score on the Praxis II (0411 Leadership and Supervision) and have the score forwarded to Alabama State University.

It is mandatory for students to take and pass ILP 510, ILP 520, ILP 570, ILP 572 and attend an ILP faculty sponsored Praxis II workshop prior to attempting the examination.

The ten consecutive day residency portion of ILP 595 cannot be performed simultaneously with duties of employment.

Total Hours 43-46

The Department of Music, which is an accredited institutional member of the National Association of Schools of Music, provides programs in conjunction with the College of Education, leading to the Master of Education degree. The Master of Education in Music Education program provides training for Class A certification, Nursery-12th grades, in instrumental music or in vocal/choral music for teaching in public systems.

Admission to graduate study is first secured through The Murphy Graduate School. Students applying for admission must present the following:

1. A bachelor’s degree from an accredited institution with a major in music or in music education;
2. A grade point average of 2.5 on a 4.0 scale;
3. An acceptable GRE or MAT score presented upon admission, or during the first semester of residence;
4. M.Ed. students see requirements for admission to a teacher education program; and
5. Three letters of reference.

For graduate study in the Department of Music, further requirements specified by the Department of Music Graduate Faculty must be completed. These include:

1. An evaluative interview and audition with the graduate faculty of the Department of Music.
2. Completion of minimum requirements as established by an initial advisory examination in general music knowledge, music history, music education and music theory.

Evaluative Interview

Applicants will be asked to have an evaluative interview and diagnostic written examination in music content knowledge as part of the application process. The student should personally contact the Department of Music office to make arrangements for an evaluative interview with the Graduate Coordinator of the department. This interview will provide an opportunity for the student to express educational goals, interests or concerns and gain a solid understanding of his or her degree requirements. Additionally, the written advisory examination, which is diagnostic in purpose, will be scheduled. Questions concerning this examination may be asked during the interview.

Advisory Examination

The written advisory examination is administered during the evaluative interview. Applicants should be prepared to demonstrate knowledge of basic concepts of general music knowledge, music history, music education and music theory. The purpose of the examination is to assist in planning a course of study consistent with degree requirements and the student’s assessed needs and expressed interests. If serious deficiencies are discovered, applicants will be required to complete a written examination in order to devise a plan of remediation. This plan may include additional and/or remedial coursework. Unconditional acceptance in the program will be granted only after such remediation is completed.

Basic Exit Criteria For Advanced Degrees

Before a master’s candidate can be said to have fulfilled all degree requirements, the candidate must pass a comprehensive examination in music education and professional education.

Master of Education in Music (M.Ed.) Vocal/Choral Emphasis or Instrumental Emphasis

The Master of Education in Music Education curriculum is designed to satisfy the certification requirements for the state of Alabama’s Class A teaching certificate as well as enhance the professional qualifications of those who have the Alabama Class B teaching certificate or its equivalent. Highly specialized, the Master of Education in Music Education curriculum involves three basic program components: professional education courses, music courses and support courses required for certification. The following credit hours are required in each component:

| Professional Education | 18+ Semester Hours |
| Teaching Field: Music | 18 Semester Hours |

Credit Hrs.

EDU 591 Practicum in Education ........... 3

**Teaching Field (18 semester hours)**
Total Hours 36+
Must include at least 18 semester hours in each teaching field at the fifth-year level.
For students who have not previously satisfied the special education requirement, a general survey course in special education (three semester hours) is required. Foundation and Professional Studies will be increased to nine semester hours for students completing the special education requirement. Electives may be reduced to three semester hours for students completing the special education requirement.

**ALTA Master Of Music Education**

**Alternative Class A Program**
The Alabama State Department of Education has approved an ALTA Class A program for graduate students who present baccalaureate credentials from a degree in music other than the Bachelor of Music Education. Completion of this program, in instrumental music or in vocal/choral music, warrants the Master of Education in Music Education degree and state certification (Class A) for N-12 (Nursery through 12th Grade). In addition to the courses listed below, students may be required to complete additional undergraduate courses in music education.

Reading Specialist

A Master of Education (M.Ed.) Degree

To be eligible for admission, applicants must be certified teachers in any teaching fields, with a minimum of two years of successful teaching experience. A comprehensive examination is required. Since this degree is considered by Alabama State Department of Education to be an initial certification program, Praxis II is also required.

Instructional Leadership (AA)

The Educational Specialist in Instructional Leadership at Alabama State University builds on the knowledge and abilities developed at the Class A (Master’s degree) level. Candidates will use their skills to create and practice successful instructional leadership. Program emphasis will be placed on the development of shared leadership practices with stakeholders in improving student achievement, especially parents and teachers. Any questions regarding the Instructional Leadership Program should be directed to the Chairperson of Instructional Support Programs (334) 229-6829.

Application forms can be downloaded online and should be completed and returned to The Murphy Graduate School. Prior to an applicant being fully admitted to the program, he or she must complete a portfolio and an interview.

Admission to the Instructional Leadership Program

Admissions Requirements

The Alabama State Department of Education requires that candidates for advanced certification for Instructional Leadership shall be at the Class AA level and shall minimally ensure the following:

(a) All candidates must undergo a criminal history background check. Additional information is provided in Rule 290-3-3-.02(5).

(b) All candidates must hold a Class A Professional Educator Certificate in Instructional Leadership or one of the other Class A leadership certificate designations [instructional leader, principal, superintendent, superintendent-principal, educational administrator, supervisor (any subject and/or grade level), administrator of career and technical education].

(c) Candidates must meet one of the following criteria:

1. Possess a Class A Instructional Leadership certificate earned after completing a redesigned program at a university in Alabama;

2. Be currently serving as a superintendent, assistant or associate superintendent, assistant to the superintendent, principal, assistant principal, supervisor (any subject and/or grade level), administrator of career and technical education, coordinator, or evaluator; and

3. Document three years of employment in an instructional leadership position for which one of the certificates in Rule 290-3-3-.53.01(2)(b) is proper certification according to the current edition of the Subject and Personnel Codes of the Alabama State Department of Education.

(d) Applicants who completed a Class A program other than one approved by the State Board of Education on or after September 8, 2005, must submit a portfolio which includes:

1. Three letters of recommendation;
2. Most recent performance appraisals;
3. Evidence of ability to lead student achievement;
4. Evidence of leadership and management potential; and
5. Reasons for pursuing the Class AA certificate in instructional leadership.

As with the Master of Education in Instructional Leadership, applicants will be interviewed prior to admissions. ILP faculty and LEAs will be involved in the process of determining which applicants should be interviewed and admitted based on the interview process itself.

Program Requirements

The Educational Specialist Program in Instructional Leadership includes 30-33 credit hours with no fewer than 30 of the semester hours of course work being at the sixth-year level or above. Candidates will complete 21 credit hours of core courses, including technology, 6 credit hours of problem analysis, and a three-credit hour advisor elective. If candidates have not successfully taken a Survey of Special Education course, they will need to take SED 500 – the Exceptional Student.

Teacher Leader Program

(Educational Specialist (Ed.S.) Degree 30 semester
hours)

The AA in Teacher Leadership program creates teachers
who will become change agents who positively affect their
classrooms, schools, communities, and school districts as
well as the national conversation about educational change.
Specifically, the program is for teachers who will remain in
their classrooms while assuming leadership roles in the
schools and in the larger context of the school community.
The program is developed around a set of academic and
field experiences that provide knowledge and skills for
leadership in collaboration, writing for change, reflective
thinking, problem solving, and the advocacy of excellence
in education.

Doctoral Programs
in Educational Leadership, Policy and
Law (Ed.D., Ph.D.)

The College of Education offers a research-oriented Doctorate
of Philosophy (Ph.D) and an Education Doctorate (Ed.D.) in
Educational Leadership, Policy and Law.

The Ed.D. program is a 69-hour post-master’s program
designed for individuals who will be engaged in upper-level
leadership positions in a educational organization.
Individuals interested in this program should have at least a
3.5 graduate grade point average and hold an earned master’s
degree. Program admissions occur in late March and a cohort
of students begin each year in the Fall Term. Courses are
sequential and may be enrolled in only after admission to the
program. Contact either the Office of the Graduate Dean or
the Doctoral Program Coordinator for further requirements
and general information.

69 semester hours

The Ph.D is a 78 semester hour program that focuses on preparing adult students to engage in research that addresses issues that occur across the educational spectrum. The focus is on P-12, higher education, and educationally related organizations where practice serves as a research base from which new understandings and theory are developed and established within the educational knowledge base. The program is a separate / independent degree track from the Ed.D program. Contact either the Office of the Graduate Dean or the Doctoral Program Coordinator for further requirements and general information.

The mission of the College of Health Sciences is to graduate reflective practitioners with unique skills in providing for the different needs of clients in Montgomery, throughout the state of Alabama, and nationally, with a special emphasis on underrepresented and underserved communities. Each prospective student must meet the entrance requirement for the individual program of study, in addition to the The Murphy Graduate School requirements, for admission. Each professional program has a rigorous curriculum and is fully accredited by the discipline specific accreditation agency. The college offers programs leading to: Master of Science in Occupational Therapy, Master of Science in Prosthetics and Orthotics, Master of Rehabilitation Counseling, and Doctor of Physical Therapy degrees. The college also offers the Graduate Certificate in Rehabilitation Counseling and the Graduate Certificate in Disability Studies, Policy and Services. Courses with the designation HSC are interprofessional courses and may include students from more than one discipline.

Clinical Doctor of Physical Therapy
John L. Buskey Health Sciences Center
Suite 108
(334) 229-4709 (voice)
(334) 229-4945 (fax)

Physical therapists (PTs) are health care professionals who diagnose and treat individuals of all ages, from newborns to the very oldest, who have medical problems or other health-related conditions that limit their abilities to move and perform functional activities in their daily lives.

PTs examine each individual and develop a plan using treatment techniques to promote the ability to move, reduce pain, restore function and prevent disability. In addition, PTs work with individuals to prevent the loss of mobility before it occurs by developing fitness- and wellness-oriented programs for healthier and more active lifestyles.

PTs provide care for people in a variety of settings, including hospitals, private practices, outpatient clinics, home health agencies, schools, sports and fitness facilities, work settings and nursing homes. State licensure is required in each
state in which a physical therapist practices.

**Accreditation**

The Physical Therapy Program is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE) through 2018. Current and prospective students may file a complaint with CAPTE in writing: 1111 N. Fairfax St. Alexandria, VA 22314, by phone: 1-800-999-2787, or by email: accreditation@apta.org.

**Mission and Philosophy**

In accordance with the mission and role of the University, the mission of the Physical Therapy Program is to graduate reflective practitioners who are skilled in providing for the needs of underserved and underrepresented clients in the Montgomery community, throughout the state of Alabama and nationally. The University will recruit, admit, retain and graduate students dedicated to attaining the knowledge and skills needed to deliver this mission.

The philosophy of the Alabama State University graduate program in physical therapy is based on the belief that concepts from the physical, biological and social sciences serve as the scientific foundation for physical therapy education and practice. Therefore, the elements of prevention, examination, evaluation and intervention are based on the application of these concepts for a better understanding of patients’ physical, psychological and social conditions; thereby enhancing overall physical therapy management. Furthermore, we believe that individual and cultural differences have a significant impact on health, illness, disability and recovery. Consequently, the program attempts to address these issues throughout the didactic and clinical curricula for meaningful patient outcomes.

We believe that learning is an interactive process that is most effective when the following conditions are in place:

1. Objectives are clear, attainable and meaningful to the learner;
2. A variety of learning experiences are planned for the attainment of objectives, and so arranged that they provide continuity, reinforcement and association, building on prior knowledge and experiences;
3. The learner is provided opportunities to utilize critical thinking in applying knowledge, concepts and principles in a variety of situations;
4. Individual variables and environmental factors are considered in meeting the needs of the learner; and
5. Measurable outcomes are produced.

We believe that in this physical therapy program, students function best in a supportive and nurturing environment. We offer advising and mentoring to ensure that students have opportunities to express their needs and to obtain the tools to self-assess for lifelong learning.

We believe that our program should prepare students to function in specific ways. The program, through its curriculum, including evidence for current practice, through an appropriate learning environment, and through modeling professional behavior reflects our attempt to produce students who can function competently, compassionately and autonomously. The program is charged with producing entry-level, professional general practitioners, capable of serving the community. We believe that the program provides the graduates with the potential to respond effectively to the ever-changing demands of the profession and healthcare environment.

Recognizing the expanding role of the physical therapist, the increasing complexity of healthcare delivery and the ever-changing health needs of society, the goals of the physical therapy program at Alabama State University prepares graduates to:

- Recognize the influence of social, economic, legislative and demographic factors on the delivery of healthcare;
- Communicate with diverse audiences demonstrating sensitivity and awareness of individual differences such as age, race, gender and socioeconomic background;
- Practice in an ethical, legal, safe, caring and effective manner;
- Screen individuals to determine the need for physical therapy examination or referral to other health professionals;
- Examine and evaluate a patient/client in order to make an appropriate physical therapy diagnosis or referral;
- Design and manage a comprehensive physical therapy plan of care; and
- Serve as advocates for health promotion and disease prevention.

**Prerequisite Courses (entry-level DPT degree program)**

In addition to satisfying the general admission requirements of The Harold Lloyd Murphy Graduate School at Alabama State University, the following special requirements must be satisfied by students seeking admission to the physical therapy program:

1. Completion of a baccalaureate degree from an accredited educational institution with a minimum cumulative GPA of
3.0 on a 4.0 scale;
2. Completed application package for the physical therapy program. (www.PTCAS.org)

3. Completion of required prerequisite courses with a “C” or above. Grade of “B” is recommended.

Curriculum
Each student enrolled in the physical therapy program is expected to complete the 114 hours of professional courses, including four full-time clinical internships. Students become eligible for the National Physical Therapy Examination after graduation from an accredited physical therapy program. The curriculum is subject to change pending approval by the University.

Required Professional Curriculum:
114 semester hours (designed to be completed within 3 years)

Transitional Doctor of Physical Therapy (tDPT) Track

Purpose

The tDPT is a structured post professional educational experience that results in the augmentation of knowledge, skills and behaviors to a level consistent with the current professional DPT by “filling in” any gaps between professional baccalaureate or master’s degree PT education and the current professional DPT degree education. It provides degree parity.

The transitional DPT post professional physical therapist education program is one that: 1) allows the U.S. licensed physical therapist to obtain the clinical doctorate by demonstrating knowledge commensurate with that of current professional (entry-level) DPT program outcomes and 2) takes into account a learner/applicant’s knowledge and experience.

The curriculum designed for the tDPT track consists of 10 courses which encompass the depth and scope of the established national competencies. Courses are to be offered primarily online with a mandatory on-site component for the terminal coursework.

Admission Criteria

1. The portfolio evaluation is the method used for admission to the tDPT track; and
2. Completed graduate school application.

Note: Course selection for completion of the tDPT track is contingent upon portfolio analysis (i.e. transcript credit, national board certification, mandatory re-licensure, continuing education coursework, etc.).

Master of Science in Occupational Therapy Degree

John L. Buskey Health Sciences Center
Suite 211
(334) 229-5056 (voice)
(334) 229-5882 (fax)
www.alasu.edu (web address)

Mission

The mission of the Occupational Therapy Program at Alabama State University is to serve the city of Montgomery, the state, the nation and global community. The program is also designed for those students whose interests and aptitude carry them beyond routine classroom experiences. The curriculum, through a logical and developmental sequence of learning and service, creates an environment that will prepare and graduate proficient entry-level therapists who demonstrate competency in evidenced-based clinical practice in the profession of occupational therapy. Additionally, the curriculum:

1. Prepares students to work with diverse populations in varied settings;
2. Promotes critical thinking, ethical decision-
making skills, and clinical reasoning to further knowledge of occupation and efficacy of practice and research;

3. Develops professionals who are able to communicate, understand and apply the science of occupation and who are dedicated to a lifelong learning process;

4. Involves faculty and students in public service programs by providing them with research based guidance on policy and program approaches and initiatives for addressing community problems.

5. Strives to improve the underrepresented minorities in the field of occupational therapy;

6. Fosters an environment that supports experiential and self-directed learning and promotes personal and professional development for eligible students, regardless of socioeconomic status; and

7. Emphasizes the role of purposeful activity and occupation and adaptation in development throughout the lifespan.

Accreditation
The Occupational Therapy Program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814-3449, (www.acoteonline.org). AOTA’s phone number is (301) 652-AOTA. Program graduates sit for the National Certification Examination for the Occupational Therapist administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR). Most states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination.

Early Determination Reviews for Students with a Criminal History

Early determination reviews are offered to individuals who are considering entering an occupational therapy educational program or who have already entered an occupational therapy educational program and wish to have his or her criminal background reviewed prior to applying for the National Board for Certification in Occupational Therapy Certification Examination. Note that a felony conviction may affect a graduate’s ability to sit for the NBCOT certification examination or attain state licensure. For further information, please contact the Occupational Therapy Chair at (334) 229-5056 and the National Board for Certification in Occupational Therapy, Inc. at 12 S. Summit Avenue, Suite 100, Gaithersburg, MD, 20877-4150. (301) 990-7979 (voice); (301) 869-8492 (fax); www.nbcol.org. (web address)

Program Goals

Graduates of Alabama State University Occupational Therapy Program will:

1. Expand scholastic skills for personal, occupational, and professional growth.

2. Develop a dedication to life-long learning and commitment to public/community service.

3. Demonstrate professional behaviors that are congruent with the core values and code of ethics and standards of the occupational therapy profession.

4. Utilize the occupational therapy practice framework as a guide for decision making regarding patient care and outcomes.

5. Use evidence based practice as a means to identify and guide best occupational therapy practice.

6. Examine the impact of physical, social, temporal, cognitive, psychological, spiritual, environmental, and cultural contexts that impact occupational performance.

7. Evaluate and develop goals and intervention plans in conjunction with the client, their support system, and other healthcare team members to provide a comprehensive, holistic and client-centered approach to care.

8. Understand the importance of advocacy and promotion of the occupational therapy profession, as well as the role of other health professionals and the importance of the interprofessional team.

9. Participate as consumers and producers of research.

10. Be competent as an entry level therapist with the ability to work in a diverse healthcare delivery system and appreciate the different roles of occupational therapists working in varying healthcare systems.

11. Be competent in communication skills, leadership, and critical thinking.

12. In some instances, represent the pool of underrepresented minorities in the field of occupational therapy.

These educational goals are dynamic and interdependent of each other. Throughout the educational process, the program strives to provide a firm support system, nourish students as a whole person and draw upon and strengthen their cultural and academic roots so that they may be transplanted to any environment and adapt to varied applications of occupational therapy practice.

Admission Requirements
• Bachelor's degree (minimum 2.7 undergraduate grade point average [GPA] with official transcripts)
• MAT or GRE score transcripts
• ASU OT Program prerequisite courses - grade of "B" or better recommended in each
• Three letters of recommendation, one from an occupational therapist
• Early Determination (a felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure) document. This will be completed at the time of the Onsite Interview.
• Observation/Volunteer Hours (minimum of 40 hours in 2 facilities/settings, dated/completed within 12 months of submission). These hours must be complete at the time of application.

Onsite Interview: Candidates selected for the required Onsite Interview will be notified in Early March. The required Onsite Interview will be scheduled for Late March or Early April.

The Alabama State University Department of Occupational Therapy subscribes to the Occupational Therapy Centralized Application Service (OTCAS). To get started, visit the OTCAS portal at https://portal.otcas.org/. Directions for document submission appear on the OTCAS website. The supplemental application materials are available on the ASU OT homepage.

Master of Science Degree in Prosthetics and Orthotics (P&O)

Prosthetics and Orthotics
Prosthetists and orthotists are specialized healthcare professionals who develop unique skills both clinically and technically. The prosthetist and orthotist begin the process with the evaluation of the patient, followed by fabrication, and then fitting of the artificial limbs (prosthetics) and orthopedic braces (orthotics).

Accreditation
The Prosthetics and Orthotics Program is accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org) upon the recommendation of the National Commission on Orthotic and Prosthetic Education (NCOPE). CAAHEP staff can be reached at 1361 Park Street, Clearwater, FL 33756; (727) 210-2350; www.caahep.org.

Mission
The mission of the prosthetics and orthotics program coincides with the College of Health Sciences’ mission to graduate reflective practitioners with unique skills in providing for the different needs of underserved and nontraditional clients in the Montgomery community, throughout the state of Alabama and nationally. The University will recruit, admit, retain and graduate students dedicated to attaining the knowledge and skills needed to deliver this mission.

The mission of the prosthetics and orthotics program is to prepare and foster prosthetic and orthotic practitioners who possess the knowledge, skills, attitudes, compassion, and cultural competence needed to provide prosthetic and orthotic services to both the traditional and underserved communities in the city of Montgomery, the state and nation, while increasing the community’s awareness of prosthetics and orthotics.

Program Goals and Objectives
The specific aims of the proposed Masters of Science in Prosthetics and Orthotics program are to:

- Prepare prosthetics and orthotics practitioners who possess the knowledge, skills, and attitudes needed to provide services to both the traditional and underserved communities;
- Produce prosthetics and orthotics practitioners who will join the workforce of certified prosthetists, orthotists and pedorthists in Alabama, the Southeastern United States and beyond;
- Facilitate the American Board for Certification in Orthotics and Prosthetics goal to increase the number of entry level practitioners with master’s degrees; and
- To improve prosthetics and orthotic care in the treatment of persons with neuromuscular and musculoskeletal impairments.

Graduates of Alabama State University’s graduate program in prosthetics and orthotics will:

- Become certified prosthetists-orthotists;
- Apply effective clinical decision making and problem solving skills;
- Demonstrate the integration of knowledge, theory and application of the clinical and technical aspects of the prosthetics and orthotics disciplines;
- Exemplify the role of the prosthetist-orthotist in providing ethical, patient-centered care experiences that are congruent with the core values and code of ethics and standards of the American Board for Certification in Orthotics and Prosthetics (ABC) Code of Professional Responsibilities in clinical practice;
- Comprehend and demonstrate knowledge of the collaborative role of the prosthetist-orthotist as a member of the interdisciplinary rehabilitation team in providing patient-centered care;
- Demonstrate an awareness and respect for all patients and related individuals within a diverse and multicultural society;
- Demonstrate the ability to participate as a critical consumer of research and to integrate research findings as evidence in clinical practice; and
- Demonstrate an appreciation for the value of lifelong learning and a commitment to public/community service.

Admission Requirements
In addition to satisfying the general admission requirements of The Harold Lloyd Murphy Graduate School at Alabama State University, the following special requirements must be satisfied by students seeking admission to the Prosthetic and Orthotic Program:

1. Bachelor’s degree from an accredited institution with a cumulative GPA of 2.9 or higher on a 4.0 scale;

2. Completed application package for the prosthetic and orthotic program via OPCAS at http://www.ncope.org/opcas/;

3. Completion of the required prerequisite courses with a “C” or above; a grade of “B” or above is recommended for the sciences;

4. A minimum of 100 hours of volunteer or paid service in orthotics and/or prosthetics under the supervision of a certified/licensed prosthetist-orthotist at a hospital, nursing home, rehabilitation center, outpatient clinic or community center. Two different settings are recommended.

5. Three recommendations are required: one from a Prosthetist-Orthotist documenting the applicant’s exposure to a prosthetics and orthotics in a clinical setting and one from an instructor, academic advisor or recent employer who can evaluate the applicant’s academic abilities and character.

6. A written personal statement demonstrating the student’s ability to communicate clearly his/her interest in pursuing the Master of Science in Prosthetics and Orthotics.

7. Graduate Record Exam (GRE) or MAT scores. A passing score on the Test of English as a Foreign Language (TOEFL), the Test of Written English (TWE) and the Test of Spoken English (TSE) for International Students. All exams results should be received by the application deadline.

8. A completed application to The Murphy Graduate School.

Master of Rehabilitation Counseling
Mission
The mission of the Master of Rehabilitation Counseling (MRC) Program is to prepare admitted students to become professional rehabilitation counselors who work in partnership with people with disabilities.

The primary ongoing goals of the MRC Program include:
1. Developing and maintaining an educational curriculum focused on effective student learning and development in rehabilitation counseling;
2. Preparing students to become professionals who are committed to effectively partnering with people with disabilities in achieving their maximum vocational, psychological, social, and economic independence; and
3. Creating a multicultural learning environment that embraces empowering students to become professionals who facilitate empowerment for their clients and community.

Objectives
1. Expand scholastic skills for personal, occupational and professional growth;
2. Develop a dedication to life-long learning and commitment to public/community service;
3. Demonstrate professional behaviors that are congruent with the core values and code of ethics and standards of the rehabilitation counseling profession;
4. Develop and document a plan of care for a consumer who requires counseling interventions that are appropriate to the consumer’s status and desired goals;
5. Demonstrate management skills, including planning, organizing, supervising, delegating and practicing as a member of a multi-disciplinary team;
6. Practice in a professional, ethical, and legal manner;
7. Safely, reliably, effectively and efficiently perform appropriate rehabilitation counseling procedures used to assess, evaluate and coordinate vocational services for individuals with disabilities;
8. Utilize appropriate verbal, nonverbal and written communication with consumers, families and other healthcare providers.
9. Serve as an advocate for the rehabilitation counseling;
10. Participate as consumers of evidence based research; and
11. Acquire competence in communication skills, leadership and critical thinking.

Admission Requirements
1. Bachelor’s degree from an accredited institution with a cumulative GPA of 2.5 or higher on a 4.0 scale (GPA) requirement for scholarships may be higher than admission requirements);
2. Recent Graduate Record Exam (GRE) or Miller Analogies Test (MAT) scores submitted to The Murphy Graduate School with completed application;
3. Two letters of recommendation from persons qualified to evaluate an applicant’s academic abilities and/or Character;
4. A completed application to The Murphy Graduate School;
5. A completed application to the Master of Rehabilitation Counseling Program;
6. Written personal statement demonstrating the student’s ability to communicate clearly their interest in pursuing the Master of Rehabilitation Counseling; and
7. Participation in a department interview.

Graduate Certificate in Rehabilitation Counseling

The goal of the 21-credit hour certificate is to target employed/experienced vocational rehabilitation counselors and other closely related counseling professionals for the purpose of completing required core rehabilitation counseling courses to become eligible to take the national certification (CRC) examination.

The curriculum has three core domains:
- Counseling
- Vocational Rehabilitation
- Research

Employment Opportunities
Employment opportunities for persons with this Certificate include State/Federal Vocational Rehabilitation programs, Department of Veterans Affairs, Disability Service Provider in Higher Education.

Admission Requirements
- A qualifying Master’s degree from an accredited institution in either category D or category R as defined by Commission on Certified Rehabilitation Counselors (CRCC)
- A completed application to the Alabama State University (ASU) Murphy Graduate School
- Personal interview with an ASU Master of Rehabilitation Counseling program faculty member or a designated representative
- For candidates who will be seeking to sit for the Certified Rehabilitation Counselor Exam, please contact Commission on Rehabilitation Counselor Certification at www.crccertification.com

Transfer Credit
A minimum of 15 semester hours of the graduate certificate program must be completed at ASU. A maximum of 6 semester credit hours may be transferred from other accredited graduate programs.

Graduate Certificate in Disability Studies, Policy & Services

The goal of the 18-credit hour certificate is to provide matriculating and non-matriculating graduate students a comprehensive supplement to Bachelor’s or Master’s degrees previously granted, including those in disability-related fields e.g. Special Education, Rehabilitation Studies, or Social Work, as well as those that do not typically offer courses with disability-related content (e.g. Criminal Justice and Engineering).

The curriculum has four core domains:
- Disability Policy
- Administration
- Assistive Technology
- Accommodations

Employment Opportunities
Employment opportunities for students with this Certificate include Education Administrators, Disability Service Providers in Higher Education, Equal Opportunity Program Administrators, Veterans Program Administrators, Executive or manager of Community Disability Service...
Programs, Disability Rights Advocates, and Educational Consultants.

Admission Requirements

- A completed application to the Alabama State University (ASU) Murphy Graduate School and the Graduate Certificate Program in Disability Studies, Policy and Services
- Personal interview with an ASU Master of Rehabilitation Counseling program faculty member or a designated representative
- Applicants who are not currently enrolled in a graduate degree program at ASU must be admitted to the ASU Murphy Graduate School as non-degree students to take courses for the certificate program.

Transfer Credit

A minimum of 12 semester hours of the graduate certificate program shall be taken at ASU. A maximum of 6 semester credit hours shall be transferred from other accredited graduate programs.

Intended Students

The Certificate is open to graduate students in any discipline, as well as individuals who are post-baccalaureate or post-master’s who are not enrolled in a graduate program. Students who are not currently enrolled in a graduate degree program at ASU must be admitted to ASU Murphy Graduate School as non-degree students to take courses for the certificate program.

College of Liberal Arts and Social Sciences

Office of the Dean
110 Science Building
Anthony Troy Adams, Interim Dean

In the cooperation of the College of Liberal Arts and Social Sciences, we provide Graduate course work to support the Master of Education and AA certification in secondary education. These courses are offered by the departments languages and literatures, history and political science and sociology and criminal justice.

Social Work

Master of Social Work (MSW)

Alabama State University has a new Master of Social Work (MSW) degree program, approved recently by the Alabama Commission on Higher Education (ACHE), set to begin Fall 2015. Students admitted will have a choice of pursuing the degree via three different options, which includes: traditional (two-year, full time); advanced standing (12 months); and part-time (four-year).

The program will prepare students for advanced social work training/academic leadership in the areas of Forensics, Gerontology, Behavioral and Mental Health. The program is designed to attract highly motivated students who demonstrate a strong commitment to promoting social and economic justice. Students will learn to systematically apply social work knowledge and skills (theory, research methods, and best practices) to assist “at-risk” populations.

The Master of Social Work program has begun the two year process of accreditation by the Council on Social Work Education (CSWE). The program anticipates the accreditation to be final by 2016.

College of Science, Mathematics and Technology

Office of the Dean
110 Life Sciences Building
Kennedy S. Wekesa, Interim Dean

In cooperation with the College of Science, Mathematics and Technology, the following degrees are offered: Doctor of Philosophy in microbiology, Master of Science in biology, Master of Science in mathematics, and the Master of Science in forensic science. Graduate
coursework to support the Master of Education and AA certification in secondary education is also offered by the Departments of Biological Sciences and Mathematics and Computer Science.

Degree          Required Admission Test

Total Hours 35

In addition to satisfying the general admission requirements of The Harold Lloyd Murphy Graduate School at Alabama State University, all students admitted to the Master of Science in biology degree program are expected to have the bachelor’s degree in biology, chemistry or related field and a minimum, cumulative grade point average of 3.0 on a four-point scale. Prerequisite courses include general physics (eight semester hours); general chemistry (eight semester hours); organic chemistry (eight semester hours); and cell biology or biochemistry (four semester hours) Scores on the Graduate Record Examination revised General and Subject tests are required.

Conditional graduate status may be granted an applicant who has a cumulative grade point average of less than 3.0 but at least 2.5, and/or who has not more than 12 semester hours of undergraduate course deficiencies. Full graduate status may be attained by a conditional graduate student after the completion of 16 hours, provided the student receives a grade of at least B in all courses taken and he or she has removed all admission deficiencies.

Each student enrolling in this program is expected to complete 35 semester hours, which include the core requirement courses: BIO 500, Graduate Seminar in Biology; BIO 517, Cell and Molecular Biology; BIO 521, Biological Techniques and Instrumentation; BIO 619, Molecular Genetics, Biology 660, Research and Thesis. Other courses will be selected by the student in consultation with his or her thesis advisor. The thesis advisor and thesis advisory committee will be assigned by the department chair according to established departmental guidelines.

In addition to the completion and oral defense of the thesis, each student is required to perform satisfactorily on a written comprehensive examination and to demonstrate competent reading knowledge of a foreign language, preferably French or German. Upon recommendation of the department, a substitute language may be offered. Six semester hours of an acceptable foreign language in which a cumulative average of at least B is earned may be presented in lieu of the language examination.

Master of Science in biology students may elect to substitute in lieu of the foreign language six semester hours of acceptable computer language coursework in which a cumulative average of at least B is earned. Acceptable computer language courses will be determined by the chair of the department.

Forensic Science

Master of Science (M.S.) Degree

Total Credit Hours  37 - 53 Semester Credit Hours*  

* Students with earned M.S. degree in related field(s) are required to complete a minimum 37 semester credit hours of program coursework.  

The Ph.D. in microbiology curriculum consists of 37 semester hours of graduate coursework, excluding doctoral research credits. Additionally, students admitted to the Ph.D. program with the earned B.S. degree must complete the 16-hour core curriculum of the M.S. in biology program prior to completing the 37 semester-hour doctoral course curriculum. A twelve semester hour core curriculum consists of foundation content courses (microbial genetics and genomics, and microbial physiology and diversity), the foundation track course (environmental microbiology OR microbiology of food/water systems), and a doctoral skills course (scientific communication), through which students learn to develop a functional research proposal, leading ultimately to the formal dissertation proposal. Thirteen semester hours of major-related courses are required, including research skills courses (biostatistics) and a major support course (biochemistry), a predictive risk modeling skills course (microbial risk assessment and research laboratory rotation. Twelve semester hours of major elective courses are completed from a roster of specialty courses. Major electives are planned by the student and his or her advisory committee in a customized manner, based upon criteria such as the student's selected area of concentration, dissertation research and professional interests.  

Applicants with the earned B.S. degree will be required to complete a substantial 16 semester credit hour pre-curriculum [the 12 hour M.S. in biology core curriculum plus one additional four semester credit hour 500- or 600-level relevant science course, and other courses as recommended upon admission] that will ensure an appropriate and equitable level of didactic training that is comparable to the master's level of biological study. A minimum of 53 hours beyond the baccalaureate degree (16 M.S. semester credit hours and 37 doctoral-level course hours, excluding doctoral research), will be required for completion of the Ph.D. in microbiology at ASU.  

Mathematics

MAT 670 Mathematics Statistics I ........................3  
MAT 671 Mathematics Statistics II ........................3  

In addition to fulfilling the general requirements for a master’s degree at Alabama State University, the following special requirements must be satisfied by students who seek the Master of Science degree in mathematics:  
1. The student will be required to demonstrate competent reading knowledge of a foreign language, preferably French or German. Upon the recommendation of the department, a substitute language may be offered. The language examination shall be written and shall consist of the translation into English of selections from texts and articles related to the area of concentration. Passing of the examination shall be valid for a period not exceeding eight years;  
2. Six semester hours of an acceptable foreign language in which a cumulative average of at least B was earned may be presented in lieu of the language examination;  
3. A bachelor’s degree in mathematics or a related field; and  
4. Competitive scores on the general test of the Graduate Record Examination and advanced test in the area of mathematics are required. Additionally, a competitive
undergraduate GPA is required.

Candidates for the Master of Science degree in mathematics should present for admission (1) at least one year of calculus, and (2) at least 15 credits of acceptable junior and senior mathematics courses. Graduate students may enroll in undergraduate courses to remove any deficiencies, but they cannot receive graduate credit. All deficiencies must be removed before a student may be admitted to candidacy.

In addition to the completion and oral defense of the thesis, each candidate enrolling in this program is expected to complete 36 semester hours of mathematics at the 500 level or above, and the successful completion of a written comprehensive examination. Other courses will be selected by the student with the assistance of the supervisory committee.
VI. COURSES OF INSTRUCTION

Course abbreviations and numbering system

The following are the official course abbreviations used by The Murphy Graduate School at Alabama State University. Graduate courses are numbered 500-699 or 5000-6000. The numerical notations following the title of each course indicate the credit hour value of the course.

COLLEGE OF BUSINESS ADMINISTRATION

ACCOUNTING (ACT)

Ethics, computer applications, communication skills, other state-of-the-art technology, and interpersonal skills development will be incorporated in each course listed below. In addition, each course will require at least one term paper and a research project.

ACT 512. Advanced Financial Reporting (3). A study of public reporting for financial markets including equity investments and business combinations, preparation of consolidated financial statements, foreign currency translation and re-measurement, statements of financial affairs and receiversonships as a result of insolvency, and estates and trusts.

ACT 514. Advanced Auditing (3). A study of auditing theory and concepts with an integration of auditing methodology and practice; in addition, emphasis is given to the professional responsibilities of independent auditors in upholding the integrity of the financial reporting process.

ACT 515. Advanced Taxation (3). A study of selected topics in the Internal Revenue Code and Regulations with an emphasis on tax accounting and research. It will include partnerships, corporations, estate and gift taxes and an introduction to tax planning and current topics.

ACT 516. Advanced Accounting Information Systems (3). A study of concepts of accounting information systems and their design and operation, with an emphasis on enterprise-wide resource planning systems. This course involves significant hands-on-experience with SAP, MAS 90, Microsoft Access, Microsoft Project, and Microsoft Visio. Also covers current and emerging issues relating to accounting information systems.

ACT 518. Advanced Accounting Theory (3). A study of the historical perspective of the accounting profession and its evolving role in society; a comprehensive review of accounting theory as expressed in the pronouncements of the various rule making bodies; and current financial reporting issues under consideration by AcSec, FASB, GASB, SEC, etc.

ACT 526. Advanced Managerial/Cost Controllership (3). A study of the nature, objectives, and procedures of cost analysis and control; theories of cost allocation, absorption, and relevance; uses of accounting and other information in planning and controlling, and decision-making responsibilities; and current topics addressed in the financial press.

ACT 530. International Accounting (3). A study of information development and distribution for international companies. Topics and concepts such as foreign exchange translation, letters of credit, documentary credit/UPC 500, harmonization of reporting standards, terminology, cultural effects, political effects, ethical perceptions, and measurements and governmental/public policy, legal, social
responsibility, monetary systems, and Foreign Corrupt Practices Act are covered.

**ACT 532. Advanced Fund Accounting (3).** A study of accounting, reporting and auditing concepts, standards and practices for governmental and nonprofit organizations. This includes a review of the EDP environment, a review of managerial controls, and an analysis and preparation of financial statements and reports for governmental and nonprofit organizations and current topics under consideration by Congress, GASB, FASB, AICPA, etc.

**COMPUTER INFORMATION SYSTEM (CIS)**

**CIS 521. Advanced Database Management (3).** This is an introductory course on database management and its system implementation techniques. It covers the structure of database management systems, relational database theory, the Structural Query Language (SQL), and database system development and management. It will help students to develop an understanding of the role of data, file management and database systems in information system.

**CIS 22. Information Assurance and Cyber Security (3).** A study of the fundamentals of cyberspace and cyber security. Topics include architecture, cyber services, protocols, algorithms, hardware components software components, programming languages, various cyber security mechanisms, business continuity planning, security management practices, security architecture, operations security, physical security, cyber terrorism, and national security.

**CIS 523. Advanced Systems Analysis and Design Project (3).** A study of systems analysis and design concepts including distributed systems analysis and design. Quality assurance performance metrics, and current trends are investigated.

**ECONOMICS (ECO)**

**ECO 558. Economics of the Firm and its Environment (3).** A study of microeconomic theory that stresses its relevance and application to both managerial and public-policy decision making. This applied emphasis is accomplished by including extended examples that cover such topics as the analysis of demand, cost, and market efficiency, the design of pricing strategies, investment and production decisions, and public policy analysis.

**FINANCE (FIN)**

**FIN 519. Corporate Treasury Management (3).** The Corporate Treasury Management course is offered to help students get an early start on their careers. This is an advanced study of modern principles and techniques for corporate treasury management. Topics include liquidity analysis, short-term financial planning, financial risk management, evaluation of sources and uses of short-term funds, working capital management, corporate collection and disbursement systems, and other related topics. Students who have completed this course with a grade of "B" or higher are eligible to take the Certified Treasury Professional (CTP) examination to earn the Certified Treasury Professional Associate (CTPA) credential. Students with their CTPA credential are eligible to earn the CTP designation after two years of full-time finance-related work experience.

**MANAGEMENT (MGT)**

**MGT 550. Management of Strategic Diversity (3).** This course is an advanced study of the principles and conceptual approach to organizational diversity management. Students will discuss the business rationale for managing diversity, and will explain the implications of diversity to the marketplace, workplace, workforce and community. The student will create a strategic diversity management plan for an organization at the conclusion of the course.

**MGT 556. Business Law/Law for CPAs: Uniform Commercial Code (3).** A consideration of legislation and regulation of commercial activities, with an emphasis on the effects on public accounting of current and proposed legislation that will affect business.

**MGT 559. Managerial Communication (3).** A study of communication concepts and theories with emphasis on written and oral skills building. Students apply concepts and skills in a variety of communication contexts.

**COLLEGE OF EDUCATION**

**APPLIED TECHNOLOGY (APT)**

**APT 501 Instructional Design System (3).** Systematic procedures for designing, developing, evaluating and revising instruction to meet identified goals and objectives. Includes developing instructional materials for a defined context applying learner centered, systematic design philosophy.

**APT 502 Distance Technologies (3).** A focus on distance learning and telecommunications that includes the history, research, technology, uses, policy issues, and applications of distance learning within educational settings. Topics include Web applications (e-mail, instant messaging, electronic conferences, chatting, FTP, web page development, streaming video/audio), webcams, electronic slates, mobile devices and other emerging technologies.

**APT 503 Graphic Design Principles (3).** This course focuses upon graphic design principles as they apply to the development of instructional material for traditional and digital formats. The course integrates the use of graphic
programs, multimedia authoring, and Web design software. Students apply graphic design principles in developing a variety of multimedia instructional products.

**APT 504 Production of Education Digital Media (3).** Digital Media pertains to the convergence of communication technologies, the Internet and computer-based applications. Students enrolled in this course will acquire the specific skills essential to working in today's digital learning environment through the use of digital video, digital imaging, instructional integration, interactive educational media production, and other areas utilizing digital media technology. The course will culminate in the production of a digital portfolio.

**APT 505 Organization and Administration of Information Technology (3).** The process of managing IT in organizations is becoming more and more complex as it becomes more important. Information technology/information systems management encompasses all activities related to the planning, organizing, acquiring, maintaining, and controlling of IT resources. The course is aimed at explaining the concepts of information technology/information systems management. In addition to several aspects of managing IT, the course explains the utilization of IT in improving the process of decision making. It is appropriate for anyone who is using IT to improve organizational performances.

**APT 506 Database Management (3).** This is an introductory course on database management and its system implementation techniques. It covers the structure of database management systems, relational database theory, the Structural Query Language (SQL), and database system development and management. It will help students to develop an understanding of the role of data, file management and database systems in information systems.

**APT 507 Assistive Technology (3).** The course consists of in-depth study of the various technologies utilized in Applied Technology. Theories, goals, and intervention strategies for developing and implementing universal designed environments with assistive technology (AT) for persons with disabilities will be discussed throughout the semester.

**APT 508 Networking Administration and Maintenance (3).** This course examines the network and database administrator functions in an organization and focuses upon the concepts of network hardware systems that provide interconnection of communication devices and security.

**APT 509 Management Information Systems (3).** Study of the theoretical foundations of information systems and the development, management and application of Management Information Systems (MIS) for effective decision making. Topics include fundamental concepts of information systems; decision support systems and expert systems; information systems planning and implementation; and end-user computing. Students are also required to develop an MIS project using information system tools and languages.

**APT 590 Leadership in Applied Technology Seminar (3).** In accordance with the College of Education, this graduate course allows Applied Technology candidates with varying backgrounds and experiences to work independently and collaboratively towards entrepreneurial leadership for the use of current research to facilitate teaching, learning, and managing technology.

**APT 591 Practicum in Applied Technology (3).** Practicum in Applied Technology connects theoretical knowledge, practical applications and entrepreneurial leadership. Comprised of both practicum and seminar hours the course provides a supervised, hands-on experience with specific technologies and professionals in instructional leadership and administrative settings.

**Research and Development in Applied Technology (3)** Research & Development in Applied Technology is a culminating course that requires the graduate to integrate the skills and concepts learned throughout the Master of Science in Applied Technology program. It includes the production of a major project, scholarly paper, and presentation.

### COUNSELING (COU)

**COU 501. Introduction to Counseling (3).** This course is designed to acquaint the student with the historical development of counseling and the basic concepts, assumptions, purposes and scope of the profession. Foundations are provided for pursuing other courses in the area of the counseling program.

**COU 502. Theories in Counseling (3).** A survey of basic theories of counseling and their application to counseling in schools and other settings is provided. Techniques and strategies for implementing the theories are suggested. Counseling interviews are taught with the help of video feedback. (Prerequisite COU 501)

**COU 503. Career Development (3).** This course is designed to provide prospective counselors with knowledge of vocational development theories and skill in vocational counseling. Selecting, organizing, and utilizing occupational and educational information are stressed. (Prerequisite COU 501)

**COU 504. Theories in Counseling II (3).** A survey of basic theories of counseling and their application to counseling in schools and other settings is provided. Techniques and strategies for implementing the theories suggested. Counseling interviews are taught with the help of video feedback. (Prerequisite COU 502).

**COU 505. Pre-Practicum in Counseling.** Laboratory training in attending, listening, and influencing skills. Supervised experience in counseling. Prerequisites COU 501, 502, 509.
COU 506. Counseling Practicum (3). Supervised laboratory and field experiences for advanced majors. Emphasis placed upon the application of concepts, skills and principles learned in previous coursework. Enrollment with permission of instructor. Prerequisites: 21 semester hours including COU 501, 502, 505, 509, 523 (school counseling only), 524, GPA 3.0, and attend practicum workshop prior to registration.

COU 507. Counseling Diverse Populations (3) This course is a study of the issues and trends in a multicultural and diverse society. The course includes a focus of special counseling considerations for groups who differ in ethnicity, age, race, gender, religions, family patterns, socioeconomic status and sexual orientation. (Prerequisite COU 501)

COU 509. The Helping Relationship (3). This course will include the study of consultation theories, systems perspectives, and the practice of basic interviewing, assessment and counseling skills. Relevant research related to the practice of these skills will be studied, including the counselor/consultant and client/consultee characteristics that influence the helping process.

COU 514. DSM (3). This course is designed to provide counseling students with a working knowledge of the Diagnostic and Statistical Manual, and of the mental disorders described therein. (Prerequisite COU 501 and 502)

COU 523. Organization and Administration of the Guidance Program (3). This course is designed to provide students with techniques for assessing, developing and administering a guidance program. Students are exposed to methods for defining their role in a school or other settings and to organizational development principles. (Prerequisite COU 501)

COU 524. Introduction to Group Counseling (3). Students are involved in group interaction from structured group exercises. Group dynamics and leadership styles are observed with the aid of interaction observation instruments. Finally, students learn to facilitate groups. (Prerequisite COU 501, 502, 504, 505)

COU 526. Psychological Testing (3). Principles and procedures for studying individuals and/or groups for counseling and guidance purposes are learned, with emphasis on current standardized tests. (Prerequisite COU 501)

COU 528. Internship in Counseling (3). Internship is the final course in counselor education. Students are expected to display competencies in counseling skills while functioning as a counselor in a school or agency setting. Students may not enroll in internship until they have completed all the core courses and some electives.

COU 530. Family Counseling (3). A study of family counseling models, including study of family systems and major family theoretical approaches, interactional patterns of the individual and the family through various stages of the life cycle, and contemporary individual and family issues. (Prerequisite COU 501 and 502)

COU 628. Research in School and Agency Counseling (3). Students will conduct library research on counseling topics of interest and present their findings orally and in writing. Focus will be on writing in conformance with American Psychological Association publication style. Prerequisite: Ed.S. standing.

COU 632. Consultation and Collaboration (3). Emphasizes the models used by counselors to effectively consult and collaborate with clients, families, and community agencies.

COU 634. Advanced Studies in Cognitive Development (3). This course is designed to provide the advanced graduate student with increased theoretical understanding of cognitive development, moral and rule
development, and language development. The major method of understanding the function of intellectual development is acquired by the student as a result of performing cognitive experiments with children. The course places special emphasis on the variant and invariant aspects of Piaget’s theory of intellectual development.

**COU 636. Introduction to Play Therapy (3).** Includes the history, theoretical approaches, techniques and methods, applications to special settings or populations, and legal and ethical issues on the use of play therapy in the treatment of children. Includes a supervised experiential component in a play therapy setting.

**COU 637. Advanced Play Therapy (3).** Provides comprehensive training in varied theoretical approaches in the application of play therapy with emphasis on the developmental processes of play therapy. Includes supervised practice in a play therapy setting.

**COU 638. Ethical and Legal Issues in Counseling (3).** Introduces the ethical standards of the American Counseling Association and related professions, and their application to ethical, moral, and legal considerations in professional counseling. Helps students increase awareness of ethical and legal considerations in a diverse and increasingly technical society.

**COU 656. Research and Evaluation in Counseling Programs (3).** Provides study and experience in measurement, appraisal, and evaluation of a broad range of objectives in counseling. Emphasizes research design and procedure appropriate for evaluating counseling programs and outcomes. Prerequisite: Ed.S. standing.

**COU 679. Advanced Internship in Counseling II (3).** Provides supervised experiences in group and individual counseling, program development, consultation, and supervision. Prerequisite Ed.S. standing and COU 692.

**COU 692. Advanced Internship in Counseling I (3).** Provides supervised experiences in group and individual counseling, program development, consultation, and supervision. Prerequisite: Ed.S. standing and COU 615.

**COU 680. Seminar in Counseling (3).** Provides the opportunity for graduate students and professors to cooperatively pursue special counseling topics of interest. Innovations and emerging issues in counseling are emphasized. Prerequisite: Ed.S standing and permission of instructor.

**COU 690. Supervision in Counseling (3).** Emphasizes models, types, and developmental process of counseling supervision. Includes ethical considerations, program supervision skills, leadership styles, client care management, and program planning and evaluation. Prerequisite: Ed.S. standing.

**EDUCATION (EDU)**

**EDU 504 The Elementary School Curriculum (3).** This course is for principles of curriculum organization, materials, and procedures in the elementary school. Emphasis is on the process of analyzing K-6 curriculum and programs.

**EDU 505. Curriculum in Secondary Schools (3).** Organization and development of the secondary school curriculum. Attention is given to issues, problems, trends, and materials as they relate to an effective high school program.

**EDU 511. Statistical Techniques, Research and Evaluation (3).** This course is devoted to applications of the evaluation and measurement processes; fundamental principles of tests and measurement with an emphasis on practical applications in the classroom; evaluation of teaching, learning and research in education.

**EDU 512. Educational Research (3).** This course in an orientation in research methods which includes the formulation of the hypothesis, definition of the problem; and the approaches to problems through the normative survey, the historical, experimental, and clinical case methods; statistics essential to processing data including the use of SPSS.

**EDU 513. Seminar: Problems of Teaching in Elementary School (3).** Problems associated with teaching in the elementary school are analyzed. Includes reading widely in professional literature.

**EDU 515. Instructional Strategies for Teachers (3).** This course is primarily designed to acquaint students and teachers to a variety of teaching models and underlying theories, and research. The course will address current problems, i.e., discipline and planning.

**EDU 527. Human Development and Behavior (3).** This course introduces students to human development in the physical, social, emotional, moral, speech/language, and cognitive domains including contributions of important theorists; major progressions in each developmental domain and the ranges of individual variation within each domain; impact of students' physical, social, emotional, moral, and cognitive development on their learning and how to address these factors when making instructional decisions.

**EDU 531. Modern Issues in Education (3).** This course familiarizes students with philosophical issues pertaining to K-12; issues, challenges, and opportunities pertaining to K-12 teachers; and issues concerning special education, multicultural education, and other diversity issues.

**EDU 532. Behavior Disorders of Children (3).** A study of the origin, development and nature of behavior disorders in children. Special emphasis is placed on diagnosis and treatment of disorders.
EDU 636. Organizing Instructional Strategies in Content Areas (3). This course includes an emphasis on students’ understanding of thinking and how to improve thinking skills as applied to content areas of curriculum for young children 0 to age 8. Major emphasis will be on the application of developing intelligence including thinking, reasoning, problem solving, decision making, critical thinking and creative thinking to assist students in improving instructional strategies.

EDU 540. Research in Early Childhood Education (3). An intensive course designated to assist the student in ECE in interpreting research findings in child study and early childhood education. Research methodology is explored with an emphasis on action research. and students are afforded the opportunity to analyze research studies, discuss conclusions and derive implications from research.

EDU 541. Advanced Educational Psychology (3). This course introduces students to differences in the ways students learn and perform including learning styles, multiple intelligences, performance modes, concrete operational thinkers, visual and aural learners, gender differences, cultural expectations and styles and major cognitive processes associated with student learning including critical thinking, creative thinking, higher-order thinking, inductive and deductive thinking, problem structuring and problem solving, invention, memorization and recall, social reasoning, representation of ideas.

EDU 542. Seminar: Teaching Mathematics in Elementary School (3). This course is an examination of the current research dealing with techniques of teaching mathematics in elementary grades.

EDU 543. Seminar: Social Studies in the Elementary School (3). Examination of current research dealing with techniques of teaching social studies in elementary grades.

EDU 544. Teaching Science in the Elementary School (3). A critical study of the primary and intermediate grades science instructional programs. Special emphasis is placed on the appraisal of appropriate teaching practices and the analysis of curriculum content.

EDU 545. Literature for Children (3). A study of children’s books and strategies to incorporate these materials into the elementary school curriculum. Designed for teachers in the elementary school (grades K-6).

EDU 548. Seminar: Language Arts in the Elementary School (3). Examination of current research dealing with techniques of teaching language arts in elementary grades.

EDU 550. The Early Childhood Curriculum (3). This course is concerned with the goals of education as they are identified and implemented in the subject matter in curriculum areas of the early childhood program.

EDU 551. Instructional Strategies for Young Children (3). This course investigates the teaching-learning process while focusing on specific strategies of promoting and evaluating cognitive, affective and psychomotor skills in children ages 3 to 8.

EDU 552. The Theory of Play in Early Childhood (3). The course presents theoretical foundations for children’s play types and purposes of play as espoused by Erikson, Paller, White and others.

EDU 554. Contrasting Philosophies of Education (3). Deals both historically and contemporaneously with the ideologies that have developed from different concepts and philosophies of education.

EDU 562. Professional Internship in Early Childhood Education/ALT-A (6). Supervised full-day experience in assisting and teaching in an elementary school situation. Work is supervised by a cooperating teacher and a university supervisor (300 hours).

EDU 563. Professional Internship in Elementary Education/ALT-A (6). Supervised full-day experience in assisting and teaching in an elementary school situation. Work is supervised by a cooperating teacher and a university supervisor (300 hours).

EDU 564. Professional Internship in Secondary Education/ALT-A (6).

EDU 565. Professional Internship in Special Education/ALT-A (6).

EDU 566. Professional Internship in N-12 Certification Area/ALT-A (6).

EDU 567. Seminar in Early Childhood Education (3). The course provides an atmosphere whereby the student is expected to synthesize content, principles and skills garnered from prerequisite courses into a comprehensive view of the products and processes in early childhood education.

EDU 568. Parent Involvement in Early Childhood Education (3). This course emphasizes parent involvement in the early childhood program. Special consideration is given to the principles of working with parents on both an individual and on a group basis.

EDU 585. Communication Skills for Educators (3). This course is designed for enhancing the speaking and writing skills of educators.
EDU 586. Classroom Management (3). This course is designed to acquaint students with a study of classroom management models as related to the secondary school setting.

EDU 591. Practicum in Education (3). This course provides the advanced candidate clinical experiences to include K-6 students from a wide range of exceptionalities. Engages the candidate in work in diverse settings and various ethnic, racial, gender and socioeconomic groups. Involves the assembly of a work-sample portfolio. Requires approval by the Advisor.

EDU 602. Intermediate Statistical Methods (3). The major focus of this course is to prepare education professionals so that they can make accurate decisions based on information, accurate data, and the interpretation of research studies. Inferential statistics and other evaluation tools are covered in depth. Prerequisite – For EDU 602: Prerequisite: 511 or equivalent.

EDU 603. Advanced Studies in Teaching Mathematics in the Elementary School (3). An investigative study of certain topics identified as key elements in the mathematics education of students in grades K-6. Special emphasis is placed on conducting research on problem-solving, estimation, and mental arithmetic, and use of calculators and computers.

EDU 611. Advanced Curriculum Development (3). Practices and procedures in curriculum development with attention to the professional, social, economic and other major factors in curriculum planning.

EDU 626. Research Studies In Elementary Education (3). Provides an opportunity for the graduate student to engage in research of topics in elementary education; to share results of research with other graduate students and faculty.

EDU 627. Current Trends and Practices of Teaching in the Secondary School (3). Included are the selection of materials and evaluation of trends and practices appropriate for specialized areas in secondary education.

EDU 631. Practicum in Teaching the Exceptional Child (3). Supervised experience as related to identifying and teaching the exceptional child in elementary grades. Experience is carried out at local schools and other state-supported institutions. Prior approval is needed before registration can be completed.

EDU 632. Practicum in Elementary Education (3). This course is designed to provide practical experiences in improving the instruction at the elementary school level. Provides experiences in teaching and related activities in grades 1-6 for graduate students seeking “AA” certification. Prerequisite: Completion of two thirds of the coursework for the “AA” certificate. Requires approval by the Advisor.

EDU 633. Administration of Early Childhood Programs (3). This course is designed to provide systematic experiences to prepare advanced graduate students in four broad areas: application of knowledge base to practice, curriculum and supervisory principles applied to ECE programs, review of model programs, and intensive study of current research with relevance for application to present ECE programs.

EDU Practicum in Early Childhood Education (3). This course is designed to provide advanced systematic experiences specifically at the practical level to prepare graduate students seeking AA certification in four broad areas. Prior approval is needed before registration can be completed.

EDU 635. Seminar Problems in Early Childhood Education (3). This course provides an in-depth investigation into problems and issues of current importance to the advanced student in early childhood education. The course includes intensive study of literature as well as field investigations.

EDU 696. Ed.S. Thesis in Area of Specialization I (3). Involves writing first three chapters of a thesis advancing an original point of view as a result of research (statement of problem, review of literature, procedures). Consent of adviser. Open only to approved candidates in the Ed.S. program.

EDU 697. Ed.S. Thesis in Area of Specialization II (3). Involves writing a thesis advancing an original point of view as a result of research.

EDU 698. Research and Field Study I (3). This course provides an opportunity to complete a research project in a school setting.

EDU 699. Research and Field Study II (3). This course provides an opportunity to complete a research project in a school setting.

**HEALTH EDUCATION (HEA)**
HEA 500. Methods of Teaching Elementary Health Education (3). A methods course designed to provide instruction in teaching methodology, procurement procedures for obtaining teaching/learning resources, and evaluative techniques used in health science with an emphasis upon the role of technology. Curriculum planning, implementation of teaching/learning process, and evaluation of teaching/learning process are taught in this course.

HEA 501. Health Issues I (3). A comprehensive content course designed to introduce the student to the impact of selected health topics related to the domains of health (physical, mental, emotional, social environmental, spiritual). This course emphasizes the influence of health education through health knowledge, health promotion and risk reduction.

HEA 502. Methods of Secondary Health Education (3). A methods course designed for secondary schools (middle school, junior high and high school) to provide instruction in teaching methodology, procurement procedures for obtaining teaching/learning resources, and evaluative techniques used in health science with an emphasis upon the role of technology. Curriculum planning, implementation of teaching/learning process, and evaluation of teaching/learning process are taught in this class.

HEA 503. Health Issues II (3). A comprehensive content course designed to reinforce content and the impact of selected specific health issues (to include emerging diseases and conditions) related to quality of life. This course emphasizes the influence of health education and risk reduction strategies.

HEA 504. Alcohol and Drug Education (3). A survey of the history of drug use, misuse, and abuse in the United States. The social, emotional and economic impact of drug use is examined. Emphasis is placed on alcohol and other psychoactive substances. Consultants from fields of medicine, law enforcement, social agencies, and education are used in this course to relate the multifaceted concerns and problems of drugs use, misuse and abuse.

**INSTRUCTIONAL LEADERSHIP PROGRAM (ILP)**

ILP 510. Foundation of Instructional Leadership (3). This course is designed to study the organize and administration of American public schools analysis of leadership roles, styles, and theories as they relate to administrative behavior, decision-making, human resources development, diversity, technology, discipline, management, and school-community relations will be integral parts of this course.

ILP 520. Instructional Leadership and Supervision (3). The course will provide the student with a relevant knowledge base in the area of Instructional Leadership and Supervision.

ILP 570. Ethics and Legal Bases of American Education (3). This course is designed to explore the principles of law and ethics, applicable to public schools and school personnel. This course presents a real-world, problem-based approach emphasizing the application of legal knowledge and ethical principles necessary for success in educational leadership.

ILP 572. Fiscal And Human Resource Management (3). An examination of public school administration related to school finance, human resource management, school facilities, and school support services.

ILP 574. Instructional Technology For School Leaders (3). This graduate instructional technology course is designed to further instructional leaders on how properly implemented technology can improve student learning and achievement. This course instructs the school administrator on the basic elements and processes of bringing computers into the classroom how crucial administrative planning and leadership are to making this technology initiatives a reality. Specific topics of this course are leadership and planning, technology and staff development, teaching and learning with technology, communication and public support, financial management, technology infrastructure (networks), and program evaluation.

ILP 595. Internship in Instructional Leadership I

ILP 596. Internship in Instructional Leadership II

ILP 597. Internship in Instructional Leadership III

This course is designed to give the candidate practical experience to observe, participate, and lead (OPL) at various education levels as he/she completes specific objectives for the administrative internship. These objectives will give the candidate an opportunity to demonstrate many of the knowledge, skills, and abilities that an effective school administrator must know.

**LIBRARY EDUCATION MEDIA (LEM)**

LEM 500. Literature for Children and Young Adults (3). A comprehensive survey of literature for children and young adults as well as its effective utilization at school library media centers (K-12 levels). Includes discussion of selection criteria, integration of literature into the K-12 curriculum, and methods of presenting literature in K-12 settings.

LEM 501. Readings in Instructional Technology (3). Students investigate the latest research studies and theoretical
essays in the field to develop and discuss new research thrusts.

LEM 502. Preparation of Instruction Materials (3). Laboratory practice in applying coloring, lettering and mounting techniques in the preparation of pictures, maps, charts, posters, and graphs for projected and non projected use. A variety of techniques in the production of transparencies and overlays, dry and wet mounting, and freehand and commercial lettering are emphasized. Some attention is given to printing and duplicating materials through multilith and production layouts.

LEM 507. Internship in Library Media (3). 300 hours of internship of which at least 100 hours must be in one or more K-6 level library media centers and of which at least 100 hours must be in one or more 7-12 level library media centers. Includes participation in the College of Education’s LEM Internship Forum.

LEM 508. Collection Development and Management (former title: Selection and Utilization of Media and Materials) (3). Provides a comprehensive overview of the development and management of collections in all formats at library media centers (K-12 levels). Focuses on discussion of collection policies, censorship issues, working effectively with various types of vendors, strategies for building collections in all formats, and component tasks pertaining to maintaining collections.

LEM 511. Communication Technology and Instructional Design (3). The organization of educational personnel, instructional materials, and technology into a planned systems approach to learning.

LEM 512. Administration of Library Media Programs (3). Provides a comprehensive overview of the administration of school library media programs (K-12 levels). Focuses on budget preparation and management, facilities management, personnel management, marketing the library media center, and building as well as maintaining good relationships with administrators, teachers, parents, students, and communities.

LEM 513. Educational Media (3). Introduction to the area of library educational media. A study of the basic principles, theories, selection, evaluation, and utilization of materials and equipment utilized in the school media center. Experiences in the operation of multisensory equipment are provided.

LEM 517. Organization of Information Resources (3). A comprehensive overview of the organization of information resources in various formats, focusing on classification (and the Dewey Decimal Classification in particular) descriptive cataloging, Sears, and Library of Congress subject headings, indexing, and abstracting. Also includes discussion of issues pertaining to the acquisition, maintenance, and utilization of integrated library automation system.

LEM 519. Reference and Reference Services (3). A comprehensive survey of reference resources in all formats that are used in library media centers (K-12 Levels) and at other libraries. Includes examination of strategies for teaching library research methods and skills as well as discussion of collaboration with classroom teachers in order to integrate instruction utilizing library resources into K-12 curricula.

LEM 600. Seminar in Library Educational Media (3). Substantial media seminar. A research seminar required of all AA candidates designed to help the student identify and examine critically researchable topics, develop research designs and prepare research proposals. The instructional design of this course enables the student to analyze the dynamics of various consultants in the field of instructional media technology.

LEM 605. Visual Literacy (3). The study of visual communication as a means of information transmission system. A comparison of visual and verbal literacy as they concern today’s student. A review of the research in visual language and its implication for education.

LEM 613. Advanced Educational Media Programs (3). Provides an opportunity for students with basic knowledge and skills in media management to enhance their administrative competencies, with emphasis on system wide media programs. Attention is given to organization, supervision and evaluation of such programs. Prerequisites: LEM 508 and 512.

LEM 625. Individual Study in Educational Media (3). Provides opportunities for the advanced graduate student to engage in independent study and research in the area of educational media.

LEM 691. Practicum in Education For Ed.S students (3). Involves an analysis of factors pertinent to situations encountered in various school programs. Includes supervised experience in school and community-related programs and limited seminar involvements. Prior approval is required before registration can be completed. Also, students must completed a separate application form and return it to the director of laboratory experiences.

Leadership, Policy, and Law (LPL) Doctoral Program

Courses available only following admission to the doctoral program.

LPL 700. Leadership Studies (3). This course assists students to develop a more in-depth understanding of leadership through the integrated study of theory, research, and historical, current, and fictional examples. Students are strongly encouraged to explore both traditional and innovative
LPL 705. Administrative Theory (3). This course assists students to develop a more in-depth understanding of a variety of administrative theories. It emphasizes the use of these theories in administering an organization and appropriate ways of researching issues related to the administration of organizations. The course will call for students to apply administrative theories to enable analyses of and recommendations for educational organizations and will explore how various aspects of organizational administration may be researched to increase the knowledge base in the field or to address specific organizational problems.

LPL 710. Curriculum Planning and Evaluation (3). This course assists students to develop a more in-depth understanding of curriculum planning and evaluation. Students are provided an introduction to the basic models of educational program planning and evaluation. They subsequently demonstrate their knowledge of evaluation methodology and design by formulating an evaluation plan for an existing educational curriculum. Students present their evaluation plans and simulated outcomes during class for critical analysis and assessment.

LPL 715. Fiscal Leadership (3). This course assists students to understand basic concepts in finance. Included are discussions related to inequality of access from the state, national, and international perspectives. It examines state funding systems in education and basic budgeting processes. Educational production functions, human capital concerns, manpower planning and social demand theories and the economics of education are also considered from both a national and an international perspective.

LPL 720. Policy, Planning, and Change (3). This course assists students to acquire a basic understanding of the leadership issues associated with operational planning and change processes with the policy development required for achieving organizational reform. Included are topics that focus on group processes, planning models, readiness factors, implementation concerns and policies, and institutionalization issues.

LPL 725. Decision Making (3). This course assists students in the examination of the nature of the decision making process, including those organizational and individual factors that affect decisions in educational settings. The course encompasses an examination of the literature, basic decision concepts, decision processes, practical decision issues in management, and basic tools.

LPL 730. Public Policy (3). This course assists students to understand basic concepts associated with the development of public policy issues and the forces impacting policy development and implementation, governmental and organizational involvement in public policy discussions, and typical solutions to policy concerns. Included are issues relating to the policy process, policy handbook development, and basic analytic tools.

LPL 735. Educational Policy (3). This course assists students to develop an in-depth understanding of policy development, implementation, and evaluation processes, specifically as they relate to the field of education. At both the macro and micro-levels, students are challenged and guided to examine the environment that leads to specific educational policies, the underlying value structure, goals, inducements, facts, powers, and rights inherent in those policies, the demands and support for the policies by various interest groups, the political system in which policy decisions are determined, and the criteria and processes by which the policies should be evaluated.

LPL 750. Constitutional Law (3). This course assists students to explore contemporary legal issues pertaining to K-12 and higher education. Students will review the basic principles of federal and state education law. They will explore the concepts of judicial review, individual rights and liberty, substantive and procedural due process, equal protection, and equity in an educational setting.

LPL 755. Personnel and Liability Issues in Educational Law (3). This course assists students to develop an overview of judicial, legislative, and executive actions pertaining to personnel issues and torts liability in educational environments. Besides completing an in-depth study of the complex legal relationship between educational employers and employees, students will investigate torts issues and governmental immunity using federal and state statutes and case law.

LPL 760. Social and Ethical Issues in Educational Law (3). This course assists students to examine the social and ethical legal issues related to problems in contemporary American education. Besides examining various ethical and justice theories, this seminar highlights key issues that educational leaders are likely to confront in the day-to-day operation of educational organizations.

LPL 775. Statistics and Research (3). This course assists students to understand and apply basic statistics for use in educational research. The course strives to help students to develop the necessary knowledge and skills related to: measures of central tendency, variation, rank, and correlation; the normal curve and probability; testing differences between means; analysis of variance; and nonparametric procedures.

LPL 780. Qualitative Analysis (3). This course assists students in acquiring basic knowledge and skills on qualitative research processes. The qualitative research process is presented as a series of ongoing and overlapping activities. Topics include the identification of the assumptions that support the qualitative research paradigm, the identification of research questions, the use of theory in the research process, participant selection, methods of data collection, data analysis strategies and tools (including the use of computerized data analysis), and the reporting of results.
LPL 785. Multivariate Analysis (3). This course builds on the foundations of research and basic statistics and introduces multivariate statistical techniques commonly used in educational research. It assists students to develop knowledge and skills in parametric and nonparametric analysis, survey design and scale construction, database development and management, and the use of statistical analysis packages. It includes such topics as analysis of co-variance, multiple regression, factor analysis, and basic linear modeling.

LPL 800 and 805. Field Applications and Internships I & II (3 & 3). These courses assist students to develop an in-depth understanding of leadership, policy, and law through the integrated application of theory, research, and practice. Students work with university supervisors and field-based mentors in clinical settings, addressing micro-level (organizational) and macro-level (state, regional, or national) issues related to their specific areas of expertise and professional interest.

LPL 875. Research Dissemination (3). This course assists doctoral students with the planning, design, and execution of their original research study to fulfill their dissertation requirements. It acquaints students with American Psychological Association stylistic requirements and various formats for the presentation of research, including articles, monographs, and dissertations. It provides a forum for students to engage in critical thinking and reflection as they begin working on their dissertation prospectus.

LPL 900. Dissertation (12 minimum). This course is the culminating experience in the doctoral program. It includes the research, analysis, writing, and defense of an original research document. All program of study courses, including LPL 875, must have been completed prior to enrollment in LPL 900. Continuous enrollment is required until the dissertation and oral defense are satisfactorily completed.

MUS (MUS)

MUS 500. Foundations of Music Education (3). An analysis of the historical and philosophical roots of music education, which includes topics relating to current trends in educational thought and their implications for music education.

MUS 504. Functional Piano (2). A course to enhance the practical keyboard skills of the classroom teacher.

MUS 505. Harmony I (2). A unified approach to the study of music materials and structure, with emphasis on small and large forms and performance interpretation. The course includes analysis of selected works from each period of music in the Western world.

MUS 506. Harmony II (2). Study of the form structure and harmonic structure of representative works chosen from Baroque, Classical, Romantic and Contemporary ideas.

MUS 508. Marching Band Techniques (2). This course is designed to keep novice and in-service band directors current with recent trends of field maneuvers, which include charting of precision drills, the alphabet, pageantry, corps-style marching, flag corps, rifles and instrument placement on the field. The course covers the history of the band movement in America and preparation for both the concert and marching bands for contests.

MUS 510. Computer Applications in Music Education (2). This course provides music educators with the basics of MIDI setup and troubleshooting, generating scores and parts, sequencing techniques, and the educational benefits of other types of music software in the classroom. Other topics may include digital audio recording, burning CDs, and creating compressed audio files. This course requires a general understanding of computer operating systems and applications.

MUS 512. Advanced Conducting (2). An advanced course in choral or instrumental conducting with emphasis on interpretation.

MUS 517. Survey of Twentieth-Century Music (2). A study of representative works of the period as pertains to form, compositional techniques and stylistic features.

MUS 529. Piano Literature (2). An in-depth study of literature for the piano. Stylistic and analytical study of selected works from representative composers.

MUS 530. Vocal Literature (2). A survey of vocal literature from 1640 to 1950. The solo and ensemble music from the beginning of oratorio and opera through the late 18th and 19th centuries. Stylistic and analytical studies of representative composers.

MUS 531. Symphonic Literature (2). A survey of symphonic styles in orchestral literature with detailed study of selected examples from representative composers.

MUS 534. Survey of Modern Practices in Elementary School Music (2). This course is activity-oriented with special emphasis on the latest workable techniques associated with teaching music to children.

MUS 543. Instrumental Pedagogy (2). Principles of orchestra and band performances as they relate to studio instruction. Principles of how to teach woodwinds, brass and percussion instruments.

MUS 544. Vocal Pedagogy (2). A study of the principles of vocal instruction with special emphasis on a survey of teaching, procedure, vocal anatomy, terminology and literature.

MUS 545. Choral Literature (2). Sacred music from the 16th century to the present. Small forms-motets and anthems; large forms-oratorios and cantatas.

MUS 548. Seminar in Music History (2). A course in selected problems and periods in music history.

MUS 560, 561. Ensembles (1,1). Study and performance of either vocal music or instrumental music. Ensemble selection depends on whether or not the candidate is a vocal or instrumental major. All candidates who major in music performance must enroll in ensemble for two semesters.

MUS 588. Applied Voice (2). Advanced private study of vocal techniques and literature for the graduate student in music education emphasis.

MUS 590. Practicum in Music (3). Involves regular visits to schools and community centers, and/or special projects to broaden the student’s perspective in the area.

MUS 591. Directed Graduate Individual Study (3). Offer periodically in selected musical topics approved by an adviser who guides a student’s project in music history and literature, music theory or music education.

MUS 595. Applied Music, Instrumental (3). Advanced private study of instrumental techniques and literature for the graduate student in music education emphasis.

PHYSICAL EDUCATION (PED)

PED 506. Research Methods in Health and Physical Education (3). An overview of the methods and tools of research as they relate to health and physical education.

PED 511. Physiology of Exercise (3). A course designed to provide an understanding of the physiological effects of exercise on the various body systems, with particular emphasis on the musculoskeletal, cardiovascular, and respiratory systems and laboratory techniques in monitoring physiological parameters.

PED 512. Administration and Supervision of Health and Physical Education (3). The purpose of this course is to acquaint the candidate with the elements of administration/management of physical education and athletic programs. Emphasis is on administrative theory, the management process, management of physical education and athletic programs, and management functions.

PED 514. Legal Aspects of Sports and Physical Education Programs (3). This course is designed to provide graduate candidates’, teachers and administrators in the areas of physical education and athletics an overview of law and liability issues in athletics, physical education and recreation. The content is followed by a thorough citing of relevant legal cases that further explain and present the legal issues and judgments rendered.

PED 524. Developmental and Remedial Physical Education (3). The purpose of this course is to develop the candidates’ knowledge and understanding of competencies needed by regular physical educators and specialists in adapted/developmental physical education. Emphasis is on coping with individual differences that confront all physical educators. The course reflects a multidisciplinary approach, including the disciplines of adapted physical education, recreational therapy and special education.

PED 529. Measurement and Evaluation in Physical Education (3). A course designed to provide learning experiences in the measurement and interpretation of physical education program components.

PED 533. Methods and Materials for Secondary School Physical Education (3). The purpose of this course is to develop the students’ knowledge of theoretical and practical methods in the approach to the teaching of physical education in grades 7-12. It is designed for teacher preparation and is appropriate for students in teacher training, physical education teachers and directors of physical education programs. Emphasis is given to methods of teaching, curriculum development, and organization and administration of physical education.

PED 534. Methods and Materials for Elementary School Physical Education (3). A course designed to provide the elementary physical educator with an understanding of the
philosophy and objectives of elementary physical education and an understanding of the characteristics of children in grades P-6. Emphasis is placed on the selection of appropriate activities for each grade level, on proper teaching techniques and class management. Pedagogical strategies and curriculum design is emphasized.

**PED 603. Planning and Administration of Physical Education (3).** The purpose of this course is to develop the candidate’s understanding and knowledge of the planning, organization, and management of school physical education and athletic programs.

**PED 604. Interpretations in Physical Education (3).** This course is designed to provide the professional physical educator with the opportunity to investigate current trends and issues in the field.

**PED 605. Psychology of Coaching (3).** This course focuses on the role and influences of the coach, team dynamics, and psychological aspects of coaching. Particular attention is given to leadership and team-building, motivational strategies and stress reduction.

**READING (REA)**

**REA 559. Teaching Reading in the Elementary Grades (3).** This course is designed to investigate and analyze the many complex skills and experiences required of children in the overall reading process. Course content examines approaches to work recognition, accuracy, automaticity, fluency, vocabulary development, and comprehension. The course also examines causes of reading problems, such as interferences to comprehension and intervention procedures appropriate for the elementary grades. Emphasis will also be placed on the effects of the volume of reading and its impact on student success in reading.

**REA 560. Techniques and Skills of Reading (3).** This course is designed for students in the Alternative Master’s and N-12 programs. This course presents an overview of skills and techniques necessary to teach reading in the elementary grades. Such practical skills as phonics, vocabulary, comprehension and management will be addressed and examined in the course, as well as developing a working knowledge of lesson planning and development.

**REA 561. Reading in Primary Grades (3).** Designed to promote an understanding and appreciation of the many complex cognitive, affective, and performance-oriented skills required of young children in this grade range. Course content focuses on language foundations for reading, word analysis, comprehension, diagnostic teaching, program planning and improvement, and methods and materials.

**REA 562. Reading Diagnosis and Remediation (3).** Designed to develop an understanding of diagnosis, remediation, and related terms and concepts; the ability to administer and interpret standardized and informal diagnostic instruments and techniques in real or simulated situations; and the ability to prescribe appropriate individualized instruction based upon interpretation of test data.

**REA 564 Reading Internship (3).** Reading Internship is designed to provide intervention and tutorial experiences in conducting individualized and small group instruction in supervised, in-the-field situations with struggling readers in grades K-12. Students may not enroll in INTERNSHIP until they have completed all the core courses, electives, and any other requirement(s) as may arise. Students will spend 300 clock hours as interns during the internship, under the supervision of a reading specialist.

**REA 565. Current Research and Practices in the Teaching of Reading (3).** This course is designed to familiarize students with research bases for the current strategies, and techniques which comprise elementary reading instruction. The course presents an in depth study of research data and reports concerning the process of teaching reading, including the Alabama Reading Initiative model. Theoretical background and research techniques of studies that influence our understanding of the reading process, skills development such as accuracy, automaticity, active reading, self-regulation, and fluency), and instructional techniques are included to provide a balanced perspective for students to be able to develop meaningful and effective reading programs in schools.

**REA 578. Reading in the Content Areas (3).** Designed to develop competence in teaching reading skills instruction in the areas of language arts, literature, mathematics, the sciences and the social studies; to briefly review research on the relationship between reading and success in a particular content area; and to examine practical suggestions and materials for effectively developing relevant reading skills.

**REA 585. Theories, Research and Strategies in the Teaching of Reading in the Content Areas (3).** This course is designed for reading specialists to provide an in depth exploration of theoretical research and practical issues related to the teaching of reading/study skills in the various subject areas. The theories, materials, and techniques emphasized in the course address N-12 school settings.

**REA 602. Advanced Seminar in Reading: Special Topics (3).** Designed to provide in-service teachers in primary and intermediate grades the opportunity to research and analyze specific topics, problems and projects of collective concern in the area of reading acquisition.

**REA 610. The Reading Process: Current Trends and Theories (3).** Oriented toward an examination of current research and practices of: (a) effective reading instruction; (b) the reading process; (c) readers’ cognitive and linguistic processes; and (d) teacher/student behavior and cognition as they impact the classroom environment.
SPECIAL EDUCATION (SED)

SED 500. Exceptional Students in Inclusive Schools (3). This course will focus on discussing exceptional students and students from diverse backgrounds in inclusive settings. It will address and discuss (1) background knowledge of special education as well as current knowledge on disabilities and attitudes, (2) the impact of legislation on services for exceptional students, and how to adapt and/or modify instructional approaches for teaching exceptional and diverse students in general classes. (Formerly SED 574)

SED 520. Context of Education (3). This course will discuss the philosophical assumptions of the College of Education’s model, “Educator as Decision Maker.” It will also focus on: (1) paradigm shifts on education, e.g., changing roles of administrators, teachers, parents, and support personnel in site-based management; (2) university/school partnerships and/or Professional Development Schools (PDS); (3) preparing teachers for diverse student populations in both rural and urban school settings through communication, collaboration, coaching and technology; (4) evaluation process through traditional grading and performance-based assessment, e.g., use of portfolios; and (5) professionalism and national teacher certification.

SED 530. Dynamics of Administration & Supervision for Exceptional Students (3). This course will focus on aspects of educating exceptional and diverse students which are impacted by litigation, legal issues and litigation, rights and responsibilities, assessment, and ethical concerns. Discussions will include assessments and safeguards, supervision, evaluation of teachers and related personnel, evaluation and grading of students, safe schools, discipline issues, overrepresentation of minority students in special education, charter schools and their impact on public schools, and partnerships among administrators, teachers, students, parents, and interagency personnel.

SED 550. Research, Publication, & Granting Writing (3). This course will consist of four modules: (1) design, (2) statistics, (3) publications, and (4) grant writing. Design module will focus on how to set up and conduct a research project; statistics module will focus on the application of statistical software to generate quantitative data; publication module will focus on preparing manuscripts for possible publication; and grant writing module will focus on funding sources, mechanics of proposal writing, and submission guidelines and follow-ups.

SED 574. Exceptional Children (3). See SED 500.

SED 590. Communication, Collaboration, & Diversity in Education (3). This course will focus on parents, general and special educators, administrators, and professionals from related areas who will discuss the instructional needs and refuted services for diverse, exceptional students. Discussions will include: team building techniques, use of technology, e.g., instructional software, e-mail, Internet, adaptive devices; issues of diversity, e.g., global multicultural English as a Second Language (ESL), gender, alternative and augmentative communication and home-school collaboration, e.g., communication strategies, home involvement, due process, family priorities and EPIISFP, assessment, and cultural inclusion.

SED 602. Medical Challenges in Inclusive Setting (3). The focus of this course is on the complexity of care and the treatment requirements for critically ill newborns, children with diseases that can interfere with normal growth and development, pathological, genetic, chromosomal, and harmful environmental conditions that cause disabilities; and factors that place children at-risk for developmental disabilities. Special educators who work in early childhood settings must be aware of the impact that impairments have on the development of children in order to make decisions, as a member of the trans-disciplinary team, about care and programming.

SED 620. Facets of Disordered Behaviors (3). This course will focus on the major types of emotional/behavioral disorders of children and youth. Content will involve exploring and discussing detailed and systematic consideration to different ways in which emotional/behavioral disorders can be manifested. Types of disorders will include: attention and activity; conduct (overt and covert); delinquency and substance abuse; anxiety-withdrawal and related disorders; and depression and suicidal behavior.

SED 622. Autism & Psychotic Behaviors (3). This course will focus on students who exhibit severe autistic or psychotic behavior. Discussions will examine definitions, causes, characteristics, diagnostic criteria, research findings, and programs or practices, e.g., facilitated communication, related to autism.

SED 630. Interventions for Emotional/Behavioral Disorders (3). This course will focus on interventions which will facilitate the teaching and learning process while working with students with emotional/behavioral disorders. Discussion will focus on approaches, methods, and strategies which can be adapted or modified when necessary. Interventions will include behavioral approach, cognitive approach, educational approach, motivational strategies, instructional methods and areas, e.g., direct instruction, active teaching, cooperative learning. Peer tutoring, peer mediated approach for social skills, problem solving, moral reasoning, and alternate approaches and therapies, e.g., milieu, crisis intervention, group, drama, music, dance, art.

SED 632. Seminar in Emotional/Behavioral Disorders (3). This course will focus on issues, trends, and challenges related to students with emotional/behavioral disorders and their families. It will look at a systems approach to programming students with emotional/behavioral disorders which will include the following systems: family, social (social/welfare; juvenile justice, correctional, and mental
health), and teacher/educator’s role as consultant, liaison and as part of a social system. Other issues/challenges will include substance-exposed infants and young children; sexual abuse of children and adolescents; inclusion/full inclusion; and suspension and expulsion of students with emotional/behavioral disorders.

SED 640. Language Interventions for Students With Disabilities (3). The focus of this course is on language problems of students with learning disabilities; the causes and intervention models. Students must be knowledgeable for the impact that language disorders have on the development of academic skills and social skills to make decisions regarding appropriate teaching strategies, instructional approaches and to provide effective instruction in academic and non-academic areas for students with learning disabilities in inclusive settings.

SED 642. Strategy Interventions for Students with Disabilities (3). The focus of this course is strategy instruction approaches to teach students with learning disabilities to use study skills and strategies effectively to become independent learners. The emphasis of the course is on providing children with learning disabilities the tools they will need throughout their school experience in inclusive settings to meet academic and social demands in four specific areas: academics, social, motivational, and organization and management. Students are expected to gain knowledge in how to plan, present and explain the strategies, to help children in making decisions about which strategies to use.

SED 650. Current Practices in Special Education from Historical Perspectives (3). This course is a comprehensive study of the complex field of learning disabilities. Students will become knowledgeable the historical foundations and developmental states of learning disabilities as a field of study. The early contributions from the field of medicine are noted with the role advocates for the growth of the field. An overview theory and how theory is implemented and integrated with diagnostic methods and teaching strategies to provide a broad view of, empirically based, best practices. Emphasis is placed on the interrelated parts of a continuous process that will assist teachers of students with learning disabilities make good knowledgeable decisions for children in inclusive settings.

SED 652. Assessment Instruments for Special Populations (3). The focus of this course is assessment methods and strategies for a comprehensive variety of childhood disorders. Many types of assessment procedures are available which require varying degrees of expertise; and the instrument must meet federal guidelines. Although most standardized tests are designed for use by professionals who have mastered the skills of test administration and scoring, it is essential for special education teachers to receive training in some measures such as achievement tests. Students will practice skills and should become proficient in the use of manuals for specific administration rules, using test protocols, scoring test accurately, administrating test items, and interpreting test results. Current trends favor less reliance on the use of norm-referenced testing and an increased reliance on informal assessment. Students will become familiar with the important differences in approaches to informal assessment and the trend of curriculum-based measurement.

SED 660. Developmental Disabilities (3). The focus of this course is on students with severe, chronic disabilities which continue indefinitely. Topics to be discussed and examined will include: inclusion; assistive technology devices and services; verbal and nonverbal communication; special health concerns and procedures; social skills and self-care skills; functional academics and daily living; vocational preparation and transition; recreation and leisure time; and informing and involving the family about all aspects of planning and implementing necessary services.

SED 662. Behavioral/Educational Interventions for MR/DD (3). The focus of this course is on planning behavioral and educational interventions to adequately meet the needs of students with MR/DD. Topics of discussion will include: (1) Traditional assessment as well as alternate assessment and instructional planning and implementation; (2) special health care procedures, and physical management and handling procedures; (3) non-symbolic, augmentative and alternative communication, and functional communication; (4) effective behavior support plans; (5) self-care skills curriculum, functional academics, daily living and community skills; and (6) vocational preparation and transition.

SED 670. Seminar in MR/DD (3). This course will discuss issues, trends, and future challenges relevant to mental retardation and development disabilities. Topics of concern will include; service delivery options for MR/DD students and adults of all ages; assessment issues with MR/DD and culturally diverse students; drugs and alcohol-related problems; employment; housing; family consideration; rights and legal issues; and biomedical ethical and social issues.

SED 680. Student Teaching in Inclusive Settings, K-6 (6). Student teaching is a full-time twelve week culminating internship at a public school site. With the assistance and guidance of an experienced teacher, the student/intern will gradually assume full-time teaching responsibilities. Practice teaching is a required experience and must be completed satisfactorily to earn the education degree and recommendation for professional licensure. Student teaching provides the student the opportunity to develop and demonstrate their ability to and skill of the development of long-range planning and in-depth understanding on school life and to complete the development of their portfolio.

SED 685. Student Teaching in Inclusive Settings, 6-12 (6).

SED 687. Student Teaching in Inclusive Settings, K-6 and 6-12 (6).

SED 690. Practicum in Special Education, K-6 (3). This practicum is a full time six week culminating internship at a
public school site. With the assistance and guidance of an experienced teacher, the student/intern with gradually assume full time teaching responsibilities. The practicum is required for teachers who hold a certification in the field of education and are seeking additional certification and recommendation for professional certification.

SED 695. Practicum in Special Education, 6-12 (3).

TECHNOLOGY (EDT)

EDT 574. Computer-Based Instructional Technologies (3). A study of the principles of computer operations, with special emphasis on applications in computer aided instruction and educational administration.

EDT 575. Current and Emerging Instructional Technologies (3). Provides the student with knowledge, comprehension, performance skills and hands-on experience with current and emerging instructional technologies. Also, students will be required to produce desktop published documents.

EDT 576. The Integration of Technology into the K-12 Curriculum (3). Provides the in service K-12 teacher with culminating course in a series of three sequential technology courses. Application and integration of the use of computers in lesson planning and management of classroom instruction using software for IBM/DOS and Macintosh systems. Includes the evaluation of instructional software and the writing and evaluation of documentation for using software. The successful completion of Courses I and II is a prerequisite to registering for this course.

COLLEGE OF HEALTH SCIENCES

HEALTH SCIENCES (HSC)

HSC 5001. Advanced Gross Human Anatomy (6). An advanced, detailed regional study of the structure of the human body with emphasis on the skeletal, muscular, cardiovascular, peripheral nervous, and respiratory systems. An introduction to functional anatomy and selected pathologies provide a basis for the future understanding of the kinetics of motion and of dysfunction. This course includes cadaver dissection, lectures, case studies, and computer-based learning tasks.

HSC 5002. Functional Human Anatomy (2). This course introduces students to relevant medical, anatomical and basic biomechanical terminology. It will emphasize anatomical structures and function as they relate to the human body. Students will begin to use handling, palpation and problem solving skills to apply basic movement principles related to bone, muscle, joint and other structures.

HSC 5003. Patient Care Concepts I (1). This course provides the student with a foundation for interacting with consumers of rehabilitation services and with other healthcare professionals. This laboratory course introduces the student to basic concepts in patient care including: communication and building rapport, basic patient handling skills, clinical observation and assessment, aseptic technique, vital signs, positioning and draping, transition and transfer skills, common devices used in patient care, and working as a member of a healthcare team.

HSC 5004. Introduction to Rehabilitation Professions (1). This course provides the students a perspective on the history and philosophical assumptions of the rehabilitation professions. The past, present and future roles of the rehabilitation professional are explored within the changing health care system. The importance of teamwork in an inclusive environment is examined. This course lays the foundation for the basic tenets of health professions practice necessary to become a successful student and practitioner.

HSC 5005. Neuroscience (4). A study of the microscopic and pathologic anatomy of nervous tissue and the gross anatomy of the head, neck and human nervous systems with special attention (but not limited) to the brain and spinal cord. The functional aspects of the central nervous system and the cause-effect relations between lesions and their symptoms are presented.

HSC 5006. Introduction to Research and Evidence-based Practice (2). This course addresses the role of research in professional clinical practice including foundations of research, introduction to the research process, research sources utilization and dissemination, and principles and models of evidence-based practice.

HSC 5007. Research in the Health Professions (1). This course addresses the conduct of research, applied research designs, human subjects protection, and planning, implementing and evaluating health professions research.

HSC 5008. Pharmacology (2). This course will expose students to the indications, mechanisms of action, precautions, common side effects and adverse reactions of routinely prescribed medications and classes of medications used to treat diagnoses commonly encountered in clinical practice. The pharmacokinetics and pharmacodynamics of prescription and frequently used over the counter medications will be discussed. This course integrates and expands chemistry, biology and physiology.

HSC 5009. Assistive Technology in Rehabilitation (2). This course will expose students to assistive technology used to improve access to and acquisition of assistive technology
devices and services for individuals in education, work, self-care and leisure activities.

HSC 5010. Patient Care Concepts II (2). This course lays the foundation for patient care in rehabilitation settings (i.e. physical therapy, prosthetics & orthotics). Students will address examination and evaluation techniques and rationale related to anthropometric characteristics, physiologic responses, emergencies related to treatment, joint integrity, range of motion, goniometry, manual muscle testing, motor function and performance, posture/gait and gait deviations. It will also include the patient/client management model, documentation of history, objective measurements, treatment and goals.

HSC 5011. Biomechanics (2). Introduction to kinesiology by study of biomechanics, including statics, and dynamics; and related aspects of human muscle mechanics and physiology. Emphasis will be placed on the importance of mechanical principles in relation to analysis of human body at rest and in motion with both normal and selected pathological examples.

HSC 5013. Introduction to the Integumentary System (1). This course will review skin anatomy and the wound healing process in relation to the etiology of common integumentary diagnoses. Identification of types wounds, the wound assessment process and wound relief measures will be presented. Wound dressing categories will be introduced and discussed in relationship to the wound assessment and patient function.

HSC 5014. Psychosocial Aspects of Disability (3). An examination of the study of individual reactions to various disabling conditions, the adjustment process, cultural norms and expectations, and responses to the rehabilitation process. The psychological impact of disability will be examined by analyzing the individual’s adjustment to disability and related issues pertaining to self-concept, self-worth, role fulfillment, and quality of life. Social aspects of disability will be studied by analyzing societal attitudes toward people with disabilities; discrimination and segregation issues; impact of disability on vocational and other social role functioning; and images of people with disabilities portrayed in the media and other cultural forms of expression. Particular attention will be placed on increasing awareness about environmental barriers that confront people with disabilities in our society. Treatment interventions, designed to minimize the impact of disability, will be emphasized throughout the course.

HSC 5099. Capstone (3). The student will conduct a systematic investigation of a clinical question related to practice, in consultation with a capstone advisor. This work may include more than one student with program approval. The completed capstone should present the nature of the problem or subject investigated, its significance to the profession or larger field of study, a discussion of the relevant literature, a clearly defined method for exploring the question of interest, and specific conclusions or recommendations. A formal paper and presentation are required.

HSC 6000. Thesis (3). The student will design and conduct research to complete the aims identified in his/her research proposal, in consultation with a thesis advisor and advisory committee, or as modified subsequently in line with recommendations of the committee. The completed capstone should present the nature of the problem or subject investigated, its significance to the profession or larger field of study, a discussion of the relevant literature, a clearly defined method for answering the question of interest, and specific conclusions or recommendations. A formal paper and oral thesis defense are required.

**PROSTHETICS AND ORTHOTICS (MPO)**

MPO 5110: Introduction to Prosthetics and Orthotics (2). This course provides an overview of the fundamental concepts that orthotics and prosthetics are founded on. The purpose of the course is to provide the student with a base knowledge that the subsequent clinical courses can build upon. The course covers: professional identity, terminology, history, scope of practice, materials, fabrication processes, component identification, a survey of common pathologies, basic clinical problem solving, orthosis and prosthesis classification and basic biomechanical principles. In addition, students will be introduced to basic research formulation through reading, processing, and discussion of relevant journal articles to the field of prosthetics and orthotics.

MPO 5190: Clinical Observation I (1). This course examines the practical application of medicine, surgery and rehabilitation under the supervision of a variety of health care professionals. Students will be exposed to a multitude of diseases and conditions in hospitals, clinics and/or private practice settings. Although students will have the opportunity to rotate through few orthotic and prosthetic facilities, the emphasis of this first clinical rotation course is on the basics of prosthetics, orthotics, and medicine.

MPO-5210: Lower Limb Orthotics I (3). The topics covered in this course will include all elements of orthotic intervention of the lower extremity that are concerned with the lower leg and foot distal (i.e., below) to the knee. The major areas addressed in this course are: pedorthics, foot orthoses (FO), ankle foot orthoses (AFO), neuroprosthetics, examination of the foot and ankle, pediatric and adult orthotic management, technical fabrication methods, computer-aided-design/computer-aided-manufacture in orthotics (CAD/CAM), orthotic management of fractures, fit and function assessment. Students use each other as pseudo-patient models to fabricate and fit an array of custom orthoses.
MPO-5220: Lower-Limb Prosthetics I (3). This course examines the principles and practices of prosthetics as they relate to amputations distal to the knee. The course covers a diversity of topics that include: patient assessment, post-operative management, negative impression and measurement procedures, gait analysis, prosthetic alignment, fit and function assessments, fabrication procedures, computer-aided-design/computer-aided-manufacture in prosthetics (CAD/CAM), component and material selection, and principles of gait training. Professional patient/subject models are used to demonstrate the clinical fit and function of a prosthesis.

MPO-5230: Neuroscience for P&O (2). This course will cover the areas of neuroscience specific to prosthetic and orthotic intervention. Specific topics include: neural anatomy (including the brain, spinal cord, peripheral nerves), physiology of neurons and neuronal firing, neural development, neuromuscular reprogramming (motor learning) and motor control of extremities. The motor control portion will focus on normal and pathological gait and upper limb movement with an emphasis on deficits routinely requiring P&O intervention.

MPO-5290: Clinical Rotation II (1). This course examines the practical application of medicine, surgery and rehabilitation under the supervision of a variety of health care professionals. Students will be exposed to a multitude of diseases and conditions in hospitals, clinics, and/or private practice settings. Although students will have the opportunity to rotate through few orthotic & prosthetic facilities, the emphasis of the second clinical rotation course is on lower limb prosthetics (principles and practices of prosthetics as they relate to amputations distal to the knee) & lower limb orthotics (elements of orthotic intervention of the lower extremity that are concerned with the lower leg and foot distal (i.e., below) to the knee).

MPO-5310: Spinal Orthotics (3). The spinal orthotics course provides an overview of orthotic management of the trunk, head and neck. The topics covered in this course are: cervical orthoses (CO), thoracic lumbo-sacral orthoses (TLSO), lumbo-sacral orthoses (LSO), sacral orthoses (SO), scoliosis management, post-operative management of the spine, cranial helmets, thermal injuries of the face and extremities. Students use each other as pseudo-patient models to fabricate and fit an array of custom orthoses. However, professional patient models will be used for some elements of the course.

MPO-5320: Cranial Seminar (1). This course examines the principles and practices of orthotics as they relate to deformational plagiocephaly and other head shape deformities. The emphasis of this course will be on the terminology, cranial anatomy, evaluation process, and techniques associated with cranial orthoses.

MPO-5340: Pathology in P&O (3). This course will provide an introduction to general pathology. A systematic study of specific disease processes, their clinical manifestations and medical/surgical management will be explored. Emphasis will be placed on those diseases that produce neuromuscular and/or musculoskeletal dysfunction.

MPO-5390: Clinical Rotation III (1). This course examines the practical application of medicine, surgery and rehabilitation under the supervision of a variety of health care professionals. Students will be exposed to a multitude of diseases and conditions in hospitals, clinics and private practice settings. Although students will have the opportunity to rotate through few orthotic & prosthetic facilities, the emphasis of the third clinical rotation course is on spinal orthotics, and reinforcement of clinical rotation II in lower limb prosthetics, and reinforcement of clinic rotation II in lower limb prosthetics (principles and practices of prosthetics as they relate to amputations distal to the knee) & lower limb orthotics (elements of orthotic intervention of the lower extremity that are concerned with the lower leg and foot distal (i.e., below) to the knee). In addition clinical rotations may include specialty clinics in the areas of: multiple sclerosis, muscular dystrophy, scoliosis, spina bifida, cerebral palsy, stroke rehabilitation, sports medicine, and diabetic foot.

MPO 5399: Professional Seminar in P&O (1). This course will expose students to new theories and treatment techniques that are utilized by prosthetic and orthotic practitioners. Advanced training in a technique may also be covered in this seminar. Students may enroll in and receive credit for this class up to four times.

MPO 6410. Lower Limb Orthotics II (3). This course is a continuation of Lower Limb I that focuses on orthotic management of disorders that affect the proximal (i.e., nearer to the center of the body) limb regions that include the knee, hip, pelvis and trunk. Topic areas covered in this course are: knee ankle foot orthoses (KAFO’s), knee orthoses (KO), hip knee ankle foot orthoses (HKAFO’s), reciprocating gait orthoses (RGO’s), externally powered orthoses, sport orthoses and pediatric and adult orthotic management. Students use each other as pseudo-patient models to fabricate and fit an array of custom orthoses.

MPO 6420. Applied Clinical Research (1). This course is designed to introduce or reintroduce students to the basic and advanced concepts, techniques, and principles of critical inquiry using applied clinical research. The focus will be on understanding quantitative aspects of clinical research literature. Topics to be investigated include measurement theory and the scientific method; the research process, experimental design, hypothesis construction and testing, measurement scales, sampling, indices of validity and reliability, statistical analyses, and critical evaluation of occupational language of statistics and what those statistics mean.

MPO 6430. Lower Limb Prosthetics II (3). This course examines the principles and practices of prosthetics as they
relate to amputations proximal to the knee and include: transfemoral amputations, knee disarticulations, and hip disarticulations. The course covers the following topics: patient assessment, post-operative management, negative impression and measurement procedures, gait analysis, prosthetic alignment, fit and function assessments, fabrication procedures, computer-aided-design/computer-aided manufacture in prosthetics (CAD/CAM), component and material selection, and principles of gait training. Professional patient/subject models are used to demonstrate the clinical fit and function of prostheses.

MPO 6520. Upper Extremity Prosthetics (3). This course examines the principles and practices of prosthetics as they relate to amputations of the upper extremity and include: transhumeral, transradial, partial hand amputations, shoulder disarticulations, congenital anomalies, and myoelectric prostheses. The course covers the following topics: patient assessment, post-operative management, negative impression and measurement procedures, motion analysis, prosthetic alignment, fit and function assessments, fabrication procedures, computer-aided-design/computer-aided manufacture in prosthetics (CAD/CAM), component and material selection, and principles of gait training. Professional patient/subject models are used to demonstrate the clinical fit and function of prostheses.

MPO 6530. Practice Management and Administration in P&O (2). This course examines prosthetic and orthotic practice management in the current health care environment. Topics to be discussed are practice management, clinical reasoning, integration of evidence-based practice into clinical relevant decision-making, and synthesis of relevant information. There will be an emphasis on documentation and coding skills. Various other topics will be addressed such as professional scope of practice, professional identity, reimbursement, licensure/certification, health care economics, codes of ethics, and marketing.

MPO 6590. Clinical Rotation V (1). Students will be allowed to pick a site of their choice that matches their interest in orthotics and prosthetics. This course examines the practical application of medicine, surgery and rehabilitation under the supervision of a variety of health care professionals. Students will be exposed to a multitude of diseases and conditions in hospitals, clinics, and/or private practice settings. Although students will have the opportunity to rotate through few orthotic & prosthetic facilities, the emphasis of the fifth clinical rotation course is building upon specific course work focusing on spinal orthotics, lower limb prosthetics (principles and practices of prosthetics as they relate to amputations proximal & distal to the knee) & lower limb orthotics (elements of orthotic intervention of the lower extremity that are concerned with the upper & lower leg and foot. In addition clinical rotations may include specialty clinics in the areas of: multiple sclerosis, muscular dystrophy, scoliosis, spina bifida, cerebral palsy, stroke rehabilitation, sports medicine, diabetic foot, general orthopaedics, cardiology, endocrinology, neurology, orthopaedic radiology, rheumatology, pediatric orthopaedics, pediatric neurology, and psychiatry.

MPO 6510. Upper Extremity Orthotics (3). The upper extremity orthotic course is tied closely to the respective prosthetics course during the same term. The parallels in considering functional tasks in management of the upper extremity and the design implications in prescription formulation are uniquely linked. Orthotic management of pathologies that affect the shoulder, elbow, wrist, and hand are presented in this course. As with the other orthotic courses, students use each other as pseudo-patient models to fabricate and fit custom orthoses for the wrist, hand, elbow, and shoulder; as well as exposure to a multitude of prefabricated custom-fitted devices.

OCCUPATIONAL THERAPY (OTH)

OTH 5110. Fundamentals of OT Practice (2). This course is designed to provide the student with a broader perspective of occupational therapy. It emphasizes the key philosophical
assumptions, models, frames of reference, concepts, and theories as they relate to occupational therapy practice.

**OTH 5120 Ethics and Professional Development (2).** This course is designed to promote professional behaviors and development, clinical reasoning, critical thinking abilities, problem solving skills, and self-reflective behaviors; and to examine value and belief systems that embrace ethical practice in occupational therapy. A survey of theoretical principles and perspectives influencing modern healthcare decision-making will be discussed along with the American Occupational Therapy Association (AOTA) ethics documents. Students through discussion and case study will visit legal and ethical dilemmas and issues representative of those typically encountered by occupational therapists in a wide variety of treatment settings and work environments including clinical practice, supervision, management, teaching, research, and consultation. Professional responsibility and personal development will also be emphasized as a guide for professional interactions.

**OTH 5130. Theory of Occupational Therapy (2).** This course is designed to provide the student with foundational knowledge of the models, theories, principles, and frameworks that guide the profession of occupational therapy. The course will examine theoretical trends and organizational knowledge within the profession, introducing theory evaluation and application to practice.

**OTH 5210. Occupation Through the Lifespan (3).** This course serves as an introduction to normal human growth, development and maturation, emphasizing the diversity of the person, environment and occupation and how this impacts normal development and performance. The course examines the chronology of normal development and concepts of occupation from conception to death, with emphasis on the formative years (approximately 0-21 years). The course is arranged chronologically. The course includes small group projects as well as technology based learning and roundtable discussions.

**OTH 5211. Analysis of Occupation (3).** This course is designed to provide a basic understanding of the use of purposeful activity and occupation in the treatment of clients/patients/consumers. Theories will be reviewed and practical experience in the use of crafts, expressive media, and technology will be explored. Students will be required to produce various forms of media (i.e., handicrafts, ceramics, painting, etc.), instruct others in the production of an activity, and perform an activity analysis. Students will learn to develop and teach compensatory strategies and grade and adapt tasks for patient’s successful engagement in occupation. The course will be approximately 85% performance based and 15% didactic based. Students also will design and direct group activities for atypical and typical populations across the lifespan.

**OTH 5212. Therapeutic Measurement (3).** This course is designed to focus on the concepts of human performance and the effects of biomechanics and kinesiology on occupation. This course focuses on principles of kinesiology, including joint actions, internal and external forces and their affect on functional motion. In this section of the course, students will be expected to demonstrate an understanding of kinesiology as it applies to and affects movement, ergonomics, and task completion. They will also demonstrate an understanding of biomechanical evaluation and principles of goniometry, manual muscle testing and special tests and will be able to apply those principles to various types of clients in all settings.

**OTH 5301. Administration and Management (3).** This course will provide an overview of the management and organizational structure of occupational therapy services. Topics of discussion will include, but is not limited to strategic planning, marketing, professional relationships, political action, supervisory relationships, accreditation, managing an occupational therapy program, program evaluation, legal and ethical issues.

**OTH 5302. Disease and Occupation (3).** This course is designed to study selected disease processes and conditions across the lifespan and how the disease process affect occupational performance. We will survey the medical and/or surgical management, prognoses, and precautions for these conditions as well as addressing care in a variety of settings across multiple cultures. Students will examine the effect diseases and conditions have on the person, occupation, environment, and performance. Student will examine ethical issues as they apply to various aspects of illness, treatment, and occupation. Students will also demonstrate a knowledge and understanding of the roles of the occupational therapist in various settings and diagnoses and the utilization of appropriate referral source and personnel, including the COTA. In addition, the student will be expected to identify and employ professional literature in order to assist with the treatment of clients. This course will include traditional lecture with discussion, media based presentations, case-based learning, cooperative learning, and didactic questions.

**OTH 5304 Fieldwork Level I [1 of 3] (1).** The first Level I Fieldwork (1 of 3), introduced in the third semester of study, requires the student to reflect upon their early curricula experiences. In semesters one and two, students gain foundational knowledge in didactic courses about the profession of occupational therapy, the roles of occupational therapy practitioners, occupation through the lifespan, safety, and physical/mental health and wellness. This first fieldwork experience exposes the student to community-based programs that are considered by the program to be in traditional and/or non-traditional areas of practice with populations along the lifespan continuum. Students typically participate in this experience on a once-a-week basis for approximately eight weeks using a single fieldwork site. In most instances, there are not occupational therapy practitioners employed in the sites used for these placements and the students are supervised by ASU OT faculty. The expectation is for the
The student to identify how occupational therapy services may impact existing programming, provide an arena in which the student will further develop professional behaviors, gain insight about other professions, embrace emerging areas of practice, explore occupation, practice group process skills, and view environments in which occupational therapy practice may occur.

**OTH 6404 Fieldwork Level I [2 of 3] (1).** The second level I Fieldwork (2 of 3) is offered in a one-week block format during the fourth semester of study. This experience builds on previous coursework, including the earlier fieldwork experience. During this semester of study, students are placed in settings that emphasize pediatric and adult populations in traditional areas of practice as defined by ASU’s geographic region. This experience allows the student to apply select skills acquired during semesters one through four such as observation and activity analysis while considering the effects of disease and disability. The student will identify appropriate goals and treatment activities and retrieve pertinent information from the medical/client/student record while engaged in this placement. This fieldwork experience, in many instances, will be the first to involve interaction between the student, the occupational therapy practitioner, and direct occupational therapy services. It is the aim of this placement for students to refine their professional interactions/behaviors, participate in select aspects of the occupational therapy process, integrate critical thinking skills, and to articulate understanding the contextual needs of the individuals served.

**OTH 6408. Research Topics (1).** This course is designed for students to progress through their capstone project. Students will work with their research team and advisor in preparation for presenting their capstone project.

**OTH 6410. Community Based Intervention (2).** The course is designed to allow the student to explore a variety of service models in traditional and emerging areas of occupational therapy therapeutic intervention in a community based setting. Students are expected to synthesize their knowledge of activity analysis in progressively more involved clinical experiences with clients from diverse backgrounds and settings. The student will also garner the skills and tools necessary for the development of occupation-centered intervention in a community-based setting. The student is expected to participate in classroom and community exploration activities through experiential learning, team based learning, case based and self-study in addition to traditional lecture.

**OTH 6412. Therapeutic Interventions and Special Topics (3).** This course builds upon the material learned in the previous semesters, specifically OTH 5212. As students have completed a thorough course on biomechanics and kinesiology, they are able to apply those concepts in various aspects and concepts of the Occupational Therapy Process, including evaluation and intervention. They are instructed in the performance of special tests and skills that fall into a multitude practice areas. They will learn principles of splinting, wound care and physical agent modalities. They will be able to apply skills learned in both courses to all appropriate diagnoses, age groups and contexts.

**OTH 6434. Physical Dysfunction I w/Lab (4).** This course is the first leg of a two part course. Physical Dysfunction I and II are both designed to be lab embedded courses. The course is designed to incorporate lab activities as they are appropriate throughout the learning process. Physical Dysfunction I will ensure the student is able to apply the Occupational Therapy Framework and Process. Following a developmental model, students will first examine common theories/frames of reference for occupational therapy treatment. The class will begin by establishing a foundation for evaluation and treatment based on occupational theory and evidence based practice. They will then explore the effects of physical dysfunction on occupation from birth to adolescence. Students will practice evaluation and treatment of this patient group. The students will utilize critical thinking and past courses to apply best practice to the occupational therapy process-initial evaluation to discharge, beginning with those disorders that affect the pediatric population and continue along a developmental continuum. They will practice professional interventions based on evidence-based practice. The student will illustrate occupationally based activities and purposeful activity. In addition to learning new skills, the student will examine his/her limitations and the importance of ethics and formal and informal professional development in order to provide appropriate occupational therapy services. The students will be exposed to lecture-discussion, team-based projects, face-to-face labs, experiential learning, case studies and self-paced learning.

**OTH 6435. Psychosocial Dysfunction I w/Lab (4).** This course is designed to introduce the student to the influence of psychosocial dysfunction on children and adolescents and its impact on occupational performance. The implications for occupational therapy evaluation, intervention planning, and intervention will be addressed as it relates to helping individuals actively engage in daily occupations. The course will emphasize key frames of reference, models, and theories and its importance to the practice of occupational therapy. Additionally, students will discuss aspects of ethics and research as it relates to psychosocial OT practice.

**OTH 6504. Fieldwork Level I [3 of 3] (1).** The final level I Fieldwork (3 of 3) provides the student with an opportunity to participate in an intensive three-week clinical experience in the assisted living/long-term care/subacute nursing facility setting. ASU recognizes these settings as significant areas of practice based on aging projections for the United States along with program graduate employment trends. This fieldwork experience occurs at the end of the fifth semester of study. At this juncture, students have completed the majority of the curriculum and are equipped with the technical skills set needed to embark on Level II fieldwork. Students placed in these settings will likely interact with the certified occupational therapy assistant (COTA) and the registered
occupational therapist (OTR). Students will master demonstrating professional behaviors, apply clinical reasoning skills, utilize ethical judgment, and applying technical skills with direct supervision during selected aspects of the occupational therapy process. The focus will be on select aspects of the OT process: and include chart reviews, assessments/evaluations, treatment planning, goal setting, discharge planning, and documentation. This particular placement provides the student with a final opportunity to conceptualize that occupational performance issues are manifested in all areas of practice throughout the lifespan and allows for hands on participation prior to the start of Level II Fieldwork.

**OTH 6604 Fieldwork Level II [A] (9).** One of two level II fieldwork experiences providing an in-depth experience in delivering occupational therapy services to clients. Students will complete a total of 24 weeks of Level II fieldwork. Each of the two level II fieldwork experiences will be at least 12 weeks in length. The settings will comprise a minimum of 12 weeks in hospital, community, or school based settings. At least three months of sustained full-time fieldwork is desirable. Fieldwork shall provide experience with various groups across the life span, with persons experiencing psychosocial and physical performance deficits, and with service delivery models reflective of current practice in the profession. To ensure continuity of application of academic concepts, all fieldwork shall be finished within the timeframe set forth by the ASU OT Fieldwork Handbook. Students may be required to travel and stay a significant distance away from the university at their own expense. Additionally, students will need computer access with internet capability on a weekly basis. Initially, supervision should be direct and then decrease to less direct supervision as appropriate for the setting, the severity of the client’s condition, and the ability of the student in accordance with the site-specific objectives.

**OTH 7704 – Level II [B] (9).** The second level II fieldwork experience provides an in-depth experience in delivering occupational therapy services to clients. Students will complete a total of 24 weeks of Level II fieldwork. Each of the two level II fieldwork experiences will be at least 12 weeks in length. The settings will comprise a minimum of 12 weeks in hospital, community, or school based settings. At least three months of sustained full-time fieldwork is desirable. Fieldwork shall provide experience with various groups across the life span, with persons experiencing psychosocial and physical performance deficits, and with service delivery models reflective of current practice in the profession. To ensure continuity of application of academic concepts, all fieldwork shall be finished within the timeframe set forth by the ASU OT Fieldwork Handbook. Students may be required to travel and stay a significant distance away from the university at their own expense. Additionally, students will need computer access with internet capability on a weekly basis. Initially, supervision should be direct and then decrease to less direct supervision as appropriate for the setting, the severity of the client’s condition, and the ability of the student in accordance with the site-specific objectives.

**PHYSICAL THERAPY (PTH)**

Prerequisites: Admission to the Physical Therapy program, concurrent enrollment and completion of all physical therapy courses and Program Director’s consent.

**New Curriculum as of 11/2012**

**Course Descriptions**

**PTH 631 Pathophysiology (3).** This course provides the foundational basis for physical therapists to engage in screening and differential diagnosis in each of the preferred practice patterns defined in the Guide to Physical Therapist Practice: Musculoskeletal, Neuromuscular, Cardiopulmonary, and Integumentary/Systems. This course integrates tissue pathology with clinical signs and symptoms of dysfunction, tests/measures used in the physical therapy examination, prognosis, plan of care and interventions (TRANSITIONAL TRACK ONLY).

**PTH 670 Research Methods (3).** This course provides an introduction to the concepts which guide physical therapy scientific inquiry and evidence for practice. The structured requirements for both quantitative and qualitative studies are explored along with their respective threat to validity, research error, and generalized ability. Sample hypotheses will be matched with appropriate designs and statistical computation (TRANSITIONAL TRACK ONLY).

**PTH 674 Clinical Research (3).** This course is designed to introduce or reintroduce students to the basic and advanced concepts, techniques, and principles of critical inquiry using applied clinical research. The focus will be on understanding quantitative aspects of clinical research literature. Topics to be investigated include measurement theory and the scientific method; the research process, experimental design, hypothesis construction and testing, measurement scales, sampling, indices of validity and reliability, statistical analyses, and critical evaluation of occupational language of statistics and what those statistics mean (TRANSITIONAL TRACK ONLY).

**PTH 678 Documentation.** This a comprehensive study of the Guide to Physical Therapist Practice will be undertaken. This document is now accepted nationally as the foundation for legal and ethical standards of practice. Current expectations for documenting patient care for medical records, reimbursement and verification for rehabilitative progresses are explored. Variances required accommodating for differences across practice settings, Client demographics, and fiscal resources are also included. (TRANSITIONAL TRACK ONLY).

**PTH 680 Evidence Based Practice (3).** This course is designed to prepare physical therapists with the knowledge, skills and abilities necessary to make independent judgments about the validity of clinical research and to implement
evidence-based clinical practice in their careers. This course will focus on the concepts of evidence-based practice with emphasis on forming answerable clinical questions and effective literature search strategies. The evaluative approach to appraising the research literature will prepare the students to judge the evidence on: 1) the accuracy and validity of diagnostic tests; 2) the effectiveness of clinical interventions; 3) the natural history of medical conditions; 4) risk of harm from select preventative and therapeutic interventions. Based on presentation of case scenarios, students will be required to formulate the key question(s), rapidly search the medical databases, appraise the evidence with a critical analysis and describe application of the evidence in a clinical context (TRANSITIONAL TRACK ONLY).

**PTH 690 Differential Diagnosis (3).** This course covers advanced concepts of probability based differential diagnosis as related to physical therapist practice. This course describes how to determine the current evidence for diagnosis using properties of diagnostic tests such as sensitivity, specificity, likelihood ratios and predictive values. Pathology of the major body systems and regions will be covered with current evidence based practice diagnostic standards as they are available in the professional literature. Competencies gained through the course are intended to help prepare the physical therapist to function as a direct access provider capable of making highly accurate diagnostic decisions according to the best available evidence (TRANSITIONAL TRACK ONLY).

**PTH 694 Diagnostic Tests (2).** This course is designed to cover the fundamental principles of radiographic imaging procedures, clinical laboratory methods, and interpretation of EKG, EEG, and EMG data. Students are expected to integrate the diagnostic utility of these procedures into clinical decision-making. Skill development necessary to recognize common normal and abnormal findings is the primary focus of this course (TRANSITIONAL TRACK ONLY).

**PTH 759 Clinical Pharmacology (2).** This course is designed to increase the experienced therapist’s understanding of the latest concepts in drug pharmacology. The principles of pharmaco-therapeutics, pharmacodynamics, and pharmacokinetics of broad categories of drugs will be emphasized. Special emphasis is placed on applying this knowledge to a spectrum of clinical problems which interact with various physical therapy interventions (TRANSITIONAL TRACK ONLY).

**PTH 794 Primary Care (2).** This course presents the framework for physical therapists to assume roles and responsibilities as primary care practitioners with respect to clinical reasoning and decision making. Disablement models, reflective practice theories and patient care management models are examined in depth. This course emphasizes the patient as the primary source of data. It presents the principles of evidence-based practice and provides opportunity to develop skills in constructing, finding and analyzing evidence. The concept of responsibility for the level of decision making expected in a doctoring profession permeates the course (TRANSITIONAL TRACK ONLY).

**PTH 795 Health Disparities (3).** This course is designed to introduce graduate physical therapists to the concepts of health disparities which exist as a consequence of race, ethnicity, social economic status or culture. The roles of health status indicators, cultural competency, and access to health services are debated. Students use national data from then Centers for Disease Control (CDC), The US Office of Minority Health, and the National Institutes of Medicine to construct arguments for the elimination of health disparities. The capstone experience in the course requires that students present a “model” for interventions designed to reduce health disparities in their local PT Practice (TRANSITIONAL TRACK ONLY).

**PTH 799.3 Professional Seminar: Applied Clinical Research In PT Practice (1).** In this seminar, students will identify a clinically appropriate research topic. The student will critically appraise the current literature on the chosen topic, identify an appropriate method/research design (case report, single-system, quasi-experimental, experimental, etc.) and describe in detail how the applied research project would be completed (TRANSITIONAL TRACK ONLY).

**PTH 799.4 Professional Seminar: Contemporary Issues In PT Practice (1).** In this seminar, students will identify a specific contemporary issue in physical therapist practice in which clear process guidelines have not been established. The student will critically appraise the current literature on the chosen topic, present findings in the form of a meta-analysis, and indicate the clinical implications of their findings in the form of a professional paper or presentation (TRANSITIONAL TRACK ONLY).

**PTH 799.5 Professional Seminar: Case Analysis In PT Practice (1).** In this seminar, students will identify a specific patient/population case and analyze the case using a model of enablement, disablement, or clinical decision making appropriate for current physical therapist practice. A thorough literature review, and implications for clinical practice will be components of the case analysis process (TRANSITIONAL TRACK ONLY).

**PTH 799.6 Professional Seminar: The Doctoring Profession (1).** In this seminar, students will be introduced to the roles and responsibilities of members of doctoring professions. Topics include autonomous practice, professionalism, legal and ethical issues, life-long learning, and professional competency (TRANSITIONAL TRACK ONLY).

**PHT-5110. Introduction to Physical Therapist Practice (1).** This course provides the students a perspective on the history, standards of practice, ethical codes, and philosophical assumptions of the physical therapy profession. The past, present, and future roles of the physical therapist within the changing health care system are explored and the importance
of teamwork in a diverse, multicultural environment is examined. This course lays the foundation for the basic tenets of health professions practice necessary to become a successful student and practitioner.

**PTH-5120. Human Embryology (1).** This is a companion course to be taken with Advanced Gross Human Anatomy, HSC5001. Designed to augment the information on adult anatomy presented in HSC5001, this course will examine the embryological origin and formation of the adult structures. Emphasis is placed on developmental anomalies which impact postnatal health.

**PTH-5190. Clinical Observation I (1).** This course provides the student with clinical observation experience working with a Physical Therapist and other healthcare providers. This experience can include observational experiences as well as hands on practice of basic skills like: self-introduction, palpation of bony and soft tissues, active and passive range of motion, patient handling skills, clinical observation of gait, transfers and transitional movements, use of common devices, vital signs, aseptic technique, and positioning and draping.

**PTH -5226. Applied Human Physiology (2).** This course involves the study of the essential physiological concepts of the human body necessary to maintain homeostasis. Emphasis is placed on understanding the dynamic inter-relationships of organ systems that regulate the function of the body. Integration of clinical cases will encourage students to think critically and prepare for the variety of medical conditions encountered in clinical practice. Topics include: muscle and cellular physiology, metabolism, components of blood, immunity as well as the study of the cardiovascular, respiratory, endocrine, reproductive, nervous, renal, and gastrointestinal systems.

**PTH-5236. Introduction to Therapeutic Exercise (2).** This course is designed to build on basic knowledge and provide a foundation of appropriate exercise principles and techniques. The student will apply mechanical and exercise physiology principles to therapeutic exercise programs. The opportunity to practice skills will be provided in the laboratory component of this course.

**PTH-5290. Clinical Observation II (1).** This course is a continuation of Clinical Observation I, which provides the student with clinical observation experience working with a Physical Therapist and other professionals. Students will also gain experience in manual muscle testing, goniometry, and therapeutic exercise.

**PTH-5321. Applied Pathology and Histology (3).** This course includes an introduction to the microscopic structure and cellular function of the major organs, the basic mechanisms of pathology, and a systematic study of specific diseases of organ systems. Emphasis will be placed on those diseases which produce neuromuscular, musculoskeletal, and cardiovascular dysfunction.

**PTH-5325. Educational Interventions (1).** This course will introduce the student to the latest evidence for planning, implementing, and assessing effective educational interventions in physical therapist practice. Course content is focused on clinical application using a process model of educational intervention and includes: educational theory related to learning by children and adults, effective teaching strategies, and health promotion/disease prevention concepts.

**PTH 5335-Physical Agents (2).** This course introduces students to the scientific basis for the mechanisms of action of various therapeutic interventions, their indications for use and their proper administration. The student will be required to integrate anatomical and physiological principles and demonstrate the proper application of cold, heat, light, sound, electricity and therapeutic massage to the human body. Emphasis will be placed on the development of clinical rationale and decision making.

**PTH-5391. Introduction to Clinical Practice (1).** This course introduces students to clinical practice for full time affiliations. Students will be introduced to professional APTA documents. Students will demonstrate a working knowledge of the APTA Clinical Performance Instrument. The ASU Physical Therapy Clinical Handbook which includes policy and procedures that govern clinical education will be covered. Students will also write objectives for the first clinical affiliation, and demonstrate competency in CPR by passing a CPR certification course and an online first aid course.

**PTH 5390. Clinical Affiliation I (2).** This is the first four week full time clinical experience in the student’s professional education program. The student will provide direct patient care under the supervision of a physical therapist. Students are expected to begin initial evaluations, intervention planning, intervention implementation/ modification, and exposure to discharge summaries. Students will gain experience in manual muscle testing, goniometry, palpation of bony/soft tissues, therapeutic exercise, bed mobility, transitional movements, use of common gait devices, vital signs, aseptic technique, active/passive range of motion, patient handling skills, clinical observation of gait, transfers, positioning and draping.

**PTH 6433. Introduction to Prosthetics & Orthotics (1).** This course will examine the causes of upper and lower extremity amputations, indications, and contraindications for orthotic/prosthetic devices. Evaluation and treatment of patients with amputations, selection, ordering, fitting, and training in the use of prosthetic/orthotic devices will also be covered. Guest speakers will be utilized to present topics within their areas of expertise.
PTH 6443. Introduction to Orthopedic Physical Therapy (4). This course will expose students to the examination and evaluation of patients with musculoskeletal injuries of the extremities and spine. This course will integrate the concepts from embryology, physiology, histology, pathology, and biomechanics to help students understand the scientific basis for treatment of these conditions and the tools used to treat these conditions. The emphasis of this course is surgical as well as non-surgical management of these injuries.

PTH 6453. Introduction to Neurologic Physical Therapy (3). This course will introduce the students to the clinical applications of motor control and motor learning theories as related to patients with neurological dysfunctions. Students will be expected to apply knowledge learned in previous anatomy, neuroscience, physiology, and pathology course work to the patient with neurological disorders. By using a functional approach to examination of balance and mobility disorders as related to specific neurological pathologies and conditions affecting the adult, this course will promote an understanding of normal motor movement and the effects of various neurological conditions (both central and peripheral) on the control of movement. The principles of case/patient management as outlined in the Guide to Physical Therapist Practice will be utilized.

PTH-6463. Introduction to Cardiopulmonary Rehabilitation (2).
This course will review cardiopulmonary anatomy, physiology, and pathophysiology. In addition, students will be introduced to normal and abnormal responses of the cardiopulmonary system during exercise. Emphasis will be placed on patient evaluation, treatment implementation and progression.

PTH 6534. Differential Diagnosis and Imaging (3).
This course will present evaluation, assessment, diagnosis, prognosis, and clinical decision-making procedures primarily for the orthopedic patient population. An emphasis will be placed on history and physical examination, imaging processes and laboratory studies and special tests.

PTH 6543. Clinical Orthopedics (3).
This course will apply the exercise principles and techniques presented in Introduction of Therapeutic Exercise to the conditions presented in Introduction to Orthopedics in accordance with evidence-based practice. The student will learn current rationale for basic approaches to exercise of joints, muscles, and other soft tissue conditions including joint mobilization of extremities and spine and therapeutic taping. They will also learn to effectively prescribe and administer therapeutic exercise programs. The opportunity to practice skills will be provided in the laboratory component of this course.

PTH 6553. Clinical Neurologic Physical Therapy (3).
This course is a continuation of PTH 6453-Introduction to Neurological Physical Therapy. The focus is on applying the principles of motor control and motor learning to the evaluation and treatment of motor dysfunction in the adult and pediatric patient with neurologic dysfunction. Current theory and practice of neurotherapeutic interventions including, but not limited to, Neurodevelopment Treatment (NDT), Proprioceptive Neuromuscular Facilitation (PNF), Constraint Induced (CI), Rood, Brunnstrom, Sensory Integration are covered. Master Clinicians may be utilized as guest speakers to present topics related to their expertise.

PTH 6563. Clinical Cardiopulmonary Physical Therapy (3). This course is a continuation of PTH 6463 Introduction to Cardiopulmonary Rehabilitation, with emphasis placed on patient evaluation of commonly diagnosed pathologies across the life span and in various physical therapy rehabilitation settings; the use of assessment and treatment protocols and tools; and treatment implementation, progression, and precautions.

PTH 6573. Clinical Integumentary Physical Therapy (1). This course will be a continuation of PTH 6473 with a greater focus on clinical interventions. Case studies and practical application will allow the student to become proficient in utilizing the various forms of debridement, dressings, and interventions that will enhance wound management. Laboratory and clinic visits will allow practical psychomotor skill development.

PTH-6583. Acute Care Practice (2). This course will introduce the student to the acute care clinical environment, and highlight the structural and functional components of providing physical therapy care in this setting. Content of this course will include a review of common practices in acute care settings and equipment types and uses. A systems-based approach to providing physical therapy in an acute care setting (i.e., orthopedics, neurologic, cardiac, etc.) will be presented.

PTH 6690. Clinical Affiliation II (5). This is the second level of planned clinical experience in the student’s professional education program. The student will provide direct patient care under the supervision of a physical therapist. Students are expected to perform initial evaluations, treatment planning, treatment implementation and modification, and discharge summaries. An attempt will be made to place students, who desire a concentrated area of clinical training, in centers that offer specialty areas in the clinical settings.
PTH-7782. Geriatrics (3). This course examines the physical, cognitive, psychosocial, physiological and functional changes associated with normal and pathologic aging. General principles of geriatric rehabilitation and unique considerations specific to the elderly will be discussed. Clinical Decision making through the use of case studies will allow students to work independently and in groups to improve their application of Physical therapy interventions with the aging adults. Prior understanding of the Guide to Physical Therapist Practice Preferred Practice Patterns and Pharmacology is necessary.

PTH-7783. Pediatrics (3). This course emphasizes child and adolescent development, clinical examinations, standardized tools for evaluations, and intervention. The relationship of human development and family dynamics to overall pediatric physical therapy management will be analyzed. Differential diagnosis related to pertinent pediatric conditions will also be addressed.

PTH-7784. Gender Health (2). This course will be both lecture and lab and will assist the student in developing a knowledge of gender specific health care issues across the spectrum of life. The students are expected to have a basic knowledge of anatomy and physiology that is gender specific prior to taking this course. Women’s health issues that include preadolescent, puberty, childbearing and post menopause changes in respect to physiology/anatomy issues will be presented. Men’s health issues affecting puberty and later life will also be presented.

PTH 7785. Health Promotion and Wellness (2). This course develops skill in patient assessment and problem-solving, with emphasis on preventative health practices. By exploring strategies used by physical therapists to promote health in the work environment and various patient populations, the student will develop skills to become an advocate for health and wellness across the lifespan.

PTH-7789. Directed Independent Study (2). This is an arranged course. The student and faculty member work collaboratively to design a directed study project on an agreed topic. The course should be arranged during the first week of the term, and should be completed no later than the final week of the term.

PTH 7790. Clinical Affiliation III (4). This is the third level of planned clinical experience in the student’s professional education program. The student will provide direct patient care under the supervision of a physical therapist. Students are expected to perform initial evaluations, treatment planning, treatment implementation and modification, and discharge summaries. An attempt will be made to place students, who desire a concentrated area of clinical training, in centers that offer specialty areas in the clinical settings.

PTH-7825. Health Disparities (3). This course will provide students with an in depth exploration of health disparities which exist in the United States as a consequence of race, ethnicity, social economic status, or culture. The roles of health status indicators, social determinants of health, cultural competency, and access to health services are discussed and debated. Students will use national data from the Centers for Disease Control (CDC), the US Office of Minority Health, and the National Institutes of Medicine to construct arguments to promote health equity and eliminate health disparities.

PTH-7826. Administration and Practice Management (2). This course will focus on the development, operation, and delivery of physical therapy services in a variety of settings. The course will provide a glimpse of primary business disciplines including management, marketing, and budgeting. This course will expose the students to the current healthcare system in the US as well as the legal and regulatory policies that affect the system. Emphasis will be placed on the therapist/client relationship, PT/PTA relationship, and proper documentation for billing.

PTH-7849. Spinal Thrust Manipulation (2). This course provides technical training in the practice of spinal orthopedic manual therapy. The emphasis is to expose the advanced student to the current and clinical rationale of high-velocity low amplitude full spine manipulative thrust procedures as an optional form of therapeutic intervention as currently practiced within the profession of physical therapy. Supplemental exposure to diagnostic imaging and laboratory studies will be included as required to provide the student with an integrated approach to practice.

PTH-7886. Sports Physical Therapy (2). This course focuses on sports-related injuries involving the pediatric, adult, and geriatric athlete. This course will also introduce students to special populations that include: amateur athletes, professional athletes, and athletes with disabilities. Additional emphasis will be placed on the management and treatment of concussion, weight management in wrestling, and extreme athletes, i.e., tri-athletes. Students will also explore the Paralympics, Special Olympics, and senior Olympics.

PTH-7890. Clinical Affiliation IV (4). This course is the fourth level of planned clinical experience in the student’s professional education program. The student will have the opportunity to administer direct patient care, administrative, and consultative services under the supervision of a physical therapist. Emphasis is placed on initial evaluations, treatment planning, treatment implementation, modification, delegation, and discharge summaries.

PTH-7990. Clinical Affiliation V (5). This course is the final level of planned clinical experience in the student’s professional education program. The student will be provided the opportunity to administer direct patient care, administrative, and consultative services under the
supervision of a physical therapist. Emphasis is placed on initial evaluations, treatment planning, treatment implementation, modification, delegation, and discharge summaries.

REHABILITATION COUNSELING (RCOU)

RCOU 502. Counseling Theories & Techniques (3). This course is designed to provide rehabilitation counseling students with the skills, information, and resources necessary to develop a clear understanding of basic counseling theories and develop basic counseling/helping skills.

RCOU 503. Vocational and Career Development (3). In this course students will be exposed to the vocational aspects of disabilities, including theories and approaches to career development and exploration as well as occupational information, labor market trends, and the importance of meaningful employment with a career focus.

RCOU 511. Foundations of Rehabilitation Counseling (3). This course allows for an introduction to the field of vocational rehabilitation by presenting information on the history and development of the field, legal and legislative aspects of vocational rehabilitation, the role and function of the vocational rehabilitation professional, current practices and trends in the field, and various groups of persons with disabilities. The purpose of this course is to help students gain knowledge of the history of disability in the United States and the development of the field of vocational rehabilitation.

RCOU 513. Medical Aspects of Disability (3). This course is designed to address basic medical terms, functional limitations, developmental consequences and other impacts of disabling conditions commonly encountered by rehabilitation professionals. Vocational implications for rehabilitation professionals are explored.

RCOU 514. Psychosocial Aspects of Disability (3). Students will be provided with an overview of the psychological and social aspects of disability with an emphasis placed on diversity of experience among individuals with disabilities and their families. The impact of social and psychological aspects of disability on public attitudes, public policy, and law will be examined. The adjustment process experience by individuals with disabilities and their families will be examined from the perspective of the individual and social context in which adjustment occurs.

RCOU 515. Legal and Ethical Aspects of Rehabilitation Counseling (3). This course provides identification and implementation of laws and ethical standards affecting rehabilitation counseling practice, with examples of their application and use in professional decision making.

RCOU 518. Multi-Cultural Counseling Issues (3). This course will provide students with current knowledge of appropriate multicultural competencies as it pertains to providing rehabilitation counseling to individuals with disabilities. In addition, students’ awareness and attitudes based on such factors as age, race, religious association, disability, gender, sexual orientation, ethnicity, family patterns, and socioeconomic status will also be explored.

RCOU 524. Group Counseling (3). This course is a survey of theories and methodologies used in group counseling in the field of rehabilitation with emphasis on utilization with diverse populations.

RCOU 531. Job Development and Placement (3). Students will be given an overview of employment development, job seeking and job retention factors that pertain to employment, and job seeking skills training for persons with disabilities who participate in rehabilitation programs will be examined. Students will complete a professional portfolio, labor market O*Net assignment, transferability of work skills analysis, and job analysis.

RCOU 533. Case Management in Rehabilitation Counseling (3). This course is designed to help students understand the case management process, including case finding, service coordination, referral to and utilization of other disciplines and client advocacy. Students will learn how to plan for the provision of independent living services and vocational rehabilitation services. Students are required to identify and use community resources and services in rehabilitation planning utilizing computer applications and technology for caseload management, functional assessment and job matching.

RCOU 611. Rehabilitation Practicum (3). This course is to provide students with experiences within the clinical experience. Students will observe and learn basic rehabilitation counseling skills from trained rehabilitation counselors with CRC credentials. Students will incorporate on campus classroom experiences while dealing with rehabilitation counseling concerns and clinical experiences. Successful completion of this 100 hour course is a prerequisite to the supervised rehabilitation counseling clinical internship experience.

RCOU 613. Assistive Technology in Rehabilitation Counseling (3). This course will provide students with a general overview of theoretical and applied concepts of assistive technology. Students will be exposed to assistive technology resources for individuals with disabilities; best practices in assessing individuals with disabilities that include referral, evaluation, and planning for home and work place accommodations.

RCOU 615. Vocational Assessment and Evaluation (3). This course will provide students with an understanding of basic statistical concepts; a working knowledge of test selection, administration, interpretation of test results and communication of findings in a comprehensive vocational evaluation report. A major emphasis will be on the application of the procedures and utilization of work related
behavioral observations, individual evaluation plans, vocational counseling, standardized tests, work samples, and situational assessments.

RCOU 617. Research Methods (3). This course is designed to provide students with the skills, information, and resources necessary to develop a clear understanding of research methods for rehabilitation counseling. Specifically, students will learn to review appropriate literature, participate in library and database research for rehabilitation related information, read and understand basic statistics and research methods (qualitative and quantitative), understand importance of outcomes-based research for effective practice, and apply ethical, legal, and cultural competence to basic research and evaluation.

RCOU 618. Rehabilitation Administration (3). Students will be given an overview of organizational structures and management techniques within propriety and non-proprietary rehabilitation and human service agencies. Students will be exposed to the utilization of program evaluation systems and establish basic understanding of fiscal management strategies.

RCOU 621. Rehabilitation Internship (6). The internship is designed to provide rehabilitation counseling students with a variety of professional leading experiences through the completion of prescribed activities in a rehabilitation organization under the supervision of a rehabilitation counselor with CRC credentials. The major focus of the course will be the integration and application of classroom and field based knowledge gained throughout the Rehabilitation Counseling program. Students are required to complete a minimum of 600 clock hours during Internship.

RCOU 632. Human Growth and Development (3). This course will provide rehabilitation counseling students with a comprehensive study of human growth development for helping professionals. This course will review theories related to human development across the life span and their implications and applications with persons with disabilities. Topics will include physical, emotional, moral, and cognitive development and the interaction of development and disability; human sexuality and disability; spiritually and religious aspects; transition issues as they relate to family, school, employment, aging, and disability; social and learning needs of individuals across the life span, and ethical and legal issues impacting individuals and families related to adjustment and transition.

COLLEGE OF LIBERAL ARTS AND SOCIAL SCIENCES

ENGLISH (ENG)

ENG 500. Modern Grammar (3). A study of modern concepts and practices in teaching grammar and usage.

ENG 501. General Language (3). Basic concepts of language, such as case, tense, aspect, number, and syntactical relationships of words are discussed, with illustrations from various languages. Some consideration is given to language history and regional varieties, language as an ever-changing structure, and modern linguistic attitude.

ENG 502. Chaucer (3). A study of the complete works of Chaucer with some emphasis on the language of the period as aid to the appreciation of Chaucer’s metrical patterns.

ENG 507. The Twentieth-Century Novel (3). Novels are selected to give the student some experience with American, continental, and world fiction, and to show that the writers of fiction in every country have been concerned with basically the same problems of form and content.

ENG 509. The English Novel (3). A comprehensive survey of the historical development of the English novel from its beginnings in the 18th century, through the 19th, and into the 20th.

ENG 517. Types of Comparative Literature (3). Accepted masterpieces of world literature are studied through comparison of content structure and style.

ENG 523. Seminar in Comparative Literature (3). A study of selected works in world literature by type or theme. Emphasis will vary.

ENG 524. Seminar in American Fiction (3). Advanced study of major American writers of fiction, literary movements, and various aspects of fiction in American literature.

ENG 529. Seminar in Nineteenth-Century English Literature (3). A study of the literary movements and the major writers of the century.

ENG 530. The Teaching of English in the Secondary School (3). Literature, research, curriculum, and teaching techniques in secondary school English; experimental programs; gradation of subject matter; criteria for program evaluation; and basic issues.

ENG 600, 601, 602. Advanced English Seminar (3) (3) (3). Critical examination and discussion of recent experimental and theoretical developments in English language and literature. Open only to candidates for advanced professional programs.

ENG 621. Seminar in the History of the English Language (3). A study of the major phonological, morphological, syntactic, and lexical changes in English from the beginning to the present; grammar of modern English, dialectology.
ENG 626. Independent Study in Grammar and Literature (3). Students pursue advanced problems of special interest in English and literature. Reading research, etc., under the direction of a faculty member. Open only to candidates for advanced professional programs.

ENG 628, 629. Practicum: Teaching English in the Community College (3) (3). A course designed to prepare effective prospective junior college English teachers. Preservice information as well as actual teaching experience at the junior college level are emphasized. Open only to candidates for advanced professional programs.

ENG 630. The Teaching of English in the Secondary School (3). Literature, research, curriculum, and teaching techniques in secondary school English; experimental programs, gradation of subject matter, criteria for program evaluation; and basic issues.

FORENSIC SCIENCE (FRS)

FRS 550. Forensic Science Seminar (1). Discussion of recently published experimental findings and advances in the forensic sciences. Students will also be expected to present their research findings.

FRS 560. Research Proposal Presentation (1). Written research proposals are the primary instruments that scientists use to other people (agencies or employers) to fund our work. Writing a proposal is a complex process that connects insight and creativity (new ideas) with established theory (literature precedent). In this course, the student prepares a written scientific proposal for evaluation by their Advisory Committee.

FRS 565. Thesis Research (3 – 10). Thesis represents the course designation for a Master’s Degree Research Thesis in Forensic Sciences. Before a student registers for this class, he/she should begin thinking about the process that leads to successful completion of this project. Possible Thesis topics should be formulated by the student and discussed with an advisor or the potential Thesis Director. In order to successfully complete the Thesis, several organizational and administrative steps must be completed. This course is taken over several semesters for a total credit count of 10.

FRS 566. Forensic Science Internship (3). Opportunity to shadow an examiner in their discipline or section of interest. This shadowing shall include observing how atypical samples are received, processed through the laboratory, and how data is analyzed and reported. If possible students are encouraged to view expert testimony of an examiner. A minimum of 200 contact hours is required. The internship should be done in a laboratory.

FRS 570. Ethics and Professional Responsibilities (2) Study of ethics and ethical problems in forensic science, including codes of professional responsibility and the forensic scientist’s professional responsibilities in different types of laboratory, legal and criminal justice settings and analysis and discussion of case studies.

FRS 642. Principles of Forensic Toxicology (4). To introduce the student to the practices and policies of Forensic Toxicology. Give the student basic guidelines on how to analytically approach samples of suspected toxins as well as samples where no information is available as to what toxic substance, if any, may be present. The course will also cover problems in interpretation of analytical findings along with those methods that are considered insufficient for trial and those that are considered the gold standards as accepted by today’s judiciary.

FRS 644. Advanced Forensic Toxicology (3). Advanced Forensic Toxicology is a course designed for the toxicology student interested in broadening his/her experience into the sciences of toxins (poisons) and their influences on biological systems and the environment. Course content will cover specific toxicant types (poisons, pesticides, solvents, oils, estrogen, estrogen mimics, triclosan, carcinogens, teratogens, natural toxins and pollutants), adsorption, distribution, metabolism, biological elimination, sequestration, and remediation.

FRS 650. Forensic Serology (2). Instruction in identifying body fluids and body fluid stains using various biochemical, instrumental, microscopic and electrophoretic methods to determine their possible origin and species prior to forensic DNA analysis. Blood spatter pattern recognition will be described and used in determining the most probative samples for study at the crime scene and on evidence samples to undergo analysis. This course must be taken concurrently with FRS651.

FRS 651. Forensic Serology Lab (2). Laboratory practice in identifying body fluids and body fluid stains using various biochemical, instrumental, microscopic and electrophoretic methods to determine their possible origin and species prior to forensic DNA analysis. Blood spatter pattern recognition will be described and used in determining the most probative samples for study at the crime scene and on evidence samples to undergo analysis. This course must be taken concurrently with FRS 650.

FRS 655. Expert Testimony in Forensic Science (3). This course covers contemporary developments in the field of Forensic law, and the admission of scientific evidence into a court of law. The historical development of Forensic Science and the admissibility of scientific evidence under State and Federal Rules of Evidence will be examined and discussed in depth. Several of the most common scientific techniques will
be examined to include DNA, Speed Detection, Fingerprint Science, and Alcohol Intoxication Testing. Students will participate in courtroom exercises.

**FRS 660. Forensic Science Laboratory Internship (9).** Opportunity to shadow an examiner in their discipline or section of interest. This shadowing shall include observing how atypical samples are received, processed through the laboratory, and how data is analyzed and reported. If possible students are encouraged to actively participate in laboratory functions and view expert testimony of an examiner. This internship must be done in a laboratory. A minimum of 200 contact hours is required.

**FRS 661. Analysis of Pattern Evidence (3).** Students will be introduced to pattern and impression evidence and the methods of analysis and interpretation connected to that type of evidence. Pattern and impression evidence includes markings produced when one object comes into contact with another object. Examples of pattern evidence include fingerprints, shoeprints, firearms/toolmarks, blood spatter patterns, bite marks, handwriting comparison, cut and tear matching and tire treads. Emphasis will be placed on the proper documentation, handling, packaging, and transport of physical evidence from crime scenes. Students will also be introduced to basic concepts in criminalistics, such as identification and individualization.

**FRS 662. Firearms and Toolmarks Lab (1).** This laboratory introduces the student to practical examinations utilized by the forensic scientist in a forensic firearms and tool mark laboratory. The student will be given practical exercises to process samples as related to forensic firearms and tool mark identification. This will include comparison microscopy of fired ammunition components; identify ammunition components, the maintenance and quality control of equipment utilized by the firearm and tool marks laboratory, the examination of items for gun powder residue, the proper packaging and documentation of evidence samples received. This course must be taken concurrently with FRS 694.

**FRS 663. Forensic Biology (4).** This is an overview of the biological evidence and techniques used in forensic science. Topics will include serological study, hair and fiber analysis, fingerprinting, pathology used in identification and trauma to the human body, blood spatter patterns, and toxicology. The course will also include an examination of the techniques used in recovery, replication and analysis of DNA that contributes to DNA profiling, particularly RFLP, VNTR, and STR-PCR analysis, and an overview of population variability and demographics.

**FRS 664. Forensic Chemistry (4).** The study is of the chemistry, physics, and legal issues of forensic science. Topics typically include the legal aspects of forensic science, drug analysis, forensic toxicology, explosives and arson investigation, glass analysis, hair and fiber analysis, paint analysis, blood and semen analysis, soil examination, blood and breath alcohol content analysis, questioned document examination, and firearm examination.

**FRS 655. Forensic Analysis: CIS, Ethics & Professional Responsibility (4).** This course will focus on issues which the forensic scientist must be aware of when working in a forensic science laboratory in both the private and public sectors. These will include but not be limited to discussions of the following issues: Ethical responsibilities of a forensic scientist in conducting analyses, writing reports, and testifying in court; Examples of ethical problems which issues which have occurred and impact trust in forensic science laboratories; Codes of Conduct and what they mean; Development of a cultural awareness of how forensic sciences has evolved over the last 25 years; using the library and other resources to search the literature when conducting forensic science research; The requirements for quality assurance systems and quality control to maximize the effectiveness of the laboratory work-product; Accreditation of forensic science laboratories and the certification of forensic scientists; Employment in a forensic science laboratory: search for opening, writing resumes, preparing for interviews, and following-up with employers.

**FRS 672. Chemistry and Analysis of Drugs (3).** Discusses aspects of drug chemistry relevant to understanding the properties, physiological effects, and techniques used for the separation, analysis, and identification of drugs. Emphasis is on controlled substances.

**FRS 673. Chemistry and Analysis of Arson and Explosive Evidence (3).** An examination of the basic organic chemistry and combustion and explosive properties of flammable materials. The chemical principles underlying fires and explosions. Chemical properties of various synthetic materials and the products of their combustion. Fire retardant materials and chemicals used in fire extinguishment.

**FR 676. Advanced Forensic DNA Analysis (3).** The goals of this course are to ensure that students understand how to identify and sample biological evidence for DNA analysis, understand, including the importance of evidence collection at the crime scene and how surfaces, materials and sources relate to sampling strategies. They will also learn the scientific principles behind DNA analysis techniques and the DNA analysis protocols. They will also learn how to write consultation reports that reflect test findings and how forensic DNA testimony is given at the deposition.

**FRS 677. Population Genetics (3).** This course is designed to provide students with a general introduction to population genetics, which examines the interaction of basic evolutionary processes (including mutation, natural selection, genetic drift, inbreeding, recombination, and gene flow) in determining the genetic composition and evolutionary trajectories of natural populations. An understanding of the mechanisms shaping genetic variation within and between populations is critical to understanding the course of adaptive evolution and is increasingly being recognized as a critical component of
medical research and the development of effective treatments for disease. Both the classic models and insights of the modern evolutionary synthesis and more recently developed approaches based on coalescent theory are considered.

FRS 681. Analysis of Fire Debris & Explosives (3). The techniques of crime scene investigation as they relate to fire and explosion scenes. Evidence is recognition and collection. Laboratory analysis of fire scene, arson accelerant, explosion scene residues and scientific proof of arson.

FRS 682. Forensic Analysis of Paint & Polymers (3). Covers topics in paint and polymer analysis including collection, classification and analysis of paint and fiber evidence as applied to forensic casework. The course covers the theoretical and practical aspects, using lectures and laboratory exercises. Laboratory exercises include hands-on instruction with appropriate instrumentation and techniques, including stereomicroscopy, microchemical testing, FT-IR and polarizing light microscopy;

FRS 692. Forensic Science Special Topics (1-3). Selected topics in forensic science determined by instructor. This course may be repeated for credit.

FRS 693. Quality Assurance in Forensic Science (2). The course describes the development and implementation of quality assurance and quality control procedures in order to ensure the excellence of a laboratory. It covers preparation of laboratory guidelines, protocol, procedures and policies, use of appropriate standards and controls, and validation methods for establishing an effective quality assurance program in a forensic laboratory.

FRS 694. Firearms & Toolmark Identification Lecture (3). This course introduces the student to the theory and practical science involved in the area of forensic firearms and tool mark identification. This course covers the history of firearms identification, evolution of propellants and firearms, the manufacturing techniques of firearms and tools, ammunition components and assembly, the examination of class and individual characteristics of fired ammunition components and the relation to a firearm by tool marks utilizing comparison microscopy, equipment and instrumentation utilized by the forensic scientist in this area and the characterization of gun powder residue utilizing chemical testing and microscopy. This course must be taken concurrently with FRS 662.

FRS 696. Instrumentation in Forensic Chemistry (3). The purpose of this course is to deepen the student’s understanding of the use of instrumental chemical techniques to the analyses of physical evidence materials of forensic import. The course includes lectures and has as laboratory sessions. At the conclusion of the course the student will understand the use and operation of certain types of chemical instrumentation and their application to forensic analytical problems. This course is concentrated on spectroscopy and chromatography, although other instrumentation topics will be covered.

FRS 699. Thesis Defense (1). This course serves a dual role. First and foremost, it is a forum to foster a research culture in the department and discuss the theoretical and practical issues of conducting research and completing a graduate degree in Forensic Science. As such, all Forensic Science graduate students are welcome and encouraged to attend the scheduled lectures, presentations, and seminar. Second, this course is a graduation requirement for all Masters. For that purpose, the goal is to learn the practical skills of giving a presentation and writing a research paper.

GEOGRAPHY (GEO)

GEO 502. Advanced Urban Geography (3). This course provides an organized and balanced urban analysis and includes an examination of urban functions, growth, and interrelationships among people and urban activities.

GEO 512. Geography of Africa (3). A regional analysis of the physical and human environment of Africa.

HISTORY (HIS)

HIS 500. Historiography (3). A study of the nature of history, how to study history, and the pursuit of reliable evidence. It also includes familiarization with library catalogs, bibliographies, and indexes, and analysis and interpretation of selected historians and their work, and the writing of a major research paper.

HIS 501. World History since 1900 (3). A study of significant cultural, economic, military, political, and social developments in the world since 1900.

HIS 502. Slavery and the Abolitionist Movement (3). A study of antebellum slavery the efforts to eradicate it, concentrating on the nature of slavery in the period before the
Civil War, slave culture, slave resistance, and the role of abolitionists and antislavery societies in the movement to destroy human bondage in the United States.

HIS 504. The Civil Rights Movement and the Black Power Revolt (3). An examination of the modern civil rights movement and the revolt against it by black militants, with emphasis on the conditions leading to the development of this period, the philosophy upon which it was based, important leaders, and organizations and events of the era.

HIS 515. Renaissance and Reformation (3). A survey of European history, 1300-1648, with emphasis on the intellectual and political impact of the Renaissance and Reformation on European life and culture.

HIS 520. Modern African History Since 1945 (3). An in-depth analysis of Sub-Sahara Africa’s most tumultuous historical experience, as the continent changed its social-political character and headed for a future in a highly developed and competitive global environment.

HIS 521. English Constitutional History (3). A study of the evolution of the English political system and its institutions, laws, and customs from the medieval Anglo-Saxon period to the present day.

HIS 525. Russian History: 1917 to 1991(3). The study of Russian history from its czarist stage, the origin of the Soviet Communist state, the period of Soviet totalitarianism, to the overthrow of the Communist Party and the disintegration of the Soviet Union.

HIS 530. The Two World Wars — The Circle Completed, 1914-1945 (3). A study of the causes of World War I and II, with emphasis on the relationship of the world’s political and economic condition during World War I to those same conditions of World War II.

HIS 535. Diplomatic History of the U.S. (3). A diplomatic history of the United States from the American Revolution to the present. Special attention is given to the development and use of the economic, political, social, military and naval power necessary to give support to policy.

HIS 552. The Colonial Period in American History (3). This course covers events in American history from 1492 to 1789, with special emphasis on the American Indian, exploration and settlement, European colonization, slavery, colonial wars, the Revolutionary War, and the new nation under the Articles of Confederation and the United States Constitution.

HIS 575. The Great Depression and the New Deal (3). An examination of the situation leading to and important aspects of the Great Depression and the New Deal, with the emphasis on the presidencies of the Herbert Hoover and Franklin D. Roosevelt.

HIS 580. Economic History of the United States (3). A survey to acquaint the student with the origins of basic economic institutions in Europe followed by a detailed study of the historical development of these institutions in the United States.

HIS 585. The Cold War (3). A study of the origin, the development, important events and significance of the Cold War.

HIS 586. American Diplomatic History Since 1870 (3). A study of American foreign policy with emphasis on the historical events and personalities shaping it. An analysis of the machinery and operation of the diplomatic service.

HIS 590. Seminar in American History (3). Intensive reading and research of selected topics in American history. Topic varies each term.

HIS 592. American Urban History (3). The first half of the course deals with the 19th century, the second half with the 20th century. The approach of the course is topical. It discusses urban problems such as reform movements, the black ghetto, the relation between crime and justice, or wealth and poverty. The growth and role of the city in American history, problems resulting from organization, with emphasis on minorities in American urban development.

HIS 595. Research and Thesis I (3). A course taken by student while writing the master’s thesis; includes submission of the master’s thesis proposal and the executive of research toward the final document.

HIS 596. Research and Thesis II (3). A course taken by students while writing the master’s thesis includes the completion of the research project, submission of the
document to the departmental thesis committee, and defense of the thesis.

**HIS 625. Problems in the Far East in the Twentieth Century (3).** A survey of the historical relations among Japan, China, Russia, and the United States in the Far East with special emphasis on their effect on contemporary events.

**HIS 642. The Gilded Age (3).** The history of the United States from the end of Reconstruction to the 20th century, emphasizing the impact of industrialization and urbanization upon politics, diplomacy, agriculture, labor, religion, thought and living conditions.

**HIS 643. The South in the Twentieth Century (3).** Political, economic, social and cultural developments in the American South from Reconstruction to the present.

**HIS 647. Relations of the United States to Latin America (3).** Latin America from preconquest to about 1850. The Indian background, the conquest, the colonial period and the wars of independence are considered with reference to their effect on present-day Latin America.

**SOCILOGY (SOC)**

**SOC 502. Sociological Theory (3).** An analysis of the development and contributions of major sociological theories, with special emphasis on contemporary theories and theorists.

**SOC 503. The Community (3).** A survey of sociological perspectives and research on community; the Institutional structure of rural, urban, and suburban communities; and community leadership patterns, action, and change.

**SOC 504. Sociology of Aging (3).** A study of sociological concepts, theories, and research findings related to understanding the aged and their relationship with other segments of population.

**SOC 505. Sociology of Education (3).** A study of the structure and function of education as a social institution in modern societies; and analysis of the interrelationships between education and other societal institutions such as the family, political, economic, and religious institutions; an examination of the impact of current social policies on education.

**SOC 506. Foundations of Sociological Analysis (3).** An analysis of social scientific inquiry, with special emphasis on research concepts, procedures, and techniques that are employed in sociological research.

**SOC 512. Social Movements (3).** A survey of theoretical models and study cases of social movements, with particular emphasis on contemporary movements that have succeeded in influencing the larger society.

**SOC 514. Sociology of Childhood (3).** A study of representative theories and research findings related to child development, with particular emphasis on the influence of the socialization process and agents of socialization on child development.

**SOC 570. Sociology of Health and Illness (3).** Study of social psychological influences of illness, including overview of theories, epidemiology and demographics. Exploration into relationships of patients and physicians, nurses and other health professionals, study of available health alternatives, current update into environmental effects on individual health, medical cost, preventive health and national health insurance.

**COLLEGE OF SCIENCE, MATHEMATICS AND TECHNOLOGY**

**BIOLOGY (BIO)**

**BIO 500. Graduate Seminar in Biology (1).** Discussion of recently published experimental findings and advances in biological and biomedical research.

**BIO 503. Advanced Ecology (4).** Examination of the interrelationships of living organisms, plants, and animals, and their environment; populations, communities, and ecosystems; role of population genetics, adaptation and evolutionary theory in ecology. Prerequisite: Course in ecology (BIO 310), or instructor’s consent.

**BIO 504. Nonvascular Plants (4).** The morphology, taxonomy, physiology, and economic importance of the algae, fungi and mosses. Prerequisite: Course in general botany (BIO 241), or instructor’s consent.

**BIO 505. Vascular Plants (4).** The morphology, taxonomy, physiology and economic importance of the ferns and seed plants. Prerequisite: Course in general botany (BIO 241), or instructor’s consent.
BIO 506. Mammalian Physiology (4). Principles of physiology as related to mammalian systems. The operation of systems such as respiratory, cardiovascular, neuromuscular and endocrine are discussed. Prerequisite: Animal Physiology (BIO 320), or instructor’s consent.

BIO 508. Advanced Parasitology (4). A consideration of the anatomy, physiology, life-history, and habits of representative parasites of man and his domestic animals: Means of detection, prevention and control are emphasized. Prerequisite: General Zoology.

BIO 510. Advanced Microbiology (4). An advanced-level course dealing with the isolation, growth, morphology, and physiology of various microorganisms; principles of immunology, serology, and epidemiology; and properties of microorganisms associated with infectious disease. Prerequisite: Introductory-level course in microbiology (BIO 423), or instructor’s consent.

BIO 515. Cytogenetics (4). A course which focuses on the cytological or chromosomal basis of genetic inheritance. It examines the construction of cytogenetic ultra structural or molecular models of chromosomes, genes, cistrons, replicons and other relevant structures. Prerequisite: Molecular Biology and Genetics (BIO 420), or instructor’s consent.

BIO 517. Cell and Molecular Biology (4). An analysis of contemporary views of cell structure, function, and growth in biochemical and molecular terms. Prerequisite: Cell Biology (BIO 337), Molecular Biology and Genetics (BIO 420), or instructor’s consent.

BIO 507. Endocrinology (4). The study of hormone function. Consideration will be given to the role of hormones in growth, development, metabolism, homeostasis and reproduction. Prerequisite: Courses in physiology and biochemistry or instructor’s consent.

BIO 609. Protozoology (4). The biology of protozoans with emphasis on taxonomy, life-history, and physiology. Consideration will be given to recent research in the field. Prerequisite: General Zoology.

BIO 611. Physiological Chemistry (4). A comprehensive course concerned with the major chemical constituents of cells; enzyme catalysis and general metabolism; chemistry of body fluids and specialized tissues; biochemistry of endocrine glands; and nutritional requirements of man. Prerequisite: Introductory-level course in biochemistry (CHEM 421), or instructor’s consent.

BIO 612. Advanced Plant Physiology (4). This course deals with the major processes of plant function (photosynthesis, carbohydrate metabolism, translocation, water retention, and ion uptake) and the integration of these processes in plant growth and development. Prerequisite: Course in General Botany, Plant Physiology or instructor’s consent.

BIO 614. Applied Microbiology (4). The microbiology of food, water, and soil with emphasis on quality control, sanitation, and public health. Prerequisite: Introductory-level course in microbiology (BIO 423), or instructor’s consent.

BIO 618. Virology (4). This course is primarily concerned with animal viruses. It includes a discussion of virus structure, biochemistry of virus replication, genetics, interference and interferon, host-parasite relationships and tumor viruses. Emphasis will be on the theoretical aspects of the subjects. Prerequisites: General Microbiology (BIO 423), Cell Biology (BIO 337), or instructor’s consent.

BIO 619. Molecular Genetics (4). A course dealing with the molecular aspects of gene structure, duplication, mutation, and phenotypic expression, with emphasis on the regulation of DNA replication, RNA synthesis and protein synthesis. Prerequisite: Cell Biology (BIO 337), Molecular Biology and Genetics (BIO 420), or instructor’s consent.

BIO 660. Research and Thesis (3). Experimental research and thesis writing supervised by the student’s thesis adviser. A minimum of six credits and a completed thesis required of all students seeking the M.S. in biology.

BIO 700. Laboratory Research Rotation (1 or 3). Graduate research mini-projects performed under the supervision of selected faculty members in the microbiology program. Recommended during first program year. Prerequisites: Graduate program status.

BIO 701. Advanced Microbiology (4). An advanced-level course dealing with the isolation, growth, morphology, and physiology of various microorganisms; principles of immunology, serology, and epidemiology, and properties of microorganisms associated with infectious disease. Prerequisites: Introductory-level course in microbiology or consent of instructor.

BIO 702. Applied Microbiology (4). The microbiology of food, water and soil with emphasis on quality control, sanitation, and public health. Prerequisites: Introductory-level course in microbiology or consent of instructor.

BIO 703. Virology (4) This course is primarily concerned with animal viruses. It includes a discussion of viral structure, biochemistry of viral replication, genetics, interference and interferon, host-parasite relationships and tumor viruses. Emphasis will be on the theoretical aspects of the subjects. Prerequisites: microbiology, cell biology or consent of instructor.

BIO 704. Molecular Genetics (4). A course dealing with the molecular aspects of gene structure, duplication, mutation, and phenotypic expression, with emphasis on the regulation of DNA replication, RNA synthesis and protein synthesis. Prerequisites: Cell biology or consent of instructor.
BIO 710. Scientific Communication (3). Graduate level course designed to prepare doctoral students for development of effective platform, poster and written scientific presentations. Emphasis will be on literature review, the components of scientific research articles, development of effective oral and platform presentations, proposal development, content organization and audience perspective. The course will culminate in the development of a scientific proposal related to their dissertation research. Prerequisites: Graduate program status.

BIO 720. Microbial Genetics and Genomics (3). Molecular genetic methods and related aspects of prokaryotic and lower eukaryotic biology. Overview of approaches and tools used in genomic research. Covers experimental and computational technologies as well as theoretical concepts important for the study of genomes and their function. Topics include high-throughput DNA sequencing and genotyping, genetic mapping of simple and complex traits, RNA expression profiling, proteomics, genome modification and transgenesis, and computational genomics. Review and discussion of research literature to examine experimental design, methodology, and interpretation of both historical and contemporary relevance to microbial genetics. Prerequisites: Undergraduate/graduate microbiology, biochemistry or consent of instructor.

BIO 730. Microbial Physiology and Diversity (3). Main aspects of microbial growth, energy and biosynthesis pathways, metabolic regulation and integration of pathways into a coherent system. Emphasis on physiological diversity, global control systems governing the adaptation of microorganisms to different environmental conditions, and emerging methodologies. Metabolism and energy conservation in chemoheterotrophic and chemolithotrophic bacteria. Anoxygenic and oxygenic photosynthesis in prokaryotes. Bacterial motility and chemotaxis. Diversity of morphology, physiology and ecology of bacteria and other microorganisms. Prerequisites: Undergraduate/graduate microbiology, biochemistry or consent of instructor.

BIO 740. 01 Environmental Microbiology (3). Interaction of microorganisms with each other and with their environment. Microbial distribution and activities in natural systems, and their importance to ecosystem function and environmental quality. Extreme habitats; biofilms; habitat-specific forces; microbial activity; microbial transformations and their impact on different environments; role of microbes in nutrient cycles and biogeochemistry. species diversity; detection and control of microorganisms; and associations with higher organisms. Use of microbes for mitigating manmade environmental problems of industrial, agricultural, and domestic origin. Each basic principle followed by applied and environmental case studies. Prerequisites: microbial physiology, biochemistry or consent of instructor.

BIO 740. 02 Microbiology of Food Systems (3). Topics of current interest in food microbiology, including new foodborne pathogens, rapid identification methods, effect of food properties and preservation techniques on microbial growth, and mode of action of antimicrobials. Principles of occurrence and control. Importance of sanitation and prevention of public health problems. Microbiological contaminants and methods for their detection. Mechanisms of microbial inactivation. Study of identification and characteristics of chemicals and biological agents implicated in food borne disease outbreaks and conditions or circumstances by which food contamination occurs. Examination of food protection activities conducted by local and state government at the retail level. Prerequisites: microbial physiology, biochemistry or consent of instructor.

BIO 740. 03 Microbiology of Water Systems (3). This course develops the fundamentals and applications of aerobic and anaerobic biological unit processes for the treatment of municipal and industrial wastewater. The principles of activated sludge, aeration and clarifier design, fixed film reactors, anaerobic treatment, solids handling and treatment, land treatment, and nutrient removal are presented. Discusses the contamination problems of water supplies due to presence of sewage bacteria, some of which can be deadly pathogens. This course uses concepts from microbiology and the basic principles of stoichiometry, energetics and microbial kinetics are used to support the design of biological unit processes. Prerequisites: microbial physiology, biochemistry or consent of instructor.

BIO 750. Microbial Risk Assessment and Management (3). Examination of probabilistic (in contrast to deterministic) approaches to prediction of human exposure to infectious microorganisms in the environment. Covers context, methodologies, data, uncertainties, and institutional arrangements for risk assessment, hazard identification, exposure assessment, health effects assessment, risk characterization, and risk communication. Discussion of data needs, pitfalls, policy ramifications, and current state of development and regulatory acceptance. Qualitative and quantitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Prerequisites: biostatistics or consent of instructor.

BIO 799. Doctoral Research (Variable) Continuous enrollment. Comprehensive activities supporting students’ doctoral program development, including but not limited to dissertation literature review, dissertation research proposal development, candidacy preparation, and dissertation completion. Prerequisites: Departmental permission.

BIO 805. Microbial Ecology (3). Introduces current biochemical and macromolecule sequence-based methods to assess community diversity and microbial activity in a variety of ecosystems. Other topics discussed include bacterial growth and survival, population biology, and microbial interactions. Will include diversity of microbial life in marine environments; habitats and taxonomy of Monera, Protista, and microscopic Animalia; environmental factors and interactions among microbes as structuring forces in natural communities; microbial ecophysiology and biogeochemical cycles of the
major elements; microbial assemblages as living communities; microbial food webs; significance of grazing; energy flow in microbial communities; microbial loop hypothesis; feedback regulatory mechanisms in microbial communities; nutrient sinks and links microbial assemblages in extreme environments; marine biotechnology: aquaculture; biodegradation of pollutants; antiviral and antitumor compounds from marine microbes. Prerequisites: Microbial Genetics, Microbial Physiology or consent of instructor.

**BIO 815. Microbial Pathogenesis (3).** Introduction of basic concepts of bacterium-host relationships. Examination of virulence factors that promote colonization, survival of infecting microorganisms and virulence attributes that damage the host. Discussion of the origin of antibiotic resistance genes, their mechanisms of action, and how they are transferred between bacteria. Description of experimental approaches for investigating bacterium-host interrelationships, cultured cell lines and their application in studying microbial pathogenicity, animal model systems and measurements of virulence. The course concludes with a broad discussion on virulence factors and rational design of vaccines. Prerequisites: Microbial Genetics, Microbial Physiology or consent of instructor.

**BIO 825. Microbiology of Food Sanitation (3).** Study of identification and characteristics of chemicals and biological agents implicated in food borne disease outbreaks and conditions or circumstances by which food contamination occurs. Infectious and toxigenic agents of food borne disease: detection, identification, and control methods; ecology and survival strategies of pathogens in foods; virulence mechanisms of food borne pathogens. Current trends in food safety: emerging pathogens; impact of new generation foods on ecology and physiology of pathogens; new technologies in control and detection/typing. The principles of the Hazard Analysis Critical Control Point (HACCP) system will be examined: the procedures and processes which can affect the overall microbiological safety of the food; microbiological and process overviews; generic HACCP models, good manufacturing practices; monitoring of critical control points, process control and implementation. Prerequisites: Microbiology of Food Systems, Microbial Risk Assessment and Management or consent of instructor.

**BIO 835. Microbial Water Quality (3).** Study of water quality standards, chemical, physical and microbial contaminants in water. A survey of pathogenic microorganisms which are common to water sources, water distribution system and biofilms. Study of biofilms An in depth study of virulence mechanisms of water borne pathogens, detection, identification, and control methods. Special focus is placed on current methods and procedures of environmental sampling, and water quality control and assurance.

**BIO 845. Microbial Bioterrorism and Safety (3).** History, identification, properties and mode of transmission of agents of bioterrorism, including preventive, control and treatment measures against bioterrorism. Current and emerging pathogens with significant potential as weapons. Topics are organized according to biological classification (bacteria, viruses, biotoxins) as well as pathogens in special settings such as the food supply. Content will include biological properties, transmission and epidemiology, pathogenic mechanisms, diagnosis, control and management. Antimicrobial therapy and vaccines will also be covered. Prerequisites: Consent of instructor.

**BIO 855. Microbial Biotechnology (3).** Applications in current approaches in microbial biotechnology focusing upon microbial products, microbial biomass as a protein source, bioremediation, N2 fixation, Agro bacterium and the manipulation of plant genes, detection and monitoring of genetically engineered microorganisms, government regulation and social implications. Covers technological approaches employed in the microbiological production of food, drink, biopharmaceuticals; production methods, genetic engineering (vectors, recombination cloning), continuous fermentation; bioconversion processes and production of chemicals from biomass; Microbial diversity and its importance in biotechnology as a source of novel enzymes and products. Environmental processes catalyzed by microorganisms and their exploitation for pollution control. Microbial enzymes in biocatalysts. Prerequisites: Microbial Genetics or consent of instructor.

**BIO 865. Special Topics in Microbiology (1 or 3).** Colloquia or advanced study of specific topics and emerging trends in a specialized field.

**BIO 899. Doctoral Dissertation (3).** Dissertation defense. Enrollment during final semester. Prerequisites: Departmental permission.

**BIOSTATISTICS (BST)**

**BST 700. Biostatistics (3).** Principles and application of statistical methods to analyze data arising from a wide variety of applications. Topics include descriptive statistics, point and interval estimation, hypothesis testing, inference for a single population, comparisons between two populations, one- and two-way analysis of variance, comparisons among population means, analysis of categorical data, and correlation and regression analysis. Introduces interactive computing through SPSS and SAS statistical software. Examples drawn from microbiological and biomedical literature. Emphasizes basic principles and criteria for selection of statistical techniques. For M.S, and PhD student enrollment.

**CHEMISTRY (CHE)**

**CHE 700. Biochemistry (3).** Graduate-level examination of the structure, function, and chemistry of proteins, carbohydrates, lipids and nucleic acids; introduction to the biophysical methods used to study macromolecules. Critical
reading of original articles for first year graduate students in biochemistry. Prerequisites: Undergraduate/graduate chemistry (16 hours) or consent of instructor.

CHE 705. Environmental Chemistry (3). Examination of the importance of chemistry in solving environmental problems the atmosphere, biosphere, geosphere, hydrosphere and the anthroposphere. Covers the production of pollutants, their distribution in the environment, overall health effects and remediation using chemical knowledge and its attendant techniques. Prerequisites: Undergraduate/graduate chemistry (16 hours) or consent of instructor.

MATHEMATICS (MAT)

MAT 500. Set Theory (3). Native set theory including the axiom of choice, Zorn’s Lemma and well ordering.

MAT 501. Fundamentals of Modern Mathematics (3). Basic topological properties of the real line out of which modern analysis is developed. Sets, sequences, functions, limits and continuity.

MAT 502. Analysis for Teachers (3). Designed for high school and college teachers of mathematics with at least 25 quarter hours in college mathematics.

MAT 503. History of Mathematics (3). The history of mathematics beginning with the Greek period. Relationship of the historical approach to the problems of teaching mathematics.

MAT 505. Computer Science (3). Design and construction of computer programs; use of a specific programming language to solve problems over a wide range of applications on a digital computer.

MAT 512. Linear Systems (3). The study of vector spaces, linear equations and matrices, linear transformations and matrices, and determinants. Prerequisite: MAT 510.

MAT 513. Number Theory (3). The study of divisibility, primes, congruence, quadratic reciprocity, linear Diophantine equations and Euler-Fermat Theorem.

MAT 514. Algebra for Teachers (3). Fundamental concepts of arithmetic and algebra, including theory of sets, real and complex numbers; basic concepts of elementary algebra; brief introduction to modern algebra and finite mathematics. Designed for students who wish to review or study mathematics as a part of their general education.

MAT 550. Combinatorics (3). Topics in combinatorics, graphs and network. These include matching, matroids, polyhedral combinatorics and optimization algorithms.

MAT 560-561. Operational Research I, II (3,3). Mathematical optimization techniques linear programming with simplex and revised simplex methods network analysis, dynamic programming, game theory, inventory theory queuing theory and simulation. Formulation, solution, and analysis of problems arising from business, engineering, and the sciences.

MAT 622-623. Complex Analysis I, II (3,3). The study of complex numbers, complex functions, analytic functions. Cauchy’s integral formula, local properties of analytic function, calculus of residue and harmonic functions. Prerequisites: MAT 500, 501.

MAT 632. Geometry for Teachers (3). The study of fundamental concepts of geometry, including first book of Euclid’s elements on triangles and parallel lines; certain non-Euclidean geometries resulting from modification of the parallel postulate; and introduction to projective geometry.

MAT 655. Numerical Analysis (3). The study of techniques used in numerical integration and differences, solutions of linear and nonlinear equations, approximations and solutions of ordinary differential equations, evaluation series by approximations and error analysis, computer programming techniques are used for solutions and evaluations. Prerequisites: MAT 500, 501.

MAT 660. Applied Mathematics (3). Techniques of applied mathematics and significant present-day problems to which it is applied. Exact contents vary with instructor — differential equations, partial differential equations, optimization, combinatorics, Boolean matrix applications in social science and computers, information theory, economics and switching circuits.

MAT 670-671. Mathematical Statistics I and II (3,3). Distributions of random variables; conditional probability and stochastic independence; some special distributors; distribution functions of random variables; interval estimation; order statistics; point estimation; statistical hypotheses; and the analysis of variance and co-variance.

MAT 690. Seminar (1-3). Thesis or a study of advanced topics relating to the special needs and interests of individual
students (requires consent of instructor). This may be taken more than once.
VII. THE GRADUATE FACULTY

The graduate faculty exists not only to provide post baccalaureate instruction, but also to set standards for graduate work in general. Only members of the graduate faculty may teach 500 or above level courses; and only members of the graduate faculty may be chairpersons of thesis and advisory committees. The dean of each school or college that offers graduate course work has the responsibility of nominating annually members to the graduate faculty who meet the eligibility requirements set forth below. All nominees must be approved by the Graduate Council and the vice president for academic affairs.

Graduate faculty members may be nominated to one of three tiers. These three tiers consist of Full Graduate Faculty members, Associate Graduate Faculty members and Provisional Graduate Faculty members. (1) Full Graduate Faculty members are those who hold the Ph.D. or terminal degree, have the rank of Assistant Professor or higher, have at least three years of postdoctoral research appropriate to his/her field of instruction, and/or three years of research and teaching. (2) Associate Graduate Faculty members are those who hold the rank of Assistant professor or higher, hold the Ph.D. or terminal degree, and who demonstrate ability and interest in the graduate program as well as in research and creative activity. Associate Graduate Faculty members may be recommended by the Graduate Council to full membership status. (3) Provisional Graduate Faculty members are those persons recommended by the dean or the school or college, who have at least a master’s degree in the appropriate field of study, and who demonstrate outstanding ability as determined by their experience or research and creative activity. (The adjunct graduate instructor can be included in this tier). Provisional Graduate Faculty members will be reviewed for approval at the beginning of each semester.

The following roster lists each graduate faculty member, the first year of appointment at ASU, the primary academic appointment, and degree-granting institutions.

College of Business Administration

Accounting

Appointment Level

Dave Thompson (2010) .............................................. Associate
B.S., Birmingham Southern, MBA, MAcc., Samford University, JD, Birmingham School of Law, Ph.D., Jackson State University.

Computer Information Systems

Sun-Gi Chun (1991) .............................................. Associate
B.A., Sung Kyun Kwan University, Korea; M.B.A., M.S.,

Claremont Graduate School; D.B.A., Mississippi State University

Kamal K. Hingorani (1995) ........................................ Full
Ph.D., Auburn University B. Tech.; I.I.T. Kharagpur, India

John Jiin Wang (1990) ........................................ Full
B.D., M.S., University of West Florida; Ph.D., University of Alabama

Economics

Saad Bakir (1993) ........................................ Full
B.S., M.S., American University of Beirut; Ph.D., Virginia Polytechnic Institute and State University

Sontachai Suwanakul (1989) .............................. Associate
B.A., Chenghai University; M.A., Middle Tennessee State University; Ph.D., University of Arkansas

Chiou-nan Yeh (1976) ........................................ Full
B.A., National Taiwan University; M.A., Mankato State University; Ph.D., University of Massachusetts.

Finances

Gow-Cheng Huang (1989) ........................................ Full
B.S., Fu-Jen Catholic University, Taiwan, R.O.C.; M.A. (Management Science); Ph.D., (Finance) University of Alabama

College of Education

Administration/Instructional Leadership

.............................................. Appointment Level

Hyacinth Elaine Findlay (2000) ............................... Full
Ed.D. Auburn University; Ed.S. Tuskegee University; M.Ed. Tuskegee University; B.A. University of the West Indies

Ronald Grace (2011) ........................................ Associate
B.S. Alabama State University, MBA Webster University St. Louis, M.Ed. Alabama State University, Ph.D. University of Alabama State University

Gwendolyn King (2003). ............................... Full
B.M.Ed., M.S., Ph.D., Florida State University

Allen Stewart (1990) ........................................ Full
B.A., San Francisco State University; M.S., Jackson State University; Ph.D., University of Mississippi

Counseling

Necole Holiday Driver (2003) .............................. Associate
B.S. Troy State University; M.Ed. Auburn University of Montgomery; Ph.D. Auburn University
LaWanda Edwards (2008) .......................... Associate  
B.S. Auburn University at Montgomery, M.Ed. Florida  
A. & M University, Ed.S. Troy University at Phenix City,  
Ph.D. Auburn University

Vincent Dwayne Hinton (2009) ............... Provisional  
B.S. Faulkner University, M.S. Alabama State University,  
Ed.S. Auburn University at Montgomery

Jeane Lee (2001) .............................. Full  
B.S., B.Ed., Middle Tennessee State University; MA.,  
University of Alabama; Ph.D., University of Alabama

Early Childhood Education

Huey-Ling Lin (1999) .............................. Full  
B.S., Chung Shan Medical and Dental College; M.S.,  
University of Wisconsin; Ph.D., Auburn University

Kathleen Tyler (1973) ............................... Full  
B.S., Florida State University; M.Ed., Ed.D., Auburn  
University

Elementary Education

Evelyn Hodge (1997) .............................. Full  
B.A., Albany State College; M.Ed., Bowling Green State  
University; Ed.S., Troy State University; Ph.D., Florida  
State University

Daniel J. Lucas (1988) ............................. Full  
B.S., M.Ed., Indiana University; Ed.D., Montana State  
University

Parichart G. Thornton (2005) ............... Associate  
B.S., M.S., Ph.D., Auburn University

Danjuma Saulawa (1996) ......................... Associate  
A.A., Arizona Western College; B.A., M.Ed., Ph.D.,  
University of Arizona

Health

Charlie Gibbons (2008) ......................... Interim Dean  
B.A., M. Ed. Georgia Southern College; Ed.D.  
University of Alabama

Sandra E. Mimms (1989) ....................... Provisional  
B.S., M.P.H., The University of Tennessee

Leadership, Policy and Law

John Stanford Gooden (2002) ................. Full  
B.A., Delaware State University; M.A., City College of  
New York; Ed.D., University of Massachusetts

B.S., Ph.D. University of Alabama

Ronald A. Lindahl (2002) ..................... Full  
B. ME., M.S.; Ph.D., Florida State University

Tricia Stewart (2011) ......................... Full  
B.A., St. John Fisher College; M.S., University of  
Minnesota; Ph.D., University of Rochester

Library Education Media

Naomi R. Caldwell (2013) ..................... Associate  
B.S., MSLS Clarion University of Pennsylvania PhD.,  
University of Pittsburgh

Psychology

Esenc M. Balam (2006) ......................... Associate  
B.A., Middle East Technical University; M.Ed., Georgia  
College and State University; Ph.D., Auburn University

Shirley L. Barnes (2005) ....................... Full  
B.A., Auburn University; M.Ed., Tuskegee University;  
Ph.D., Auburn University

Vivian W. DeShields (1976) ................... Full  
B.S., Alabama State University; M.S., Indiana  
University; Ph.D., The University of Alabama

Tina Vazin (1997) .............................. Full  
B.S., M.S., Ph.D., Auburn University

Physical Education

Doris P. Screws ................................. Full  
B.S./M.Ed., Alabama State University; P.E.D., Indiana  
University

Secondary Education

Calvin McTier (1979) ........................... Full  
B.S., Alabama State University; M.S., Alabama  
State University; Ph.D., Auburn University

Special Education/Collaborative

Moon K. Chang (1991) ........................ Full  
M.S., Ph.D., University of Tennessee-Knoxville

Joyce Johnson (1995) ........................ Full  
B.S., Tuskegee University; M.Ed., Alabama State  
University; Ph.D.,University of Alabama

Technology

Averil M. Loague (2006) ..................... Associate  
B.A., New Mexico Institute of Mining and Technology;  
B.S.E., University of New Mexico; M.Ed., Auburn  
University; Ph.D., University of Alabama
Peter Macchia, Jr. (1994) .............................................. Full B.A., M.Ed., University of Florida; Ph.D., Florida State University

**College of Health Sciences**

**Occupational Therapy**

Appointment Level

Angela Thomas Davis ............................................. Full BSOT, Tuskegee University; MPA, Auburn University-Montgomery, Ed.D, Alabama State University

Susan P. Denham (1998) ............................................. Full BSOT, University of Alabama-Birmingham; MS, Troy State University at Montgomery; Ed.D, Alabama State University

Jewell Dickson ...................................................... Associate BSOT Tuskegee University; MPH University of Alabama at Birmingham, OTD, Rocky Mountain University

Greshundria M. Raines (2004) .................................... Associate B.S., Tuskegee University; MPA, Auburn University-Montgomery; OTD, Rocky Mountain University

**Physical Therapy**

Mary Beth Downs (2005) ............................................ Full BA, Wake Forest University; PhD, George Washington University

Steven Chesbro (2008) ............................................. Full BS, Langston University; BA/MS, Northeastern State University; MHS, University of Indianapolis; Ed.D., Oklahoma State University, DPT, MGH Institute of Health Professions

Robert Duvall ....................................................... Associate BA, Western Maryland College, MMSc., Emory University School of Medicine, DHSc, University of St. Augustine Institute of Physical Therapy

Jill Heitzman ......................................................... Associate B.S., St. Louis University and DPT, Creighton University

Dorothy A. Autrey (1990) .................................... Full A.B., Talladega College; M.A., Ph.D., University of Notre Dame

Bertis English (2000) ............................................ Associate B.A., Jacksonville State University; B.A., Talladega College; M.A., Jacksonville State University; Ph.D., Auburn University
Aaron Horton (2011) ........................................... Associate  
B.A., M.A., East Tennessee State University; Ph.D.  
Mississippi State University

Political Science

Byrdie Larkin (1977) ........................................ Associate  
B.S., Alabama State University; M.A., Ph.D., Atlanta  
University

Sociology

Gerald G. Bennett (1982) ................................. Associate  
B.A., Albany State University; M.A., Ph.D., Bowling  
Green State University

College of Science, Mathematics and  
Technology

Biology

Appointment Level  

Alain Bopda-Waffo (2010) .................................. Full  
BS University of Cameroon, MS University of Yaounde,  
PhD. Max Planck Institute of Biophysical Chemistry

Mamie T. Coats (2010)................................. Associate  
B.S. Xavier University; Ph.D., University of Alabama at  
Birmingham

Vida A Dennis (2009)................................. Full  
B.S., University of Liberia; M.A., Western Michigan  
University; Ph.D., University of Georgia

Audrey Napier (2001)................................. Full  
B.S., Alabama State University, Ph.D., Ohio State  
University

Peter Noble (2009)......................... Full  
BS Memorial University of Newfoundland, MS Memorial  
University of Newfoundland, PhD University of  
Saskatchewan

Dorothy Payne (1999)................................. Associate  
BS, University of Alabama, M.Ed., Auburn University,  
MS., Alabama State University; Ph.D., University of  
Alabama/Birmingham

Boakai K. Robertson (2002) ......................... Full  
B.S., University of Liberia; M.S., Ph.D., Cornell University

Karyn Scissum Gunn (1996)................................. Full  
B.S.; M.S., Tuskegee University; Ph.D., Auburn University

Shree R. Singh (1994)................................. Full  
BS MS, Alabama State University, Ph.D., Auburn  
University

Lula Smith (2001) ........................................ Full  
B.S., Alabama A&M; M.S., Alabama State University;  
Ph.D., Rutgers University and the University of Medicine  
and Dentistry

Shivani Soni (2009)................................. Associate  
BS, MS, PhD University of Delhi, India

Robert Villafane (2008)................................. Full  
BA, New York University; MA, U.C. Berkeley; Ph.D.,  
New York University

Kennedy Wekesa (2000)................................. Full  
B.S., Guilford College; M.A., University of North  
Carolina, Greensboro; Ph.D., North Carolina State  
University

Hongzhuan Wu (2004)................................. Full  
DVM, MS Yangzhou University; Ph.D. South China  
Agricultural University

Forensic Science

Dr. Azriel Gorski (2012)................................. Associate  
B.S. Penn State, M.S. Bloomsburg University, Ph.D. The  
Hebrew University of Jerusalem

Harvey Hou (2011)................................. Full  
B.S., Wuhan University; Ph.D., Peking University

Dr. Gulnaz Javan (2012)................................. Associate  
B.S. Istanbul University, M.S. Istanbul University, PhD  
University of Istanbul, Post Doctorate Emory University

Mathematics

Wen D. Chang (1995)................................. Full  
MA., Science and Technology University of China; M.S.,  
Suny at Buffalo, Ph.D. Suny at Buffalo.

Iraj Danesh (1988)................................. Full  
B.S., M.S., Tehran University; M.S., Ph.D., Georgia  
Technological

Chunhua Feng (2010)................................. Full  
B.S., M.S., Guangxi Normal University; Ph.D., Beijing  
Institute of Technology; Ph.D. Ecole Polytechnique de  
Montreal

Michelle Foster (2007)................................. Associate  
B.S., Alabama State University; MS, Ph.D., Auburn  
University

Carl S. Pettis (2006)................................. Full  
BS, MS; Alabama State University; Ph.D., Auburn  
University
Raynetta Prevo-Williams .......................... Associate  
BS, MS, Alabama State University, MA, Ph.D., University of Alabama

Fred W. Roush (1976) .............................. Full  
A.B., University of North Carolina; Ph.D., Princeton University

Carolyn Simmons-Johnson (2005) ................. Associate  
B.S., Auburn University; B.S., M.S., Alabama State University; M.A., Ph.D., The University of Alabama

B.S., M.S. Tianjin University; Ph.D. The University of Calgary

**Physical Science**

Douglas Strout ........................................ Full  
B.S. Texas Christian University, Ph.D. Rice University

**Physics**

Cleon Barnett ......................................... Full  
B.S., Alabama A&M University, M.A., Fisk University, Ph.D., Florida A&M University

**College of Visual & Performing Arts**

**Music**  
Appointment Level

Caterina Bristol (1999) ............................ Full  
B.M. The Ohio State University; M.M., D.A., University of Northern Colorado; M.L.S Texas Woman’s University
