WELCOME, MISSION RESEARCH STUDY PARTICIPANTS!

What are the benefits of becoming an NRMN-MISSION research participants?

ACCESS TO NRMN RESOURCES
- Virtual Community
  NRMN sign-in required https://nrmnet.net/nih-notice/
- Career Development Webinars
- Professional Development/Publications
- Social Media Connections
- Newsletter

RECEIVE...
- Guided Virtual Mentoring
- One-on-One Mentoring
- Group Mentoring
- “Ask a Mentor”

CONNECT WITH OTHER MEMBERS
- Post to the Community
- Virtual Meeting Space
- Join Groups

APPLICATION INFORMATION

The deadline for applications is September 15.
Who can apply?
Freshmen students pursuing STEM and behavioral science degrees.
There is no charge to participate in this project.

Is there compensation?
Yes. Monetary compensation ranges from $50-$175.

Interested?
Get your application and consent form from Sabita Saldanha, Ph.D.
Department of Biological Sciences
Room 232, Life Sciences Building
Alabama State University

Questions?
Call 334-604-8416, email nrmnmission@alasu.edu or visit www.alasu.edu/nrmn-mission.

DISCOVER YOUR MISSION...

Are you ready for an exciting opportunity that allows you to expand your knowledge in science and diversify your peer and mentoring network while contributing to impactful research?

This study is specifically designed for freshmen students who are part of groups in Science, Technology, Engineering and Mathematics (STEM) professional fields. Once selected, you will work with a variety of mentors and peers with similar scientific interests and experiences. Personal one-on-one coaching and virtual mentoring (which includes access to mentors from various professional backgrounds) will be at your fingertips (this only applies to individuals assigned to the applicable research cohorts). Through NRMN, you will also have the opportunity to participate in engaging team-building exercises and hear from distinguished speakers who will deliver critical insight into the many STEM and behavioral science careers at designated event(s). Build an exceptional curriculum vitae (CV), critical to success in the STEM professional world, and improve your communication and networking skills while attending professional workshops.

You should consider being part of this ground-breaking research study here at Alabama State University. This study offers benefits in addition to the many already described, which include the opportunity for you to give back and become peer mentors to future freshmen who chose to participate in this study. The Mentorship, Integration of Students in Scientific Interaction, Organization and Networking (MISSION) project is funded by the National Institutes of Health (NIH) Common Fund (administered by the NIGMS) and is aimed to provide extensive mentorship and networking opportunities for students in STEM and behavioral science majors. With ASU as the lead institution, this project includes the collaboration with four other universities – Tuskegee University, Savannah State University, Vanderbilt University and University of North Texas Health Science Center.
